SSC/Q8107: AI Data Architecture Analyst

Brief Job Description

The AI Data Architecture analyst qualification equips professionals with the essential skills to design, implement, and maintain data architectures that align with organizational goals. Participants will learn to assess business requirements, select appropriate technologies, and manage storage solutions while ensuring compliance with data governance and security standards. The curriculum covers key areas such as data quality assurance, performance optimization, and the implementation of security protocols. Upon completion, individuals will be adept at analyzing existing systems, innovating data integration solutions, and contributing to effective data management strategies, ultimately enabling organizations to leverage their data as a strategic asset for business success.

Personal Attributes

A data architect needs to be well organized with excellent critical thinking and decision making abilities. S/he needs to have superior team management and communication skills to work with customers and decision makers across multiple teams.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N8109: Design and maintain data architectures as per specifications](#)
2. [SSC/N8111: Implement data storage network solutions](#)
3. [SSC/N8119: Ensure data quality and data governance processes and structures are in place](#)
4. [SSC/N8158: Follow data security best practices and risk management](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

SSC/N8109: Design and maintain data architectures as per specifications

Description

This unit is about designing new data architectures for internal and external clients.

Scope

The scope covers the following :

- Define requirements
- Design data storage, formats and integrations
- Monitor performance

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Define and document business and technical requirements for data architecture ensuring alignment with organizational goals and stakeholder needs
- PC2.** Review and analyze various data architectures capabilities limitations and evaluate potential evolution of the data technology stack
- PC3.** Formulate strategies and select the best technologies to implement data architectures considering security standards governance and compliance requirements
- PC4.** Design data architecture that integrates data from various sources stages data for processing determines appropriate data formats and defines data segmentations
- PC5.** Develop reliable and scalable data pipelines and integrations continuously monitor performance metrics troubleshoot issues and optimize data storage and retrieval processes
- PC6.** Stage data loading approaches for batch and real-time applications and adapt architecture based on performance scalability and evolving governance standards
- PC7.** Maintain comprehensive documentation of data architecture processes standards and updates and share with relevant stakeholders for transparency and future reference
- PC8.** Incorporate Agile methodologies to support iterative development and continuous improvement in data architecture design and maintenance
- PC9.** Proactively monitor governance and compliance requirements ensuring data architecture aligns with regulatory standards and environmental changes
- PC10.** Collaborate with stakeholders to understand their needs and ensure data architecture effectively supports organizational functions and strategic objectives

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Follow organizational policies and use templates to design and document data architectures with stakeholder input
- KU2.** Understand business needs and technical requirements including data formats storage security and compliance to build strong data solutions

Qualification Pack

- KU3.** Create data architectures that include databases storage systems and cloud or distributed platforms while ensuring performance and security
- KU4.** Use tools like Hive or Kafka to integrate and segment data and make sure data can be stored retrieved and processed efficiently across different systems and operating systems
- KU5.** Continuously check architecture performance security and compliance, fix issues, and keep documentation up to date to meet organizational needs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow rule based decision making processes
- GS2.** impact analysis of the various actions performed and disseminating relevant information to others
- GS3.** ability of understand architecture related decisions on business and organization
- GS4.** apply problem-solving approaches in different situations
- GS5.** apply balanced judgments to different situations
- GS6.** check your work is complete and free from errors

Qualification Pack

SSC/N8111: Implement data storage network solutions

Description

This unit is about designing, implementing and maintaining a multi-vendor data storage network solution for internal and external clients.

Scope

The scope covers the following :

- Design storage network solution
- Monitor performance

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Evaluate storage design considerations for the data architecture
- PC2.** Describe assessment goals and methodology of storage networks
- PC3.** Setup the storage network for the desired architecture
- PC4.** Create documentation on storage networks for appropriate people
- PC5.** Validate storage networks with appropriate people
- PC6.** Monitor system storage performance and recommend suitable improvements
- PC7.** Perform regular port and throughput exercises
- PC8.** Resolve data storage network issues
- PC9.** Analyze data access patterns to optimize storage performance and determine the most effective configuration for data retrieval
- PC10.** Implement data redundancy and backup strategies to ensure data availability and disaster recovery
- PC11.** Integrate security measures within the storage network architecture
- PC12.** Perform capacity planning to estimate future storage needs based on usage trends and projected data growth
- PC13.** Research and evaluate emerging storage technologies and solutions to recommend innovative approaches that align with organizational goals

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Follow organizational policies to design document and implement storage network solutions with stakeholder input and standard tools
- KU2.** Learn about different storage systems like SAN NAS and SAS and manage storage while following security and privacy standards
- KU3.** Use cloud platforms to support storage solutions and consider how they affect system performance

Qualification Pack

- KU4.** Check how hardware and network systems impact storage performance and learn to write scripts to manage and access data on various operating systems
- KU5.** Make sure storage solutions meet security and privacy rules and involve the right people to ensure proper and compliant setup

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** apply problem-solving approaches in different situations
- GS2.** apply balanced judgments to different situations

Qualification Pack

SSC/N8119: Ensure data quality and data governance processes and structures are in place

Description

This unit is about defining data utilization and governance processes for the team or organization.

Scope

The scope covers the following :

- Define data assets
- Define data utilization and governance strategies

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Work with stakeholders to identify data quality criteria like accuracy and completeness and document benchmarks to measure quality
- PC2.** Analyze data to understand its characteristics and create processes to clean duplicates and fix formatting errors
- PC3.** Standardize data formats such as dates and text and set validation rules to ensure data is correct and consistent
- PC4.** Use scripts to automatically check data during ETL processes detect errors and set up alerts for issues
- PC5.** Improve data quality by adding external data sources while ensuring accuracy and standard practices are followed
- PC6.** Investigate the causes of data issues and set up ongoing monitoring with reports and dashboards to track quality trends
- PC7.** Collect feedback from data users about quality issues and update processes and documentation regularly
- PC8.** Create regular data quality reports for stakeholders and stay current with best practices and tools in data quality management
- PC9.** Establish a data governance framework with roles and policies to manage data classification access and responsibilities
- PC10.** Implement security measures like encryption and access controls and review logs to ensure compliance and respond to incidents

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand organizational policies for defining data governance processes sharing and documenting data standards and knowing involved stakeholders
- KU2.** Learn how to identify and access internal and external data assets to meet business requirements

Qualification Pack

- KU3.** Recognize different data assets and establish standards to ensure data quality and integrity
- KU4.** Understand data governance structures and processes and develop standards for effective data utilization
- KU5.** Gain skills in working across various operating systems such as Linux Ubuntu and Windows for managing data assets and governance tasks

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** apply problem-solving approaches in different situations
- GS2.** apply balanced judgments to different situations

SSC/N8158: Follow data security best practices and risk management

Description

This Nos is about best practices and data security

Scope

The scope covers the following :

- Follow data security best practices and risk management

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Implement data encryption methods to protect sensitive data at rest and in transit
- PC2.** Establish secure protocols for transferring data between systems, ensuring data security during transit
- PC3.** Set up monitoring tools to track access and modifications to sensitive data
- PC4.** Conduct regular audits and reviews of data access logs to identify potential security breaches and assess compliance with governance policies
- PC5.** Develop data retention policies that outline how long different types of data should be retained
- PC6.** Conduct regular training exercises for the data engineering team and relevant stakeholders on how to respond to security incidents
- PC7.** Regularly review and update data security policies and governance frameworks in response to evolving threats and regulatory changes
- PC8.** Troubleshoot and resolve issues with new data architectures
- PC9.** Analyze common data patterns for transactional systems and hybrid data solutions
- PC10.** Define reliable and scalable data pipelines or integrations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Follow organizational policies and standards for data governance to ensure proper data management and security across all data sources and sharing processes
- KU2.** Identify and classify data assets to understand potential risks and implement appropriate access controls and security measures
- KU3.** Develop and enforce data utilization standards and procedures that protect data integrity and prevent unauthorized access or sharing
- KU4.** Document data governance processes clearly and involve the right stakeholders to maintain accountability and support compliance with security regulations

Qualification Pack

KU5. Use standard tools and best practices to monitor data quality and integrity continuously, perform risk assessments, and respond promptly to security incidents across different operating systems

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. make decisions on suitable course of action

GS2. apply balanced judgments to different situations

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Helpdesk	Helpdesk is an entity to which the customers will report their IT problems. IT Service Helpdesk Attendant is responsible for managing the helpdesk.
