Qualification Pack

SSC/Q8108: AI Solution developer

Brief Job Description

The AI Solution Developer qualification is designed to equip individuals with the necessary skills and knowledge to design, implement, maintain, and validate AI-based solutions in various organizational contexts. The core competencies include understanding business requirements, evaluating platforms and technologies, implementing data governance, and ensuring compliance with ethical standards in AI. Candidates will learn to apply enterprise architecture principles, effectively manage data, and utilize various tools and methodologies to support the design and deployment of AI solutions. In addition, the qualification emphasizes the importance of monitoring and evaluating solution performance, ensuring ongoing compliance, and adapting to evolving industry standards. It also encompasses modules on employability skills, professional development, communication, and customer service, thereby preparing candidates for success in the workplace.

Personal Attributes

A solution architect needs significant people and process skills. They often interact with the top management and can articulate complex scenarios and problems to various other stakeholders using simpler terminology.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N8113: Design new solution architectures as per specifications](#)
2. [SSC/N8114: Maintain existing architectures for solutions](#)
3. [SSC/N8159: Ensure compliance and ethical standards](#)
4. [SSC/N8160: Monitor and Evaluate AI-Solution Performance](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack (QP) Parameters

SSC/N8113: Design new solution architectures as per specifications

Description

This unit is about defining and describing an architecture of a system delivered in context of a specific solution.

Scope

The scope covers the following :

- Define requirements
- Define platform and other component specifications
- Monitor performance

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and prioritize business requirements through stakeholder engagement and analysis.
- PC2.** Evaluate the underlying platform, considering scalability, performance, and compatibility with existing systems
- PC3.** Assess data governance, privacy regulations and security requirements in a global context.
- PC4.** Select design standards, methodologies, and tools that align with best practices and project objectives
- PC5.** Define system level architecture for the solution
- PC6.** Design data feeds and implement data quality checks to ensure reliable data integration
- PC7.** Define detailed component specifications
- PC8.** Translate component specifications into detailed designs for implementation
- PC9.** Conduct impact analysis to assess the implications of major design choices on the overall architecture
- PC10.** Develop a technical capabilities roadmap for new solution architectures, ensuring alignment with organizational strategy and technological advancements
- PC11.** Document designed solution architectures for relevant stakeholders, ensuring clarity and accessibility.
- PC12.** Collaborate with stakeholders to validate and refine solution architectures

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand organizational policies for designing solution architectures sharing and documenting them while involving key stakeholders
- KU2.** Learn about business requirements industry standards trends and governance issues related to data storage security and privacy

Qualification Pack

- KU3.** Know the components of solution architecture including business information application and technology layers and how to define them
- KU4.** Gain skills to develop technical roadmaps create components and measure architecture performance and scalability
- KU5.** Familiarize yourself with different platforms cloud services networks hardware and operating systems to build effective solutions

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow rule based decision making processes
- GS2.** configure data and disseminate relevant information to others
- GS3.** apply problem-solving approaches in different situations
- GS4.** apply balanced judgments to different situations
- GS5.** check your work is complete and free from errors

Qualification Pack

SSC/N8114: Maintain existing architectures for solutions

Description

This unit is about maintaining existing architectures for solutions for internal and external clients.

Scope

The scope covers the following :

- Review and optimize the architecture
- Monitor standards

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Establish data quality metrics and oversee processes for continuous monitoring
- PC2.** Troubleshoot and resolve issues with new solution architectures.
- PC3.** Identify potential project risks and develop mitigation strategies in collaboration with stakeholders.
- PC4.** Review existing system architecture designs to ensure a balance of functional, service quality, and systems management requirements
- PC5.** Review existing system architecture designs to ensure the selection of appropriate technology, efficient use of resources, and integration of multiple systems.
- PC6.** Review technical capabilities roadmap for existing solution architectures to support ongoing improvements and address current technological needs
- PC7.** Continuously monitor and adapt to evolving design standards and industry trends
- PC8.** Update documentation on existing solution architectures for appropriate people
- PC9.** Provide training for relevant teams on implemented architectures to ensure effective utilization.
- PC10.** Stay informed about advancements in AI and related technologies to maintain a competitive edge.
- PC11.** Promote collaboration across different teams to foster innovation and better integration of AI solutions

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** understand organizational policies for maintaining and documenting solution architectures involving key stakeholders and using standard templates and tools
- KU2.** Learn how to adapt architectures to meet evolving business requirements industry trends and governance standards for security and data privacy
- KU3.** Know the elements of solution architecture including business information application and technology layers and how to define and scale components

Qualification Pack

- KU4.** Gain skills in using cloud platforms network hardware and operating systems to support architecture performance and scalability
- KU5.** Develop expertise in developing technical roadmaps creating components and monitoring architecture quality using relevant metrics

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow rule based decision making processes
- GS2.** configure data and disseminate relevant information to others
- GS3.** analyze data and activities
- GS4.** apply problem-solving approaches in different situations
- GS5.** apply balanced judgments to different situations
- GS6.** check your work is complete and free from errors

SSC/N8159: Ensure compliance and ethical standards

Description

This NOS is about ensuring compliance and ethical standards

Scope

The scope covers the following :

- Assess Compliance with Regulations, Implement Ethical AI Practices, Risk Assessment, Stakeholder communications, Continuous monitoring

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Conduct reviews to ensure AI solutions comply with data protection laws and regulations
- PC2.** Develop and implement policies and procedures to support compliance efforts
- PC3.** Evaluate AI models and algorithms for bias, fairness, and transparency.
- PC4.** Establish guidelines for ethical AI usage and conduct regular audits to ensure adherence
- PC5.** Identify potential ethical and compliance risks associated with AI implementations.
- PC6.** Develop risk mitigation strategies to address compliance and ethical concerns.
- PC7.** Communicate compliance and ethical considerations to stakeholders clearly and effectively.
- PC8.** Provide training for team members on compliance requirements and ethical AI principles
- PC9.** Monitor changes in legal regulations and ethical standards related to AI
- PC10.** Modify practices and procedures to remain compliant with evolving guidelines

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand organizational policies and procedures for designing documenting and sharing solution architectures involving relevant stakeholders and using standard templates and tools
- KU2.** Learn about business requirements industry trends and governance standards including data security privacy and compliance considerations in solution design
- KU3.** Recognize the key elements of solution architecture such as business information application and technology layers and how to define and scale components effectively
- KU4.** Gain skills in utilizing various platforms cloud services networking hardware and operating systems while ensuring compliance, security, and ethical standards
- KU5.** Develop expertise in creating technical roadmaps monitoring architecture performance with quality metrics and ensuring solutions meet organizational and compliance requirements

Generic Skills (GS)

User/individual on the job needs to know how to:

SSC/N8160: Monitor and Evaluate AI-Solution Performance

Description

This NOS is about monitoring AI solution performance

Scope

The scope covers the following :

- Define Performance Metrics, Data analysis, Reporting and Recommendations, User Feedback Incorporation, Ongoing Improvement

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Establish key performance indicators (KPIs) to measure the effectiveness of AI solutions
- PC2.** Align metrics with business objectives to ensure relevance.
- PC3.** Conduct regular data analyses to evaluate the performance of AI systems
- PC4.** Utilize analytics tools to track and visualize performance trends over time
- PC5.** Compile reports detailing the performance of AI solutions, including successes and areas for improvement
- PC6.** Provide actionable recommendations based on performance evaluations to enhance system effectiveness
- PC7.** Gather feedback from end-users to assess the practical impact of AI solutions.
- PC8.** Incorporate user insights into future iterations or enhancements of AI architectures.
- PC9.** Identify opportunities for optimization based on performance data and feedback
- PC10.** Implement updates and enhancements to AI solutions to improve overall efficiency and effectiveness

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Follow organizational policies and guidelines for designing and documenting AI solution architectures involving relevant stakeholders and using standard templates and tools
- KU2.** Understand business requirements and industry standards to develop AI solutions that adhere to governance norms for data security privacy and monitoring
- KU3.** Identify the key elements of solution architecture including business information application and technology layers and define components to ensure performance and scalability
- KU4.** Utilize various platforms cloud services and hardware systems while ensuring ethical practices compliance and optimal performance of AI solutions
- KU5.** Monitor AI solution performance using quality metrics and continuously scale and improve architectures to meet organizational goals and performance standards

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e-mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Qualification Pack

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

The assessment shall be conducted through an online proctored format, incorporating scenario-based multiple-choice questions designed to effectively evaluate practical understanding and real-world application of concepts. Additionally, it will include a viva-voce and hands-on practical evaluation to comprehensively assess the individual's proficiency in specific learning outcomes.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
