Qualification Pack

SSC/Q8109: AI Database Administrator

Brief Job Description

This Qualification is designed to equip participants with essential knowledge and skills for effectively managing databases and computing clusters within various professional environments. Spanning multiple modules, this qualification covers foundational concepts in database management, including the installation and configuration of popular open-source database management systems such as MySQL and PostgreSQL, as well as hands-on experience with SQL commands for data manipulation. Participants will learn advanced topics including data validation, compliance frameworks, automated maintenance, and monitoring techniques to ensure optimal database performance. Furthermore, the qualification emphasizes user access management, security configurations, and the importance of documentation in operational continuity.

Personal Attributes

An AI - Database Administrator needs to be very organized with the ability to make crucial decisions. S/he needs to have an eagerness to learn newer concepts and an ability to work under pressure.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N8115: Create new databases](#)
2. [SSC/N8116: Maintain existing databases](#)
3. [SSC/N8117: Manage database access and configuration](#)
4. [SSC/N8118: Manage computer cluster administration](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

SSC/N8115: Create new databases

Description

This unit is about creating new databases for internal and external clients.

Scope

The scope covers the following :

- Define objective
- Install database

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Define and prioritize objectives based on business needs and database performance requirements
- PC2.** Identify and evaluate quality and reliability of suitable data sources
- PC3.** Specify storage requirements including scalability considerations and create new databases
- PC4.** import data from the identified sources into the database
- PC5.** create documentation on new databases for appropriate people

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the purpose and aims of the statistical analysis being undertaken
- KU2.** organizational policies, procedures and guidelines which relate to creating new databases
- KU3.** organizational policies and procedures for sharing data
- KU4.** organizational policies and procedures for documenting databases
- KU5.** who to involve when creating new databases
- KU6.** the range of standard templates and tools available and how to use them
- KU7.** different data sources and how to access documents and information from data sources
- KU8.** different databases, including: relational (MySQL, Oracle Database), NoSQL (Redis, MongoDB, Hbase, Cassandra, Amazon DynamoDB)
- KU9.** different functions to update or delete data from the databases such as CRUD (Create Read Update Delete)
- KU10.** different functions to import data into the databases
- KU11.** how to query and write scripts to acquire and understand the data
- KU12.** how to store and retrieve information
- KU13.** how to work on various operating systems such as linux, ubuntu, or windows

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

GS1. plan and organize your own work to achieve targets and deadlines

GS2. check your work is complete and free from errors

Qualification Pack

Assessment Criteria

SSC/N8116: Maintain existing databases

Description

This unit is about maintaining existing databases for internal and external clients.

Scope

The scope covers the following :

- Update and migrate databases
- Define maintenance procedures

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Collaborate with stakeholders to validate databases for compliance and performance
- PC2.** Modify and remove data from existing databases and implement archiving procedures for outdated information
- PC3.** Assist in the migration of existing databases to new environments, ensuring data integrity throughout the process
- PC4.** Implement automated database maintenance plans, backup routines, and monitoring tools to proactively identify issues
- PC5.** Perform both manual and scheduled maintenance procedures for backup, optimization, and indexing, including specific examples of each
- PC6.** Diagnose and resolve issues with database completeness and veracity, ensuring data integrity.
- PC7.** Conduct load or stress testing and user acceptance testing to ensure database reliability under pressure
- PC8.** Monitor ongoing and forecasted workloads and data storage consumption; develop reports for relevant stakeholders, including benchmarking against industry standards.
- PC9.** Oversee and regularly test the disaster recovery strategy for database environments to ensure effectiveness
- PC10.** create documentation on managed databases

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the purpose and aims of the statistical analysis being undertaken
- KU2.** organizational policies, procedures and guidelines which relate to maintaining existing database
- KU3.** organizational policies and procedures for sharing data
- KU4.** organizational policies and procedures for documenting databases
- KU5.** who to involve when maintaining existing databases

Qualification Pack

- KU6.** the range of standard templates and tools available and how to use them

SSC/N8117: Manage database access and configuration

Description

This unit is about managing access rules and configurations for databases for internal and external clients.

Scope

The scope covers the following :

- Enable user access
- Monitor capacity and performance

Elements and Performance Criteria

Enable user access

To be competent, the user/individual on the job must be able to:

- PC1.** define and test user access rules for databases
- PC2.** define encryption standards for the database
- PC3.** perform load/stress testing to ensure the database does not crash in a DDoS (Distributed Denial of Service) attack
- PC4.** ensure access to specific data and form of the data and provide deployment support to appropriate people using the databases

Monitor capacity and performance

To be competent, the user/individual on the job must be able to:

- PC5.** monitor ongoing and forecasted workloads and determine consumption of data storage and compute resources
- PC6.** monitor logs, server usage, and performance metrics to ensure functionality and accessibility
- PC7.** develop reports on database utilization, availability and performance metrics for relevant stakeholders
- PC8.** troubleshoot database utilization, availability and performance issues and remediate known impacting vulnerabilities
- PC9.** oversee the availability and disaster recovery strategy for the database environment

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational policies, procedures and guidelines which relate to managing database access and configuration
- KU2.** organizational policies and procedures for sharing data
- KU3.** who to involve when managing database access and configuration
- KU4.** the range of standard templates and tools available and how to use them
- KU5.** how to define user access by setting authentication rules such as encrypted passwords

Qualification Pack

- KU6.** how to define encryption standards for the database
- KU7.** how to perform load/stress testing on the database
- KU8.** different methodological approaches to manage capacity such as by monitoring filegroup sizes and growth rates
- KU9.** different capacity planning tools such as Oracle TablePack
- KU10.** how to identify database consumption and allocate storage and compute resources
- KU11.** how to troubleshoot and resolve database issues such as compilation errors, incorrect records, slow performance
- KU12.** different tools to repair or recover data from corrupted databases
- KU13.** how to store and retrieve information
- KU14.** how to identify and refer anomalies
- KU15.** how to work on various operating systems such as linux, ubuntu, or windows

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** make decisions on suitable courses
- GS2.** plan and organize your own work to achieve targets and deadlines
- GS3.** refer anomalies to the supervisor
- GS4.** check your work is complete and free from errors

Qualification Pack

SSC/N8118: Manage computer cluster administration

Description

This unit is about managing access rules and configurations for computing clusters for internal and external clients.

Scope

The scope covers the following :

- Manage cluster deployment
- Monitor capacity and performance

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Define, deploy, and manage clusters, including setup configurations and maintenance of redundancy and failover strategies
- PC2.** Evaluate cluster requirements through capacity planning to ensure scalability
- PC3.** Monitor cluster connectivity and performance, recommending efficiencies, and utilize advanced analytics or machine learning for predictive insights
- PC4.** Administer cluster access for appropriate users and manage permissions effectively
- PC5.** Create and validate documentation specific to computing clusters

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** your organizations policies, procedures and guidelines which relate to managing cluster administration
- KU2.** your organizations policies and procedures for sharing data
- KU3.** your organization's policies and procedures for documenting computing clusters
- KU4.** who to involve when managing cluster administration
- KU5.** the range of standard templates and tools available and how to use them
- KU6.** different capacity planning considerations such as data redundancy, overhead and compression, IOPS (Input/Output Operations per Second)
- KU7.** different applications that provide computing clusters such as Cloudera, Hortonworks
- KU8.** different cluster monitoring tools such as kubernetes, swarm, mesos
- KU9.** different ways to deploy and manage clusters based on business requirements
- KU10.** how to manually setup cluster configurations
- KU11.** how to define encryption standards for data stored on the cluster
- KU12.** different metrics to monitor cluster connectivity and performance
- KU13.** how to troubleshoot issues with clusters

Qualification Pack

- KU14.** different cloud or distributed computing platforms such as AWS, Azure, Hadoop, their affiliated services and how to use these
- KU15.** how to store and retrieve information
- KU16.** how to identify and refer anomalies
- KU17.** how to work on various operating systems such as linux, ubuntu or windows

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** make decisions on suitable courses
- GS2.** plan and organize your own work to achieve targets and deadlines
- GS3.** refer anomalies to the supervisor
- GS4.** check your work is complete and free from errors

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

The assessment will consist of a blend of hands-on practical evaluations, viva-voce, and online proctored scenario-based multiple-choice questions ensuring a thorough evaluation of the individual's proficiency in learning outcomes, practical understanding, and real-world application of concepts.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
