SSC/Q8120: Data Annotator

Brief Job Description

Individuals at this job are responsible for data annotation and being able to classify the data they are provided with. They assess the information from various sources like videos, advertisements, photographs, and other types of material and then attach tags to the content. They will need to inculcate strong work ethic, maintain a healthy working environment, and provide data and information in standard formats.

Personal Attributes

Data Annotator is required to inculcate strong work ethic, maintain a healthy working environment, and provide data and information in standard formats.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N8135: Identify, tag, and label distinct elements in huge datasets](#)
2. [SSC/N8136: Carry-out effective validation activities and tests on annotated data for better accuracy](#)
3. [SSC/N8137: Review, document and report annotations created on a regular interval](#)
4. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

SSC/N8135: Identify, tag, and label distinct elements in huge datasets

Description

This unit is about analyzing and classifying different elements of the datasets using relevant annotation tools and techniques depending on the project.

Scope

The scope covers the following :

- Requirements Gathering
- Data Curation
- Analysis & Categorization
- Data tagging and labelling
- Handling ambiguities
- Software utilization
- Quality Control
- Regulations and Compliance

Elements and Performance Criteria

Requirements Gathering

To be competent, the user/individual on the job must be able to:

- PC1.** interact with data science and engineering teams to contribute to overall project development
- PC2.** evaluate business contexts and identify the true definition of the data being annotated for specific use cases

Data Curation

To be competent, the user/individual on the job must be able to:

- PC3.** identify the primary types of already determined data, relevant to the project (text, audio, image, and video)
- PC4.** search for data sources and data sets according to a defined keyword
- PC5.** garner the pre-processed data after data cleaning and profiling from the data science team

Analysis & Categorization

To be competent, the user/individual on the job must be able to:

- PC6.** identify data sensitivities (PHI, PII, etc.) for masked and encrypted data
- PC7.** classify the different data elements as sentiments, semantics, intent, and named entities

Data tagging and labelling

To be competent, the user/individual on the job must be able to:

- PC8.** recognize relevant annotation methods based on the data types, elements, ML algorithms being used, the business case and its expected outcomes
- PC9.** identify and analyze the domain vocabulary, language, format, and category of data intended to be used
- PC10.** label the data accordingly as per the type of annotation and output required

Qualification Pack

PC11. ensure proper organization and formatting of the training data

Handling ambiguities

To be competent, the user/individual on the job must be able to:

PC12. Address uncertain cases where it may be unclear how to annotate certain elements, often requiring consultation with supervisors or reference to more comprehensive guidelines.

Software utilization

To be competent, the user/individual on the job must be able to:

PC13. Use specialized annotation tools and software to perform tagging and labeling efficiently

Quality Control

To be competent, the user/individual on the job must be able to:

PC14. Ensure accuracy in labeling by reviewing annotations and performing checks to ensure consistency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational policies, procedures, and guidelines that relate to labeling and sharing datasets
- KU2.** organizational policies, procedures, and guidelines for documentation and cross-functional collaboration
- KU3.** data governance policies and operations which help maintain the data quality and standardization
- KU4.** different data sources, formats, and how to access documents and information from data sources
- KU5.** which stakeholders to involve when defining the data ontologies and metadata
- KU6.** the range of standard tools and templates available and how to use them
- KU7.** basic familiarity with Machine Learning and AI paradigms such as text classification, entity recognition, information retrieval
- KU8.** knowledge of business contexts and use case outcomes to characterize and define the annotations
- KU9.** decent computer literacy and experience
- KU10.** basic knowledge on running SQL and R queries
- KU11.** knowledge of different types of data annotations and labeling techniques/models
- KU12.** knowledge of dialog models/conversational analysis
- KU13.** familiarity with analyzing and organizing different data types with annotations
- KU14.** saving, exporting, and keeping track of annotations in a data repository
- KU15.** knowledge of common output label formats
- KU16.** knowledge of different software tools and platforms used in the annotation
- KU17.** proficiency in creating spreadsheets

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** ask for clarification and advice from appropriate people
- GS2.** listen effectively and orally communicate information accurately
- GS3.** create accurate and well-written documents/reports
- GS4.** plan and organize the work to achieve targets and deadlines
- GS5.** analyze data and understand its implications on business
- GS6.** adapt and react to changing priorities quickly and efficiently
- GS7.** apply balanced judgments and intuition to different situations
- GS8.** high attention to detail coupled with the ability to see the big picture
- GS9.** check your work is complete and free from errors
- GS10.** contribute to the quality of teamwork
- GS11.** work independently and collaboratively
- GS12.** understand and implement feedback effectively

Qualification Pack

SSC/N8136: Carry-out effective validation activities and tests on annotated data for better accuracy

Description

This unit is about performing quality checks to maintain data integrity, security and standardization in the annotations.

Scope

The scope covers the following :

- Establishing validation criterion
- Review Annotation quality
- Corrective Actions & Feedback

Elements and Performance Criteria

Corrective Actions & Feedback

To be competent, the user/individual on the job must be able to:

- PC1.** Develop detailed documentation that outlines how to annotate various elements, including examples and edge cases.
- PC2.** Define the metrics such as precision, recall, and F1-score that help evaluate the quality of the annotations.

Review Annotation quality

To be competent, the user/individual on the job must be able to:

- PC3.** Randomly selecting samples of annotated data and reviewing them against the established guidelines to check for accuracy.
- PC4.** Ensure that annotations are consistent across similar instances. For example, if two annotators label similar images differently, this inconsistency needs to be addressed.
- PC5.** Employ and follow pre-defined methods to ensure accuracy of annotation models and techniques
- PC6.** Review the annotated data and conduct periodic validations adhering to all the required standards
- PC7.** Apply or execute cross-checking mechanisms to ensure wrongful labelling is not performed
- PC8.** Adhere to the defined data quality standards to secure the ground data and annotated data from corruption and leakage

Corrective Actions & Feedback

To be competent, the user/individual on the job must be able to:

- PC9.** Provide inputs to data engineers on tooling and processes for more efficient labeling, and to improve data quality
- PC10.** Execute methods to identify misclassified content
- PC11.** Suggest changes in annotation schemes if and when required
- PC12.** Help create open-source datasets with the right annotation for an unbiased evaluation of annotation models

Qualification Pack

- PC13.** Recommend improvements to annotation tools or workflows to enhance efficiency and accuracy
- PC14.** Assist in evaluating new data annotation platforms or toolkits, ensuring they align with the project's technical requirements and annotation standards

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational policies, procedures, and guidelines that relate to labeling and sharing datasets
- KU2.** organizational policies, procedures, and guidelines for documentation and cross-functional collaboration
- KU3.** data governance policies and operations which help maintain the data quality and standardization
- KU4.** different data sources, formats, and how to access documents and information from data sources
- KU5.** which stakeholders to involve when defining the data ontologies and metadata

SSC/N8137: Review, document and report annotations created on a regular interval

Description

This unit is about documenting and keeping track of all the logs and changes to the annotations to relate to the primary source datasets.

Scope

The scope covers the following :

- Data Management
- Issue Tracking & Reporting

Elements and Performance Criteria

Data Management

To be competent, the user/individual on the job must be able to:

- PC1.** maintain documentation of all solved/unsolved issues and errors
- PC2.** help build data ontology to provide the model with as accurate annotated data as possible
- PC3.** ensure the existence and maintenance of a balanced dataset to keep track and logs of data sets
- PC4.** provide the linkage between the metadata and the annotations to depict the data association

Issue Tracking & Reporting

To be competent, the user/individual on the job must be able to:

- PC5.** obtain real-time feedback and issue tracking during annotation process
- PC6.** provide timely summarization and reporting, as per the defined templates on annotated data

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational policies, procedures, and guidelines that relate to labeling and sharing datasets
- KU2.** organizational policies, procedures, and guidelines for documentation and cross-functional collaboration
- KU3.** data governance policies and operations which help maintain the data quality and standardization

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
