Qualification Pack

SSC/Q8307: Cloud Site Reliability Analyst

Brief Job Description

A Cloud Site Reliability Analyst is responsible for ensuring high availability, scalability, and performance of cloud-based infrastructure by leveraging automation, observability, and continuous improvement practices. The individual proactively manage incidents, define SLIs/SLOs, integrate modern DevOps tools, and contribute to platform resilience using techniques such as chaos engineering and infrastructure as code.

Personal Attributes

They must possess strong communication skills and interpersonal skills to build relationships. They must showcase a zeal to learn new things to develop their knowledge and analytical abilities.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N8331: Manage and Maintain Critical Customer-Facing Cloud Services](#)
2. [SSC/N8330: Automate Cloud Operations and Optimize System Performance](#)
3. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

SSC/N8331: Manage and Maintain Critical Customer-Facing Cloud Services

Description

This unit is about monitoring and maintaining mission-critical, customer-facing services and infrastructure, ensuring high availability, reliability, and performance in line with organizational Service Level Objectives (SLOs). It also includes troubleshooting, providing technical support, and contributing to incident management and resolution.

Scope

The scope covers the following :

- Monitor systems and ensure availability
- Define and track SLIs/SLOs
- Diagnose issues and provide technical support
- Implement observability and automation
- Lead post-incident reviews and improvements
- Communicate incident status and manage stakeholder expectations

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** continuously monitor infrastructure, applications, and cloud-native services using observability tools (e.g., Prometheus, Grafana, Datadog, Cloud Watch)
- PC2.** monitor and analyze logs, events, and metrics to proactively detect performance bottlenecks and anomalies
- PC3.** identify and report unauthorized access attempts and potential security breaches
- PC4.** manage authentication, authorization, and role-based access control (RBAC) across systems
- PC5.** escalate critical alerts, incidents, and service degradation issues to relevant stakeholders as per SLAs
- PC6.** define meaningful SLIs and SLOs based on product and service expectations
- PC7.** track error budgets and report on reliability trends
- PC8.** conduct root cause analysis (RCA) of system failures using log analysis, monitoring dashboards, and post-mortems
- PC9.** participate in on-call rotations and assist with service recovery during outages
- PC10.** document incident handling using standard templates and knowledge base
- PC11.** contribute to the improvement of runbooks, SOPs, and incident response procedures
- PC12.** coordinate with development, QA, and infrastructure teams to ensure resolution and prevention of recurring issues
- PC13.** integrate observability tools (e.g., ELK stack, Datadog, Prometheus) into cloud infrastructure
- PC14.** use telemetry data (logs, metrics, traces) to support diagnostics and performance improvement
- PC15.** develop automated scripts and workflows for alerting, remediation, and escalation
- PC16.** conduct root cause analysis and create post-incident review reports

Qualification Pack

- PC17.** facilitate blameless retrospectives and recommend system reliability enhancements
- PC18.** draft and publish incident communications and status updates using incident communication tools (e.g., StatusPage)
- PC19.** provide reliability insights to engineering/product teams for continuous improvement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the organizational policies for incident, change, and problem management (e.g., ITIL/DevOps models)
- KU2.** the communication protocols and escalation matrix for incident response
- KU3.** the documentation standards for incident logs, RCA, and operational runbooks
- KU4.** common monitoring, logging, and observability tools and platforms (e.g., ELK stack, Fluentd, Cloud-native solutions)
- KU5.** concepts of availability, latency, performance, and SLO/SLIs
- KU6.** the techniques for alert tuning, anomaly detection, and fault tolerance
- KU7.** the fundamentals of cloud security IAM, encryption, audit trails
- KU8.** the basics of CI/CD pipelines and deployment automation
- KU9.** the use of version control (e.g., Git) for runbook and config documentation
- KU10.** the basics of using containers (like Docker)
- KU11.** how the tools like Kubernetes help manage and run these containers efficiently

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** how the tools like Kubernetes help manage and run these containers efficiently
- GS2.** interpret and follow documentation, code comments, and deployment guidelines
- GS3.** work independently and manage tasks within collaborative teams
- GS4.** analyze situations and make informed decisions under tight timelines
- GS5.** identify and solve technical issues quickly and efficiently
- GS6.** coordinate with cross-functional teams to ensure a smooth deployment process
- GS7.** plan and prioritize work effectively to meet release deadlines
- GS8.** document deployment processes and maintain logs for future reference
- GS9.** evaluate risks and follow contingency plans where needed
- GS10.** adapt to new technologies and tools relevant to system reliability

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
	30	50	-	20
PC1. continuously monitor infrastructure, applications, and cloud-native services using observability tools (e.g., Prometheus, Grafana, Datadog, Cloud Watch)	1	4	-	1
PC2. monitor and analyze logs, events, and metrics to proactively detect performance bottlenecks and anomalies	1	3	-	1
PC3. identify and report unauthorized access attempts and potential security breaches	2	1	-	1
PC4. manage authentication, authorization, and role-based access control (RBAC) across systems	2	2	-	1
PC5. escalate critical alerts, incidents, and service degradation issues to relevant stakeholders as per SLAs	1	1	-	1
PC6. define meaningful SLIs and SLOs based on product and service expectations	3	4	-	1
PC7. track error budgets and report on reliability trends	1	2	-	2
PC8. conduct root cause analysis (RCA) of system failures using log analysis, monitoring dashboards, and post-mortems	2	3	-	1
PC9. participate in on-call rotations and assist with service recovery during outages	1	2	-	1
PC10. document incident handling using standard templates and knowledge base	2	1	-	1
PC11. contribute to the improvement of runbooks, SOPs, and incident response procedures	3	4	-	1
PC12. coordinate with development, QA, and infrastructure teams to ensure resolution and prevention of recurring issues	1	2	-	1

SSC/N8330: Automate Cloud Operations and Optimize System Performance

Description

This unit is about ensuring high availability, scalability, and performance of cloud-based systems by implementing automated provisioning, monitoring, and incident response mechanisms. It also includes creating and maintaining runbooks, defining system KPIs, and driving continuous improvement in system reliability

Scope

The scope covers the following :

- Ensure performance and availability
- Monitor and maintain deployed systems
- Drive incident management

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** evaluate the health of deployed cloud services to ensure availability and reliability
- PC2.** automate provisioning and scaling of compute, storage, and networking resources using infrastructure-as-code (IaC) tools (e.g., Terraform, CloudFormation)
- PC3.** participate in the change management process to ensure minimal disruption to services
- PC4.** coordinate and validate software, hardware, and network upgrades or patches to avoid downtime
- PC5.** recommend and implement performance tuning and resource rightsizing based on usage patterns
- PC6.** design and implement a monitoring strategy for system performance and availability
- PC7.** define and track key performance indicators (KPIs) and system metrics using monitoring tools (e.g., Prometheus, CloudWatch, Datadog)
- PC8.** analyze and interpret logs and metrics to assess system performance and usage trends
- PC9.** create and update operational runbooks to document standard procedures
- PC10.** develop scripts and automation workflows to implement runbook steps programmatically
- PC11.** evaluate and integrate appropriate tools for automation and monitoring from a cost and functionality perspective
- PC12.** configure safeguards and automation rules to detect anomalies and trigger alerts
- PC13.** execute disaster recovery protocols to restore services after system failures
- PC14.** recommend and implement corrective and preventive actions based on incident trends and root cause analysis
- PC15.** Preventive Measures Based on Incident Analysis
- PC16.** monitor resource usage and identify opportunities for cost reduction (e.g., reserved instances, autoscaling)

Qualification Pack

PC17. analyze cloud billing reports and recommend cost optimization strategies

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies and procedures for change, incident, and disaster recovery management
- KU2.** how to collaborate with teams to document and maintain operational runbooks
- KU3.** the tools and templates used for infrastructure automation and monitoring
- KU4.** how to use Infrastructure as Code (IaC) tools (e.g., Terraform, Ansible, CloudFormation)
- KU5.** the best practices for ensuring high availability, fault tolerance, and performance optimization
- KU6.** how to define system metrics, SLOs/SLIs, and alerts for proactive system monitoring
- KU7.** how to use log analysis tools (e.g., ELK Stack, Cloud Logging) for performance and issue tracking
- KU8.** automation of operational procedures using scripting languages (e.g., Python, Bash, PowerShell)
- KU9.** automation of operational procedures using scripting languages (e.g., Python, Bash, PowerShell)
- KU10.** automation of operational procedures using scripting languages (e.g., Python, Bash, PowerShell)
- KU11.** how to define thresholds for different systems parameters to trigger automated system responses
- KU12.** automation of operational procedures using scripting languages (e.g., Python, Bash, PowerShell)
- KU13.** automation of operational procedures using scripting languages (e.g., Python, Bash, PowerShell)
- KU14.** automation of operational procedures using scripting languages (e.g., Python, Bash, PowerShell)

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate technical information clearly and accurately to team members and stakeholders
- GS2.** interpret and follow documentation, code comments, and deployment guidelines
- GS3.** work independently and manage tasks within collaborative teams
- GS4.** analyze situations and make informed decisions under tight timelines
- GS5.** identify and solve technical issues quickly and efficiently
- GS6.** coordinate with cross-functional teams to ensure a smooth deployment process
- GS7.** plan and prioritize work effectively to meet release deadlines
- GS8.** document deployment processes and maintain logs for future reference
- GS9.** evaluate risks and follow contingency plans where needed

Qualification Pack

GS10. adapt to new technologies and tools relevant to cloud deployment and automation

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
