SSC/Q8401: Product Manager - Web & Mobile

Brief Job Description

A Product Manager Web and Mobile is responsible for overseeing the full development lifecycle of web and mobile solutions. The role involves creating detailed use cases, aligning business requirements, and understanding customer needs. The individual also shapes the go-to-market strategies and drives customer engagement and retention initiatives to ensure the success of the product

Personal Attributes

Individuals in this role must manage and collaborate with various stakeholders involved in the development of Web or Mobile based solutions. They must lead team members and manage team performance to achieve project success.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N8401: Define product/solution strategy and oversee development lifecycle](#)
2. [SSC/N8127: Collect and define business requirements through client interaction](#)
3. [SSC/N8402: Finalize the MVP \(Minimum Viable Product\) based on the defined business requirements](#)
4. [SSC/N8403: Define KPIs to monitor software performance, adoption, usability, and conversion](#)
5. [SSC/N8404: Define a go-to-market strategy for the product/solution](#)
6. [SSC/N8405: Define a customer engagement and retention strategy](#)
7. [SSC/N8406: Create and execute a project charter and monitor the project KPIs](#)
8. [SSC/N9011: Manage team performance to achieve project goals](#)
9. [SSC/N8452: Optimize Revenue, Security, and Accessibility in Web and Mobile Products](#)
10. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

SSC/N8401: Define product/solution strategy and oversee development lifecycle

Description

This unit is about creating a product/solution strategy for developing applications for web-based or mobile-based platforms.

Scope

The scope covers the following :

- Product/Solution research
- Product/solution strategy

Elements and Performance Criteria

Product/Solution research

To be competent, the user/individual on the job must be able to:

- PC1.** evaluate the customer experience journey to identify and document key interaction points and areas for improvement
- PC2.** conduct in-depth research on the competitive landscape, assessing competitors' products and offerings to identify strengths, weaknesses, and opportunities
- PC3.** collaborate with cross-functional teams to define and propose solutions that address identified customer needs, ensuring alignment with business goals
- PC4.** formulate a product differentiation and market positioning strategy by analyzing market trends and customer segments, presenting at least two unique value propositions
- PC5.** select the appropriate platforms, regions, and languages for the application/solution based on market research and target audience analysis
- PC6.** analyze market demand and customer feedback to identify and prioritize at least three key product features
- PC7.** apply roadmap creation tools and prioritization techniques, such as MoSCoW and the Kano Model, to develop and present a clear product roadmap
- PC8.** utilize prototyping and wireframing tools to visualize at least two early-stage product features for stakeholder review
- PC9.** perform competitor product analysis by evaluating features, pricing, and user feedback to support product differentiation strategy decisions

Product/Solution Strategy

To be competent, the user/individual on the job must be able to:

- PC10.** determine the type of application/solution (e.g., web, native, hybrid, cross-platform) by analyzing project requirements and customer needs, and justify the selection with documented reasoning
- PC11.** develop a detailed product development roadmap, outlining key milestones, timelines, and dependencies for each phase of the project

Qualification Pack

- PC12.** estimate and allocate the resources and budget required for the development of the application/solution, ensuring alignment with organizational goals
- PC13.** plan and implement A/B testing for selected product features to validate hypotheses and improve user experience, documenting test results and outcomes
- PC14.** perform an impact analysis of new products and features by assessing market reception, customer feedback, and performance metrics within a specified timeframe
- PC15.** define and document revenue-generation strategies or business value realization methods for the proposed solution, considering multiple monetization options
- PC16.** assess the feasibility of the proposed application/solution through prototyping, cost analysis, and resource availability, presenting findings to stakeholders
- PC17.** communicate the conceptualized solution clearly to relevant stakeholders, cross-functional teams, and decision-makers, using structured presentations and documentation

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the policies, procedures, and guidelines related to developing roadmaps for products/services
- KU2.** different product development life cycles (e.g., Waterfall, Agile, Lean) and their applicability
- KU3.** different data sources and how to access documents and information from data sources
- KU4.** the techniques for identifying and evaluating product features based on market demand and customer feedback
- KU5.** the policies and procedures for documenting roadmaps and collecting business requirements
- KU6.** the tools for roadmap creation and prioritization techniques (e.g. MoSCoW, Kano Model) and feature scoping
- KU7.** the use of prototyping and wireframing tools for visualizing early product features
- KU8.** the competitor product analysis techniques to inform product differentiation strategy
- KU9.** how to analyze and benchmark products and offerings of competitors
- KU10.** how to define and evaluate business requirements
- KU11.** how to analyze the impact of new products and features
- KU12.** how to develop product roadmaps
- KU13.** how to identify and establish product metrics/KPIs
- KU14.** how to analyze product metrics and trends
- KU15.** how to monitor product development activities
- KU16.** Generative AI (Gen AI) and its applications
- KU17.** the use cases of Gen AI for product managers (e.g. project planning automation, user story generation)
- KU18.** prompt engineering techniques in Gen AI for defining prompts to generate relevant results

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** Undertake architecture related decisions on business and organization
- GS2.** analyze business impact and disseminate relevant information to others
- GS3.** Analyse data and understand its implications on business
- GS4.** Conduct impact analysis of the various actions performed and disseminating relevant information to others
- GS5.** Apply good attention to detail
- GS6.** Apply problem-solving approaches in different situations
- GS7.** Plan and organize the work to achieve targets and deadlines
- GS8.** Work independently and collaboratively

Qualification Pack

SSC/N8127: Collect and define business requirements through client interaction

Description

This unit is about identifying the requirements of internal and external clients.

Scope

The scope covers the following :

- Determine the requirements
- Define the requirements
- Establish key success metrics

Elements and Performance Criteria

Determine the requirements

To be competent, the user/individual on the job must be able to:

- PC1.** assess the client's current business operations, identifying key processes, workflows, and pain points
- PC2.** evaluate the client's technical capabilities, systems, and resources to ensure feasibility and alignment with project goals
- PC3.** conduct business contextual discussions with the client to gather detailed insights into business objectives and needs, ensuring a clear understanding of requirements
- PC4.** utilize tools and techniques such as user story mapping and affinity diagrams to structure and prioritize requirements, ensuring comprehensive coverage of client needs
- PC5.** create user personas to represent the different end-users of the system, enhancing the understanding of client requirements and guiding the development process

Define the requirements

To be competent, the user/individual on the job must be able to:

- PC6.** evaluate and clearly define the client's business and technical requirements, ensuring they are specific, measurable, and aligned with project goals
- PC7.** evaluate and clearly define the client's business and technical requirements, ensuring they are specific, measurable, and aligned with project goals
- PC8.** document the requirements comprehensively, using templates and standardized formats for consistency and clarity
- PC9.** validate the requirements with internal and external stakeholders, ensuring alignment and addressing any discrepancies
- PC10.** reinforce Agile methodology by breaking down requirements into actionable user stories or tasks for iterative development and continuous feedback

Establish key success metrics

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC11.** identify key success metrics using methodologies like (Plan, Organize, Monitor, Assess) and OGSM (Objectives, Goals, Strategies, Measures), ensuring they are relevant to the project's objectives and measurable in software development
- PC12.** define and apply success metrics during development phases to track performance, ensuring continuous assessment and improvement of the solution

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the process for requirements gathering, documentation, and validation
- KU2.** Agile methodologies and their reinforcement in gathering, defining, and managing requirements in iterative cycles
- KU3.** the tools and techniques for requirements gathering such as user story mapping and affinity diagrams
- KU4.** the guidelines for creating user personas to better understand client needs and guide development decisions
- KU5.** how to define key success metrics using methodologies like POMA and OGSM in software development
- KU6.** how to apply and monitor success metrics during the product lifecycle to ensure alignment with business goals

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow instructions, guidelines, procedures, and service-level agreements
- GS2.** collaborate effectively in a team environment
- GS3.** produce accurate, detailed work with attention to precision
- GS4.** assess business impact and share relevant information
- GS5.** analyze data and understand its implications for business outcomes
- GS6.** communicate important information clearly and efficiently
- GS7.** ensure work is thorough, complete, and error-free
- GS8.** apply balanced judgment to various situations
- GS9.** provide detailed, constructive feedback on work
- GS10.** verify that work meets customer requirements
- GS11.** deliver consistent and dependable customer service
- GS12.** make decisions based on rule-based processes
- GS13.** choose appropriate courses of action when making decisions
- GS14.** plan and organize tasks to meet targets and deadlines

SSC/N8402: Finalize the MVP (Minimum Viable Product) based on the defined business requirements

Description

This unit is about developing Minimum Viable Product (MVP) for different types of business requirements

Scope

The scope covers the following :

- MVP research
- MVP strategy
- MVP development strategy
- MVP feedback and iteration

Elements and Performance Criteria

MVP Research

To be competent, the user/individual on the job must be able to:

- PC1.** conduct customer research and surveys to identify at least three major pain points or problems faced by the target audience
- PC2.** propose solutions to address identified customer problems, ensuring they are feasible and align with business objectives
- PC3.** collect and analyze feedback from customers on proposed solutions to refine the problem-solving approach

MVP Strategy

To be competent, the user/individual on the job must be able to:

- PC4.** set the design process and map out the user flow for the MVP, ensuring it is streamlined for ease of use
- PC5.** identify and prioritize essential features for the MVP using the MoSCoW method, focusing on "Must have" and "Should have" features for initial development
- PC6.** implement strategies for iterative testing and refinement of the MVP, incorporating feedback loops to improve functionality

MVP development strategy

To be competent, the user/individual on the job must be able to:

- PC7.** develop a detailed project plan with clear milestones, responsibilities, and timelines for delivering the MVP
- PC8.** define and allocate the necessary budget and resources for MVP development, ensuring they are in line with project goals
- PC9.** collaborate with cross-functional teams, including design, development, and marketing, to ensure seamless MVP development and alignment with customer needs
- PC10.** conduct usability testing and A/B testing to validate design and feature choices, ensuring the MVP meets user expectations

MVP feedback and iteration

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC11.** release the MVP to early users and gather actionable feedback to evaluate the initial product performance and user satisfaction
- PC12.** incorporate early feedback into the MVP by refining or adding features, ensuring iterative improvements based on user insights
- PC13.** apply best practices in usability testing and continuous A/B testing to optimize MVP performance and user experience across multiple iterations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the procedure for MVP development, including guidelines and roadmaps for products/services
- KU2.** the feature prioritization techniques, such as the MoSCoW method, to decide essential features for MVPs, in line with organizational policies for developing MVPs
- KU3.** the strategies for iterative testing and refinement, incorporating continuous feedback and aligning with organizational procedures for business requirements collection
- KU4.** the best practices for usability and A/B testing to validate design and feature effectiveness, as well as how to analyze and benchmark products and offerings of competitors
- KU5.** the tools and methodologies for gathering and analyzing customer feedback on MVPs, and the relevant data sources and documents
- KU6.** how to involve the relevant stakeholders while collecting business requirements and bringing concepts into production
- KU7.** the range of standard tools and frameworks available and how to use them to develop MVPs, as well as product metrics and KPIs
- KU8.** how to define and evaluate business requirements, and how new products/features impact the business
- KU9.** the process of developing product roadmaps, monitoring development activities, and analyzing product metrics and trends

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** make architecture-related decisions that impact business and organization
- GS2.** assess business impact and share relevant information effectively
- GS3.** analyze data and understand its implications on business outcomes
- GS4.** conduct impact analysis of actions and communicate insights appropriately
- GS5.** demonstrate attention to detail in work tasks
- GS6.** apply problem-solving techniques across different situations
- GS7.** plan and organize work to meet targets and deadlines
- GS8.** work both independently and collaboratively as needed

SSC/N8403: Define KPIs to monitor software performance, adoption, usability, and conversion

Description

This unit is about developing KPIs to monitor the performance, adoption, usability and conversion of the software product/solution

Scope

The scope covers the following :

- Establish business goals
- Define and monitor KPIs
- Report and communicate data
- Collect and implement feedback

Elements and Performance Criteria

Establish business goals

To be competent, the user/individual on the job must be able to:

- PC1.** establish specific, measurable, achievable, relevant, and time-bound (SMART) business goals for the product or solution, ensuring they align with overall organizational objectives

Define and monitor KPIs

To be competent, the user/individual on the job must be able to:

- PC2.** gather relevant data and define KPIs using advanced techniques such as cohort analysis and funnel analysis to monitor product performance
- PC3.** set SMART KPIs that accurately reflect the goals of the product and measure progress in areas such as user adoption, retention, and conversion

Reporting

To be competent, the user/individual on the job must be able to:

- PC4.** create a structured reporting system to track and document product usage and performance, using data visualization tools such as dashboards to present findings clearly
- PC5.** share regular, data-driven reports on product performance with relevant stakeholders, ensuring insights are actionable and easy to understand through effective visualization techniques

Collect and implement feedback

To be competent, the user/individual on the job must be able to:

- PC6.** develop a feedback loop that continuously collects insights on product performance, usability, and adoption, using both quantitative and qualitative methods
- PC7.** implement changes based on feedback, ensuring timely adjustments to product features or strategy, and report on the impact of these changes in subsequent feedback cycles

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** the process of defining and monitoring KPIs aligned with business goals using techniques like cohort and funnel analysis, following organizational policies for software utilization
- KU2.** the methods to set SMART goals for KPIs, tailored to business objectives and documented per organizational guidelines for data sharing and reporting
- KU3.** use of data visualization tools (e.g., Power BI, Tableau, Google Data Studio) to communicate product performance metrics effectively
- KU4.** the importance of developing continuous feedback loops, to incorporate user and performance data for product improvements in line with organizational policies for performance monitoring
- KU5.** the process of utilizing standard tools and templates to define KPIs and monitor software performance and utilization, ensuring compliance with organizational policies
- KU6.** deployment schemas for software products and using standard tools to track resource utilization and performance
- KU7.** reporting software usage and performance, involving relevant stakeholders per organizational guidelines

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow instructions, guidelines, procedures, and service-level agreements
- GS2.** collaborate effectively in a team environment
- GS3.** produce accurate, detailed work with attention to precision
- GS4.** assess business impact and share relevant information
- GS5.** analyze data and understand its implications for business outcomes
- GS6.** communicate important information clearly and efficiently
- GS7.** ensure work is thorough, complete, and error-free
- GS8.** apply balanced judgment to various situations
- GS9.** provide detailed, constructive feedback on work
- GS10.** verify that work meets customer requirements
- GS11.** deliver consistent and dependable customer service
- GS12.** make decisions based on rule-based processes
- GS13.** choose appropriate courses of action when making decisions
- GS14.** plan and organize tasks to meet targets and deadlines

Qualification Pack

SSC/N8404: Define a go-to-market strategy for the product/solution

Description

This unit is about formulating a go-to-market strategy for any software product/solution

Scope

The scope covers the following :

- Competitive analysis
- Demand analysis
- Product strategy

Elements and Performance Criteria

Competitive analysis

To be competent, the user/individual on the job must be able to:

- PC1.** identify competitors and similar product/solution providers in the market using tools like SWOT analysis and Porter's Five Forces
- PC2.** assess competitor strengths, weaknesses, and market position to uncover new opportunities and underserved areas in the market

Demand analysis

To be competent, the user/individual on the job must be able to:

- PC3.** determine market demand for similar products/solutions by analyzing trends and customer preferences
- PC4.** leverage analytics tools to gather and analyze customer data, identifying buying patterns and demand shifts in the market

Product strategy

To be competent, the user/individual on the job must be able to:

- PC5.** define and offer a solution/product tailored to customer needs, ensuring it aligns with market trend
- PC6.** establish profit margins based on pricing analysis and cost considerations
- PC7.** create and implement strategic plans to identify and reach potential customers through targeted marketing efforts
- PC8.** use benchmarks and KPIs to develop forecasts for future market opportunities and growth potential

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the procedures and guidelines for developing client and go-to-market (GTM) strategies
- KU2.** different data sources and how to access relevant documents and market information from these sources

Qualification Pack

- KU3.** how to document client roadmaps, customer acquisition strategies, pricing analysis, and marketing plans in accordance with organizational policies
- KU4.** key stakeholders to be involved when developing GTM strategies, conducting pricing analysis, identifying target markets, and evaluating business revenue streams
- KU5.** the tools for conducting competitive analysis, such as SWOT analysis and Porters Five Forces, and how to apply them effectively
- KU6.** digital marketing strategies, including content marketing, SEO, and social media outreach
- KU7.** strategies for market segmentation and positioning using frameworks like Segmenting, Targeting, Positioning (STP)
- KU8.** how to forecast demand for products and services using analytics and market research
- KU9.** how to define KPIs and set benchmarks to measure success and business growth
- KU10.** how to gather and analyze competitive intelligence to inform strategic decisions
- KU11.** how to develop pricing models and conduct pricing analysis to ensure competitive positioning
- KU12.** how to leverage customer analytics to make data-driven decisions and optimize product offerings

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** assess business impact and share relevant information effectively
- GS2.** analyze data and understand its business implications
- GS3.** communicate important information clearly and efficiently
- GS4.** produce accurate, well-written work with attention to detail
- GS5.** contribute to effective team collaboration
- GS6.** deliver consistent and reliable customer service
- GS7.** make informed decisions on appropriate courses of action

SSC/N8405: Define a customer engagement and retention strategy

Description

This unit is about formulating a strategy to engage and retain customers of the software product/solution

Scope

The scope covers the following :

- Customer engagement & retention strategy
- Customer insights

Elements and Performance Criteria

Customer engagement and retention strategy

To be competent, the user/individual on the job must be able to:

- PC1.** define customer engagement goals and objectives, aligning them with business outcomes
- PC2.** segment customers using cohort analysis and experiment with different product/solution versions to determine the most effective approach
- PC3.** develop a customer on-boarding strategy and user training manual to ensure a smooth start and high engagement
- PC4.** create strategies to evangelize and promote the continued usage of products/solutions among customers using targeted campaigns and CRM tools like HubSpot or Salesforce
- PC5.** establish a customer maturity model to understand engagement patterns and measure customer lifetime value (CLV)
- PC6.** implement an account tracking system to monitor growth in key customer accounts and evaluate engagement
- PC7.** define KPIs and metrics like Customer Satisfaction Score (CSAT) and Net Promoter Score (NPS) to measure customer engagement success
- PC8.** communicate regularly with customers through multiple channels to maintain strong engagement and foster loyalty
- PC9.** monitor and oversee the execution of customer engagement strategies, ensuring retention and satisfaction are achieved

Customer insights

To be competent, the user/individual on the job must be able to:

- PC10.** leverage analytics tools to gather actionable insights from customer data, using techniques like cohort analysis and segmentation
- PC11.** conduct surveys and use automated tools such as NPS software to regularly collect feedback on customer satisfaction
- PC12.** provide insights and feedback to product and engineering teams to improve product features and customer experience, driving better engagement

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** the procedures and guidelines for customer engagement and retention strategy
- KU2.** how to access data sources for customer engagement and feedback information
- KU3.** procedures for documenting customer account activities, including engagement and feedback
- KU4.** the key stakeholders to be involved when evaluating customer feedback and tracking account health
- KU5.** how to use templates and tools for engagement, such as CRM platforms (HubSpot, Salesforce)
- KU6.** the techniques for creating effective customer on-boarding strategies and user training programs
- KU7.** the best practices for developing customer maturity models to understand customer lifecycle and measure lifetime value (CLV)
- KU8.** how to establish and track KPIs such as CLV and Customer Acquisition Cost (CAC) to evaluate customer satisfaction and engagement
- KU9.** how to use cohort analysis to segment customers and personalize engagement strategies
- KU10.** tools for tracking and monitoring customer engagement, such as CRM software and analytics platforms
- KU11.** the methods for automating customer feedback collection using surveys and NPS tools, and how to analyze customer satisfaction effectively
- KU12.** how to analyze customer data and feedback to inform product improvements and strategy adjustments for enhanced engagement

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** evaluate business impact and share relevant information with others
- GS2.** analyze data to understand its effect on business outcomes
- GS3.** assess the impact of actions and share relevant insights with others
- GS4.** communicate necessary information to relevant parties
- GS5.** use problem-solving strategies to address challenges in various contexts
- GS6.** develop and maintain strong, positive relationships with customers
- GS7.** verify the work aligns with customer expectations
- GS8.** provide reliable and consistent service to customers
- GS9.** operate efficiently in customer-facing roles and environments
- GS10.** work cooperatively and effectively in a team setting

SSC/N8406: Create and execute a project charter and monitor the project KPIs

Description

This unit is about creating and executing a project charter and defining KPIs for monitoring the implementation of the project charter

Scope

The scope covers the following :

- Project Scope & Objectives
- Stakeholder mapping
- Roles and Responsibilities
- Project Planning
- Risk analysis & mitigation
- Project monitoring
- Validation

Elements and Performance Criteria

Project Scope & Objectives

To be competent, the user/individual on the job must be able to:

- PC1.** establish clear, measurable objectives to be achieved by the end of the project
- PC2.** detail the scope of the project, including specific goals, deliverables, timelines, and resource allocations, ensuring alignment with stakeholder expectations

Stakeholder mapping

To be competent, the user/individual on the job must be able to:

- PC3.** identify internal and external stakeholders and their roles in the project, ensuring a comprehensive understanding of interests and impacts
- PC4.** map stakeholders' influence, expectations, and communication needs, ensuring timely engagement throughout the project lifecycle

Roles and responsibilities

To be competent, the user/individual on the job must be able to:

- PC5.** assign key roles and responsibilities for each team member, ensuring alignment with project goals
- PC6.** match project requirements to the skills and capabilities of the team, ensuring appropriate resource allocation
- PC7.** create a detailed project organization chart, establishing a clear reporting structure and lines of accountability
- PC8.** define and implement an overall project governance strategy to guide decision-making, risk management, and communication

Project planning

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC9.** specify measurable milestones to track progress and ensure timely delivery of project phases
- PC10.** identify key dependencies and assess their criticality to the project's success
- PC11.** develop a comprehensive resource plan, including human resources, technology, and budget, to ensure smooth project execution
- PC12.** utilize project scheduling tools like Gantt charts, Microsoft Project, or Trello to create a structured timeline and manage resource allocation effectively

Risk analysis and mitigation

To be competent, the user/individual on the job must be able to:

- PC13.** identify potential risks and constraints affecting the project, assess their likelihood and impact
- PC14.** develop actionable risk mitigation strategies

Project monitoring

To be competent, the user/individual on the job must be able to:

- PC15.** define specific, measurable KPIs and metrics to monitor the project's implementation and performance throughout its lifecycle
- PC16.** track project progress using project management tools like JIRA, Kanban boards, or Microsoft Project, ensuring adherence to timelines and objectives

Validation

To be competent, the user/individual on the job must be able to:

- PC17.** validate the project plan with key stakeholders before implementation, ensuring alignment with goals, expectations, and resources

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the guidelines for developing project charters, gathering intelligence, and validating plans
- KU2.** different data sources and how to access documents and information required for project planning and execution
- KU3.** stakeholder engagement strategies and how to involve relevant individuals during the planning and validation of the project
- KU4.** the range of standard templates, tools (e.g., Microsoft Project, JIRA, Trello), and methods for creating project charters and managing the project lifecycle
- KU5.** how to conduct discussions with business leaders to define project objectives and align goals with business needs
- KU6.** the techniques for developing project implementation plans that cover scope, resources, milestones, and risks
- KU7.** the best practices for creating resource plans and optimizing resource utilization
- KU8.** how to establish and monitor Key Performance Indicators (KPIs) for project success
- KU9.** the methods for risk identification, analysis, and mitigation planning
- KU10.** the tools for project scheduling, such as Gantt charts and Kanban boards, to ensure effective time and resource management
- KU11.** budget management techniques and how to allocate resources efficiently to meet project goals

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** seek clarification and advice from relevant individuals when needed
- GS2.** listen actively and communicate information clearly and accurately
- GS3.** adhere to structured decision-making frameworks and guidelines
- GS4.** make well-informed decisions based on available data and context
- GS5.** plan tasks effectively to meet targets and deadlines
- GS6.** apply problem-solving techniques to address various situations
- GS7.** organize and share relevant information clearly with others
- GS8.** use balanced judgment to evaluate situations and make decisions

Qualification Pack

SSC/N9011: Manage team performance to achieve project goals

Description

This unit is about organizing tasks within the team to effectively meet project goals.

Scope

The scope covers the following :

- Project Planning
- Resource Allocation
- Quality assurance
- Training

Elements and Performance Criteria

Project Planning

To be competent, the user/individual on the job must be able to:

- PC1.** create realistic schedules for projects and direct your efforts in implementing it as per the plan
- PC2.** identify the sequence of tasks and the resources needed to achieve a goal, and prioritize key action steps
- PC3.** ensure evaluation processes are in place to measure project benefits
- PC4.** constantly monitor the progress and delivery of the project
- PC5.** plan your own work to meet the deadlines
- PC6.** prioritise work in line with key team or project deliverables
- PC7.** identify and consult the stakeholders in planning work
- PC8.** inform relevant stakeholders in case of inability to meet the deadlines
- PC9.** use appropriate project management tools and give access to relevant stakeholders
- PC10.** regularly update/communicate the team and stakeholder about the project progress

Resource Allocation

To be competent, the user/individual on the job must be able to:

- PC11.** efficiently allocate resources to meet needs of the project or the organisation
- PC12.** optimize the use of resources to provide for unforeseen changes in priorities, schedules and client expectations
- PC13.** check for errors in work in order and ensure delivery of high quality of work
- PC14.** use quality assurance processes across the team as a feedback mechanism to improve performance

Training

To be competent, the user/individual on the job must be able to:

- PC15.** ensure that all the team members/new employees in the project are trained on relevant modules of the project
- PC16.** create training or reference documents so that the team can refer when in need

Qualification Pack

- PC17.** organise training sessions regularly and when necessary on-board a subject matter expert to help train the team as per the requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational policies and procedures for empowering the team and their role and responsibilities in relation to this
- KU2.** different types of information that team members might need and the importance of providing this information when it is required
- KU3.** the importance of understanding problems from your teams perspective and how to provide support, where necessary, to resolve these
- KU4.** different mechanisms to incorporate and develop ideas that are put forward by the team

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** apply balanced judgments to different situations
- GS2.** ask for clarification and advice from appropriate people
- GS3.** listen effectively and orally communicate information accurately
- GS4.** follow rule-based decision-making processes
- GS5.** make decisions on suitable courses
- GS6.** Apply problem solving approaches in different situations
- GS7.** Communicate effectively with team or others in writing
- GS8.** Plan and organize your own work to achieve targets and deadlines
- GS9.** Work effectively in a team environment
- GS10.** Work effectively with colleagues and other teams
- GS11.** Treat other cultures with respect

SSC/N8452: Optimize Revenue, Security, and Accessibility in Web and Mobile Products

Description

This unit is about defining the key competencies required for optimizing revenue generation, ensuring robust product security, protecting data privacy, and enhancing accessibility in web and mobile products.

Scope

The scope covers the following :

- Revenue Strategy
- Product Solution Strategy
- Customer Requirement Analysis
- Product Security
- Data Privacy and Security
- Accessibility in Web and Mobile Products

Elements and Performance Criteria

Revenue Strategy

To be competent, the user/individual on the job must be able to:

- PC1.** develop and implement monetization models (e.g., subscriptions, ads, freemium models) based on market analysis and revenue opportunities
- PC2.** conduct A/B testing and use analytics tools to evaluate product performance and optimize revenue potential

Product Solution Strategy

To be competent, the user/individual on the job must be able to:

- PC3.** design and prioritize product features aligned with business goals, ROI, and customer needs
- PC4.** coordinate with cross-functional teams to ensure timely and efficient delivery of product solutions

Customer Requirement Analysis

To be competent, the user/individual on the job must be able to:

- PC5.** conduct surveys, interviews, and usability testing to gather customer insights and establish continuous feedback loops for iterative improvements
- PC6.** translate customer requirements into actionable product specifications

Product Security

To be competent, the user/individual on the job must be able to:

- PC7.** identify and address potential security threats and vulnerabilities through regular audits, penetration testing, and security protocols (e.g., encryption, secure authentication, API security)

Data Privacy and Security

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC8.** adhere to global data privacy regulations (e.g., GDPR, CCPA) by establishing clear policies for data collection, storage, and usage
- PC9.** ensure compliance with data anonymization and encryption standards

Accessibility in Web and Mobile Products

To be competent, the user/individual on the job must be able to:

- PC10.** implement and audit accessibility guidelines (e.g., WCAG, ADA) to ensure compliance across web and mobile platforms
- PC11.** develop inclusive solutions, such as screen reader compatibility, voice commands, and alternative input methods

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the various monetization models (e.g., subscription-based, freemium, ad-supported) and techniques for analyzing market opportunities and user behavior patterns to optimize revenue
- KU2.** the product lifecycle management and prioritization frameworks (e.g., MoSCoW, RICE) to guide feature development and iterative improvements
- KU3.** the methods for collecting and analyzing customer insights (e.g., surveys, interviews) and translating them into actionable product specifications using tools like Jira or Trello
- KU4.** the common security threats (e.g., phishing, SQL injection) and the application of secure coding practices, vulnerability testing tools, and compliance with standards such as ISO 27001
- KU5.** the global data privacy laws (e.g., GDPR, CCPA) and principles of data anonymization, encryption, and secure API integration for maintaining transparency and compliance
- KU6.** the principles of accessibility guidelines (e.g., WCAG, ADA) and inclusive design practices, supported by tools like Lighthouse, to ensure usability for diverse user groups
- KU7.** the digital marketing strategies and emerging trends in web and mobile technologies (e.g., AI, AR/VR) to align product solutions with market demands
- KU8.** the integration of analytics tools and dashboards to monitor KPIs related to revenue, security, and accessibility for data-driven decision-making
- KU9.** the project management methodologies (e.g., Agile, Scrum) and effective communication techniques to coordinate cross-functional teams and stakeholders
- KU10.** the customer-centric approaches and problem-solving techniques to address complex product challenges and prioritize user needs in development strategies

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** seek clarification and advice from relevant individuals when needed
- GS2.** listen actively and communicate information clearly and accurately
- GS3.** adhere to structured decision-making frameworks and guidelines
- GS4.** make well-informed decisions based on available data and context

Qualification Pack

- GS5.** plan tasks effectively to meet targets and deadlines
- GS6.** apply problem-solving techniques to address various situations
- GS7.** organize and share relevant information clearly with others
- GS8.** use balanced judgment to evaluate situations and make decisions

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
