SSC/Q8405: Mobile Device Management Analyst

Brief Job Description

The qualification in Mobile Device Management focuses on developing and implementing effective strategies for managing mobile devices within an organization. It encompasses the configuration and maintenance of compliance policies, remote installation and management of business applications, and proactive monitoring to secure devices against potential threats. Additionally, this qualification includes integrating Mobile Device Management systems with existing enterprise systems to ensure seamless operations and data security. This role is vital in today's digital landscape, where mobile technology is integral to business success.

Personal Attributes

Individuals in this role must manage and collaborate with various stakeholders involved in the process of managing mobile devices in the organization. They must lead team members and possess good communication skills to achieve project success.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N8456: Develop the organization's mobile device management strategy](#)
2. [SSC/N8431: Manage and maintain mobile device configuration, compliance policies in the mobility solutions of the organisation](#)
3. [SSC/N8432: Install, configure and manage business applications remotely on mobile devices](#)
4. [SSC/N8433: Monitor and secure mobile devices in case of security threats](#)
5. [SSC/N8434: Integrate Mobile Device Management systems with the existing enterprise systems](#)
6. [SSC/N8457: Strategies device integrity and secure protocols for better consumer experience](#)
7. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

SSC/N8456: Develop the organization's mobile device management strategy

Description

Develop the organization's mobile device management strategy

Scope

The scope covers the following :

- Develop the organization's mobile device management strategy

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** analyze the organization's work environment, business objectives, obstacles, and needs
- PC2.** determine the appropriate control measures for mobile devices to establish a suitable device policy, such as BYOD (Bring Your Own Device), CYOD (Choose Your Own Device), strict kiosk lockdown mode, COBO (Corporate-Owned Business Only), or COPE (Corporate-Owned, Personally-Enabled)
- PC3.** implement MDM solutions to manage and secure a broad range of devices, including wearables, laptops, and IoT devices, ensuring effective oversight of a diverse ecosystem of endpoints
- PC4.** establish criteria for choosing a suitable mobile device management solution for the organization
- PC5.** select and deploy an appropriate mobile device management solution within the organization
- PC6.** implement MDM solutions that effectively balance employee convenience with corporate security in response to the increasing adoption of Bring Your Own Device (BYOD) and Choose Your Own Device (CYOD) models
- PC7.** establish and outline a thorough and adaptable operational strategy for enterprise mobile devices
- PC8.** design, develop, and integrate business applications that are fully compatible with Windows-based mobile devices, focusing on performance, security, and usability
- PC9.** develop and execute a thorough privacy and security plan utilizing Mobile Device Management (MDM)
- PC10.** implement cloud-based MDM solutions that provide scalability and flexibility to support expanding device fleets and evolving business requirements
- PC11.** utilize cloud-based platforms with user-friendly interfaces and automated workflows to minimize the administrative workload on IT teams
- PC12.** Integrate user data from enterprise systems into the MDM interface to enable seamless user experiences and provide personalized access to applications and resources based on user roles, preferences, and historical behaviors
- PC13.** formulate a strategy for an expense policy regarding corporate-owned devices

Qualification Pack

- PC14.** establish metrics to evaluate the successful execution of the mobile device management strategy

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** principles of mobile device management (MDM) and its role in enterprise IT infrastructure
- KU2.** various mobile device ownership models such as BYOD, CYOD, COBO, COPE, and their implications on policy development
- KU3.** features, capabilities, and limitations of cloud-based and on-premises MDM solutions.
- KU4.** criteria and parameters for evaluating and selecting suitable MDM solutions for different organizational needs.
- KU5.** privacy, security, and compliance regulations applicable to mobile device usage in enterprise environments.
- KU6.** integration of MDM platforms with enterprise systems and user directories for seamless authentication and role-based access
- KU7.** considerations for designing and deploying business applications optimized for Windows-based mobile platforms.
- KU8.** cost factors, budgeting principles, and expense management strategies associated with corporate-owned mobile devices
- KU9.** key performance indicators (KPIs) and metrics to measure the effectiveness of MDM implementation
- KU10.** latest trends in device ecosystems, including wearables and IoT, and how they affect mobile device strategy.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate technical information effectively to both IT and non-IT stakeholders
- GS2.** collaborate with cross-functional teams to align mobile device strategies with business objectives
- GS3.** critically analyze organizational needs and translate them into practical MDM policies
- GS4.** prioritize tasks and make informed decisions under time and resource constraints.
- GS5.** adapt strategies in response to evolving technologies and organizational dynamics.

SSC/N8431: Manage and maintain mobile device configuration, compliance policies in the mobility solutions of the organisation

Description

This unit is about managing and maintaining configurations and policies for different mobile devices in the organisation

Scope

The scope covers the following :

- Device configuration and management

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** identify the devices in the organization to be monitored using mobile device management solutions
- PC2.** register the devices to monitored in the organization's network and on the mobile device management solutions
- PC3.** implement a zero-trust approach by ensuring that devices and users undergo continuous authentication and authorization without default trust
- PC4.** set up various policies around devices to secure corporate resources
- PC5.** implement MDM solutions with enhanced data encryption, loss prevention, and remote wipe features to protect sensitive corporate information
- PC6.** implement initial device configurations in compliance with the corporate rules
- PC7.** implement fingerprint and facial recognition features to enhance secure access to devices
- PC8.** integrate Mobile Device Management (MDM) with other endpoint management tools, including PC management and endpoint security solutions
- PC9.** perform timely installation of patches and updates of solution software and firmware
- PC10.** regularly scan devices to ensure they are compliant with company policy
- PC11.** integrate MDM solutions with productivity suites such as Microsoft 365 to enhance the user experience
- PC12.** generate periodic reports on the health and security of the mobile devices

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** fundamentals of mobile device management (MDM) architecture and its role in enterprise IT operations
- KU2.** principles and components of a zero-trust security model and its application to device and user authentication

Qualification Pack

- KU3.** types of mobile and endpoint devices typically managed within an enterprise and their compliance implications
- KU4.** corporate security standards and compliance frameworks relevant to mobile device configurations.
- KU5.** functionality of MDM features like encryption, remote wipe, data loss prevention, and biometric access controls
- KU6.** methods for integrating MDM solutions with enterprise productivity tools such as Microsoft 365 or Google Workspace
- KU7.** importance and methods of patch management and timely firmware/software updates for mobile security
- KU8.** data privacy, legal, and regulatory obligations governing mobile device usage in organizations
- KU9.** significance of policy configuration and enforcement in securing enterprise mobile endpoints
- KU10.** key metrics and reporting mechanisms used to assess mobile device health, compliance, and overall security posture.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate security policies and configuration guidelines clearly to end-users and IT personnel.
- GS2.** collaborate with cybersecurity, IT operations, and compliance teams to align on policy implementation
- GS3.** diagnose and troubleshoot configuration issues on mobile and endpoint devices
- GS4.** prioritize patching and policy updates based on risk levels and operational urgency
- GS5.** adapt to changes in mobile technology and continuously improve policy frameworks to address emerging threats

Qualification Pack

SSC/N8432: Install, configure and manage business applications remotely on mobile devices

Description

This unit is about installing, configuring and managing business application on the mobile devices of the organisation remotely

Scope

The scope covers the following :

- Application configuration and management

Elements and Performance Criteria

Application configuration and management

To be competent, the user/individual on the job must be able to:

- PC1.** identify the target devices for installation of business application
- PC2.** initialize files and tools required for over the air installation and update of applications on the registered mobile devices
- PC3.** perform over-the-air installation and update of applications on the registered mobile devices
- PC4.** perform encryption of files to secure over the air installation and update process
- PC5.** distribute files to intended target devices
- PC6.** implement automation for the integration of new devices into the MDM platform
- PC7.** Install, configure, and update business applications on Windows-based mobile devices to meet organizational needs and requirements
- PC8.** employ AI technologies to diagnose and resolve device and application issues efficiently
- PC9.** utilize AI to predict potential issues and take proactive measures to resolve them
- PC10.** perform post-update activities such as activating updated code
- PC11.** follow the requirements of the client to install and configure business applications remotely on Andorid or iOS devices
- PC12.** track and resolve issues related to Android or iOS device management and business application usage
- PC13.** ensure business applications are compatible with the latest iOS or Android versions and update them as necessary
- PC14.** verify that the system is functioning as per specifications

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** process and protocols for remote and over-the-air (OTA) installation and updating of mobile business applications.

Qualification Pack

- KU2.** compatibility requirements and limitations of business applications on various mobile operating systems like Android, iOS, and Windows.
- KU3.** tools and encryption standards used to secure application distribution and updates during remote installation
- KU4.** role of Mobile Device Management (MDM) platforms in application deployment and automation of device onboarding
- KU5.** use of AI technologies for diagnostics, issue prediction, and resolution in mobile application management
- KU6.** methods for verifying successful application installation, configuration, and activation in enterprise environments
- KU7.** integration of business applications with other enterprise tools ensures seamless system functioning.
- KU8.** importance of aligning app installation and configuration processes with specific client or organizational requirements
- KU9.** process for managing application updates to ensure compatibility with the latest versions of mobile operating systems
- KU10.** key compliance, privacy, and data protection standards relevant to remote management of mobile business applications

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate technical procedures and resolutions clearly to clients and team members.
- GS2.** collaborate with stakeholders to understand app requirements and ensure accurate deployment
- GS3.** plan and prioritize remote installation schedules based on organizational needs and risk factors
- GS4.** apply critical thinking to use AI insights for the proactive resolution of application or device issues
- GS5.** adapt to changes in OS versions and update strategies accordingly to maintain system integrity.
- GS6.** follow detailed instructions and specifications while maintaining precision in configuration tasks
- GS7.** maintain accurate records and logs of installations, updates, issues, and resolutions for audit and future reference

SSC/N8433: Monitor and secure mobile devices in case of security threats

Description

This unit is about monitoring mobile devices to identify security threats and secure mobile devices against them

Scope

The scope covers the following :

- Monitoring security of mobile devices

Elements and Performance Criteria

Monitoring security of mobile devices

To be competent, the user/individual on the job must be able to:

- PC1.** control access to various mobile devices and IT assets within the organization in accordance with the organization's identity and access management policies
- PC2.** assess the severity and security risks when controlling access to mobile devices
- PC3.** define security parameters to be monitored for securing mobile devices
- PC4.** implement MDM solutions with advanced threat protection features, such as malware detection, data loss prevention (DLP), and intrusion detection systems (IDS), to secure devices against emerging threats
- PC5.** implement and securely integrate biometric authentication methods, such as fingerprint and facial recognition, into MDM solutions for mobile devices
- PC6.** utilize Gen AI to analyze real-time data from mobile devices to detect unusual patterns or behaviors, accurately identifying potential vulnerabilities, malware, or suspicious activities beyond traditional rule-based systems
- PC7.** examine security performance metrics to identify discrepancies and issues, and escalate them to the relevant personnel for action
- PC8.** create security assessments to evaluate the protection of deployed devices
- PC9.** determine if the application should be licensed or open-source, depending on the client's preferences and project specifications
- PC10.** install and configure licensed applications while ensuring proper compliance with licensing agreements
- PC11.** collaborate with clients to determine the most suitable licensing options (e.g., subscription, perpetual, or open-source) for their business needs
- PC12.** maintain and continuously update inventory of mobile devices of the organization
- PC13.** create adaptive security policies utilizing Gen AI to automatically modify permissions, security configurations, and access controls according to user behavior, device usage trends, location, and device conditions
- PC14.** generate periodic reports on security incidents and share them with relevant stakeholders

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** principles of identity and access management (IAM) and how they apply to mobile device security
- KU2.** key types of security risks associated with mobile devices and methods for risk assessment
- KU3.** parameters and indicators used to monitor mobile device security, including behavioural analytics and usage patterns.
- KU4.** features and capabilities of advanced threat protection tools like malware detection, intrusion detection systems (IDS), and data loss prevention (DLP).
- KU5.** working and integration methods of biometric authentication technologies such as facial and fingerprint recognition
- KU6.** role of generative AI in analyzing real-time security data and detecting anomalies beyond traditional rules
- KU7.** importance of software licensing models (e.g., subscription, perpetual, open-source) and related compliance requirements
- KU8.** standard practices for inventory management and tracking of mobile devices within an organization
- KU9.** structure and interpretation of security performance metrics and incident reports for internal and external stakeholders

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyze user behaviour, location, and device conditions to modify access policies dynamically
- GS2.** communicate effectively with clients and stakeholders regarding licensing options and security incidents
- GS3.** use critical thinking to detect, assess, and respond to mobile security threats in real-time
- GS4.** collaborate with cross-functional teams to escalate issues and implement security recommendations
- GS5.** prioritize and troubleshoot issues based on the severity and potential business impact.

SSC/N8434: Integrate Mobile Device Management systems with the existing enterprise systems

Description

This unit is about integrating Mobile Device Management (MDM) systems with the existing enterprise systems while ensuring security and integrity of the data

Scope

The scope covers the following :

- Integration of Mobile Device Management (MDM) systems

Elements and Performance Criteria

Integration of Mobile Device Management (MDM) systems

To be competent, the user/individual on the job must be able to:

- PC1.** identify the enterprise systems deployed in the organizations
- PC2.** check for compatibility of the enterprise systems with the mobile device management solutions
- PC3.** Extend MDM solutions to encompass the management of IoT devices, ensuring their security, updates, and compliance
- PC4.** Integrate IoT data with enterprise systems to generate valuable insights for enhancing business operations and decision-making
- PC5.** map the process flow and the transaction of data in between sub- systems
- PC6.** plan to prevent erroneous data from being entered that disrupts the chronological events of a process
- PC7.** perform systems tests to verify that systems meet requirements
- PC8.** ensure security of systems before, during and after integration
- PC9.** Facilitate real-time data synchronization between MDM systems and enterprise applications (such as ERP, CRM, or HR systems) to ensure consistent updates of device information, user profiles, and compliance status across all platforms without manual intervention
- PC10.** Analyze data structures from both MDM and enterprise systems to automatically identify and establish relationships between various data fields, facilitating intelligent mapping to reduce errors and expedite the integration process for smooth data flow between systems
- PC11.** ensure that the privacy policies of the organization are not violated as part of the integration

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** types and functions of enterprise systems such as ERP, CRM, and HRMS used in organizations
- KU2.** fundamentals of Mobile Device Management (MDM) solutions and their compatibility requirements with enterprise systems

Qualification Pack

- KU3.** principles of integrating IoT devices into MDM ecosystems and enterprise-level architectures
- KU4.** process of mapping data flows and relationships between subsystems in integrated environments
- KU5.** methods for real-time data synchronization across MDM and enterprise systems
- KU6.** key strategies for validating and preventing inaccurate or inconsistent data entries during integration
- KU7.** procedures and tools used for system and integration testing.
- KU8.** security protocols required before, during, and after system integration to protect data and system integrity
- KU9.** organizational policies regarding data privacy and how they apply during systems integration

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyze and interpret data structures from diverse systems to facilitate accurate data mapping
- GS2.** collaborate effectively with cross-functional teams such as IT, operations, and data governance for integration planning
- GS3.** use logical reasoning and critical thinking to troubleshoot integration conflicts and data mismatches
- GS4.** document integration plans, mapping strategies, and test results clearly for internal records and audits
- GS5.** adapt to new enterprise applications or MDM system upgrades while maintaining integration continuity.
- GS6.** communicate technical information effectively to both technical and non-technical stakeholders
- GS7.** prioritize data security and privacy while handling large-scale system integrations
- GS8.** monitor integration performance, and make informed decisions based on analytical insights

Qualification Pack

SSC/N8457: Strategies device integrity and secure protocols for better consumer experience

Description

Strategies device integrity and secure protocols for better consumer experience

Scope

The scope covers the following :

- Strategies device integrity and secure protocols for better consumer experience

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Analyze the financial implications of mobile device management (MDM) strategies and identify areas for cost optimization and revenue enhancement
- PC2.** Align MDM configurations with organizational revenue objectives by prioritizing user experience and functionality that drive operational efficiency and profitability
- PC3.** Customize MDM systems and policies to meet specific organizational needs, ensuring scalability and flexibility
- PC4.** Conduct requirement analysis to understand customer and employee needs regarding mobile device usage, applications, and accessibility
- PC5.** Implement user-friendly configurations that meet diverse customer requirements and enhance productivity
- PC6.** Develop and implement robust security measures, such as encryption and multi-factor authentication, within the MDM framework
- PC7.** Ensure all MDM strategies comply with data protection regulations (e.g., GDPR, CCPA)
- PC8.** Ensure that MDM tools and policies consider accessibility standards (e.g., WCAG) to provide equitable device usage for all users
- PC9.** Regularly review MDM configurations and policies to ensure inclusivity and address barriers for users with disabilities

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** cost factors, financial models, and return on investment associated with implementing and managing Mobile Device Management (MDM) systems.
- KU2.** organizational goals related to revenue, user experience, and operational efficiency that influence MDM configuration.
- KU3.** principles of MDM system customization to meet scalability, flexibility, and organizational demands

Qualification Pack

- KU4.** key considerations for designing inclusive and accessible mobile experiences as per global accessibility standards (e.g., WCAG).
- KU5.** data protection and privacy regulations (e.g., GDPR, CCPA) relevant to MDM implementation and compliance.
- KU6.** security frameworks and techniques such as encryption, multi-factor authentication, and secure configuration protocols used in MDM systems

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** evaluate cost-benefit scenarios, and identify opportunities to optimize MDM strategies for organizational profitability.
- GS2.** communicate effectively with stakeholders to capture user needs and align MDM configurations accordingly
- GS3.** analyze user behaviour and feedback to continuously improve the accessibility and user-friendliness of mobile devices and configurations
- GS4.** apply problem-solving and decision-making skills to customize MDM settings that balance security, accessibility, and performance
- GS5.** stay updated with evolving compliance regulations and technology trends to ensure sustainable MDM practices

Qualification Pack

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

The assessment shall be conducted through an online proctored format, incorporating scenario-based multiple-choice questions designed to effectively evaluate practical understanding and real-world application of concepts. Additionally, it will include a viva-voice and hands-on practical evaluation to comprehensively assess the individual's proficiency in specific learning outcomes.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also defined as a distinct subset of the economy whose components share similar characteristics and interests.
