### SSC/N8623: Control and orchestrate the bot and bot ecosystem

#### Description

This unit is about managing bot ecosystem

#### Scope

The scope covers the following :

- Scope of support activities
- Bot Administration

#### Elements and Performance Criteria

##### Scope

To be competent, the user/individual on the job must be able to:

- PC1.** Verify the scope of Robotic Process Automation components to be monitored by authorized persons
- PC2.** Define the coverage model pertaining to the availability of run support model
- PC3.** Specify the level of support required for each process in the Robotic Process Automation solution

##### Bot Administration

To be competent, the user/individual on the job must be able to:

- PC4.** Participate in control room shift schedule and receive shift handover along with relevant information, authorities and instructions
- PC5.** Manage the day-to-day administration of the bot ecosystem (e.g., running of processes, eye-balling in a live/production environment, etc.)
- PC6.** Provide manuals, knowledge articles and configuration documents for BAU transition
- PC7.** Carry out user management and access control management
- PC8.** Set-up and configure the bot as required
- PC9.** Configure log data and log messages for easy consumption by business auditing and analytics tools
- PC10.** Manage license allocation to various tenants
- PC11.** Monitor the analytics on bot performance and the health of robotic resources using standard tools and dashboards
- PC12.** Ensure that all actions are tracked by the logs and are time-stamped
- PC13.** Report the metrics and analysis at regular intervals to relevant stakeholders

##### Operational Excellence

To be competent, the user/individual on the job must be able to:

- PC14.** Include RCA techniques for identifying the root cause of bot failures and implementing corrective actions to prevent recurrence

##### Documentation and Knowledge Management

To be competent, the user/individual on the job must be able to:

## Qualification Pack

- PC15.** Emphasize the importance of maintaining comprehensive documentation and knowledge management systems to support ongoing bot maintenance and troubleshooting

### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organizational policies, procedures and guidelines regarding coverage model and shift schedule for bot administration
- KU2.** Organizational policies and procedures for scheduling bot maintenance
- KU3.** Organizational policies and procedures for documenting manuals for BAU transition and reporting performance metrics
- KU4.** Organizational policies and procedures for day-to-day bot administration
- KU5.** Who to involve while defining coverage model, support level, RPA components to be monitored and access controls
- KU6.** The range of standard templates and tools available for bot administration
- KU7.** The processes and workflows pertaining to the RPA solution
- KU8.** The software and other tools employed in the RPA solution
- KU9.** Bot configuration and set-up
- KU10.** User management and maintenance of baseline system security
- KU11.** Access control implementation and license management
- KU12.** Analytics tools for monitoring bot performance
- KU13.** Tools to collect and analyse logs, and their customization

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Follow instructions, guidelines, procedures, rules and service level agreements
- GS2.** Work independently as well as collaboratively
- GS3.** Communicate with others in writing
- GS4.** Understand business impact and disseminate relevant information to others
- GS5.** Analyze performance metrics and understand its implications on business
- GS6.** Seek, receive and act on gathered feedback from various sources
- GS7.** Share the assimilated data and feedback with stakeholders
- GS8.** Apply good attention to detail while eye-balling the bot ecosystem
- GS9.** Ensure work is complete and free from errors
- GS10.** Follow rule-based decision-making processes
- GS11.** Plan and organize the work to achieve targets and deadlines
- GS12.** Apply problem-solving approaches in different situations

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                       | Theory Marks | Practical Marks | Project Marks | Viva Marks |

## Qualification Pack

### SSC/N8624: Provide support in bot change management

#### Description

This unite is about supporting change management activities such as upgradation, patch maintenance, etc.

#### Scope

The scope covers the following :

- Upgradation
- Patch Maintenance
- Bot Upgradation
- Environmental Change Management

#### Elements and Performance Criteria

##### *Upgradation*

To be competent, the user/individual on the job must be able to:

- PC1.** Provide support in upgradation of the bot and various components in the bot ecosystem (e.g., bot tools, hardware, etc.)
- PC2.** Understand the change management principles
- PC3.** Perform minor enhancements and fixes for consulted issues

##### *Patch maintenance*

To be competent, the user/individual on the job must be able to:

- PC4.** Participate in patch maintenance routines

##### *Bot upgradation*

To be competent, the user/individual on the job must be able to:

- PC5.** Plan for bot upgrades and enhancements

##### *Environmental change management*

To be competent, the user/individual on the job must be able to:

- PC6.** Provide support in environmental change management activities
- PC7.** Provide support in other process change activities

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organizational policies, procedures and guidelines regarding bot maintenance
- KU2.** Organizational policies and procedures for upgradation, implementing enhancements and other changes in Robotic Process Automation environment
- KU3.** Organizational policies and procedures for documenting changes in environment

## Qualification Pack

- KU4.** Who to involve while performing patch maintenance, upgradation, or other changes in RPA environment
- KU5.** The range of standard templates and tools
- KU6.** Understanding of processes and workflows pertaining to the Robotic Process Automation solution
- KU7.** Understanding of software and other tools employed in the Robotic Process Automation solution
- KU8.** Implementation of enhancements and upgradations
- KU9.** Understanding of patch management lifecycle and how to perform patching
- KU10.** Manage changes in Robotic Process Automation environment

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Follow instructions, guidelines, procedures, rules and service level agreements
- GS2.** Work independently as well as collaboratively
- GS3.** Communicate with others in writing
- GS4.** Understand business impact and disseminate relevant information to others
- GS5.** Analyse exceptions and understand its implications on business
- GS6.** Share the assimilated data and feedback with stakeholders
- GS7.** Apply good attention to detail
- GS8.** Ensure work is complete and free from errors
- GS9.** Follow rule-based decision-making processes
- GS10.** Plan and organize the work to achieve targets and deadlines
- GS11.** Apply problem-solving approaches in different situations

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                    | Theory Marks | Practical Marks | Project Marks | Viva Marks |

## Qualification Pack

### SSC/N8625: Identify, track and resolve issues in the bot ecosystem

#### Description

This unit is about identifying and resolving the issues in the bot ecosystem

#### Scope

The scope covers the following :

- Provide L2 Support
- Escalate

#### Elements and Performance Criteria

##### *Provide L2 Support*

To be competent, the user/individual on the job must be able to:

- PC1.** Serve as support for workflows and system incidents escalated from L1 support
- PC2.** Monitor termination/failure of bots
- PC3.** Solve issues that arise in the day-to-day running of Robotic Process Automation implemented processes and assist in the provision of timely responses and solutions as required
- PC4.** Investigate system exceptions and determine if they are workflow related or system related
- PC5.** Manage support requests using service management tools

##### *Escalate*

To be competent, the user/individual on the job must be able to:

- PC6.** Escalate unresolved issues to the concerned team (Robotic Process Automation developer or vendor)

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organizational policies, procedures and guidelines regarding incident handling and issue resolution
- KU2.** Organizational policies and procedures for raising and assigning tickets, and escalation
- KU3.** Organizational policies and procedures for documenting incidents
- KU4.** Who to involve while escalating unresolved issues
- KU5.** The range of standard templates and service management tools
- KU6.** Understanding of processes and workflows pertaining to the Robotic Process Automation solution
- KU7.** Understanding of software and other tools employed in the Robotic Process Automation solution
- KU8.** Identification of issues related to bot, workflow and other IT systems
- KU9.** Bot failures tracking and management

## Qualification Pack

- KU10.** Tools to collect and analyze logs, and their customization  
**KU11.** Manage Robotic Process Automation environment variables

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Follow instructions, guidelines, procedures, rules and service level agreements  
**GS2.** Work independently as well as collaboratively  
**GS3.** Seek clarification and advice from appropriate people  
**GS4.** Communicate with others in writing  
**GS5.** Understand business impact and disseminate relevant information to others  
**GS6.** Analyse exceptions and understand its implications on business  
**GS7.** Share the assimilated data and feedback with stakeholders  
**GS8.** Apply good attention to detail  
**GS9.** Ensure work is complete and free from errors  
**GS10.** Follow rule-based decision-making processes  
**GS11.** Plan and organize the work to achieve targets and deadlines  
**GS12.** Apply problem-solving approaches in different situations

## Qualification Pack

## Qualification Pack

### DGT/VSQ/N0102: Employability Skills (60 Hours)

#### Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

#### Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

#### Elements and Performance Criteria

##### *Introduction to Employability Skills*

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

##### *Constitutional values – Citizenship*

To be competent, the user/individual on the job must be able to:

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

The assessment will consist of a blend of hands-on practical evaluations, viva-voce, and online proctored scenario-based multiple-choice questions ensuring a thorough evaluation of the individual's proficiency in learning outcomes, practical understanding, and real-world application of concepts.

#### Minimum Aggregate Passing % at QP Level : 70

**(Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

### Assessment Weightage

### Glossary

|                                              |                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
| <b>Sector</b>                           | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                                                                                            |
| <b>Sub - Sector</b>                     | Sub - sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                                                                                         |
| <b>Occupation</b>                       | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                                                                                      |
| <b>Job Role</b>                         | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation                                                                                                                                                                                                                                                       |
| <b>Occupational Standards (OS)</b>      | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.                                                                       |
| <b>Performance Criteria (PC)</b>        | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                                                                                          |

## Qualification Pack

|                                       |                                                                                                                                                                                                                                                                                            |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>National Occupational Standard</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                 |
| <b>Qualifications Pack (QP)</b>       | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job roles. A QP is assigned a unique qualifications pack code.                                                                                                                |
| <b>Unit Code</b>                      | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                  |
| <b>Unit Title</b>                     | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                  |
| <b>Description</b>                    | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                             |
| <b>Scope</b>                          | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                      |
| <b>Knowledge and Understanding</b>    | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.                                                                   |
| <b>Organizational Context</b>         | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                           |
| <b>Technical Knowledge</b>            | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                   |
| <b>Core Skills or Generic Skills</b>  | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Options</b>                        | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                              |
