SSC/Q8804: XR Developer

Brief Job Description

Individuals in this job role are responsible for developing software for AR/VR/MR experiences for varied industrial use cases. They also customize the solution based on the feedback and are responsible for evaluating and documenting product/software performance reports. They must manage and collaborate with various stakeholders involved in developing AR/VR solution experiences. They must have a strong analytical mindset and a zeal to learn new things.

Personal Attributes

XR Developers must be able to communicate effectively, build relationships with others and collaborate with various stakeholders. They must have a zeal to learn new things.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SSC/N8825: Translate design concepts into functional applications while focusing on user experience, usability, and intuitive interaction methods.](#)
2. [SSC/N8812: Develop software for a wide range of AR/VR experiences for varied industrial use cases](#)
3. [SSC/N8826: Collaborate with designers to integrate 3D models, animations, audio, and other assets into applications, ensuring they function seamlessly within AR/VR environments.](#)
4. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

SSC/N8825: Translate design concepts into functional applications while focusing on user experience, usability, and intuitive interaction methods.

Description

This NOS is about translating design concepts into functional applications

Scope

The scope covers the following :

- Design Concepts, Focus on user experience, Ensure Usability, Implement Intuitive Interaction, Technical Translation, Iterative Testing and Feedback, Documentation, Final Deployment and Support

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Understand the design concepts developed during the prototyping phase and ensuring alignment with user needs and business requirements
- PC2.** Collaborate closely with UX/UI designers to translate visual designs and interaction specifications into functional requirements. This may involve discussions about user flows, interface elements, and intended interactions
- PC3.** Keep the user's perspective at the forefront of the development process. Ensure that every feature and interaction is designed to enhance the user experience, making it pleasant and engaging
- PC4.** Develop interfaces that are easy to navigate and use. Focus on creating layouts and controls that follow established usability principles, enabling users to accomplish tasks with minimal effort
- PC5.** Implement visual and auditory feedback mechanisms within the application. Users should receive immediate responses to their interactions, such as highlighting buttons when hovered over or providing sound cues for actions.
- PC6.** Utilize interaction methods that feel natural and aligned with human behaviors. In AR/VR applications, this may include gesture recognition, eye-tracking, voice commands, and physical movements that mimic users' real-world actions.
- PC7.** Select appropriate development frameworks and tools that support the translation of design concepts into functional applications. For AR/VR, this may involve platforms such as Unity or Unreal Engine, which provide specific capabilities for creating immersive experiences.
- PC8.** Translate visual and functional designs into code, focusing on both front-end and back-end development. This includes creating user interfaces, programming interactions, and integrating necessary features and functionalities into the application.
- PC9.** . Implement iterative testing throughout the development process. Usability testing sessions and user feedback loops should be integrated into the workflow to validate interactions and ensure that the application meets user expectations.
- PC10.** Use insights gained from testing to refine and enhance features, usability, and interactivity. This iterative approach helps create a more effective end product that resonates with users.

Qualification Pack

- PC11.** Maintain clear documentation throughout the development phase, outlining the features implemented, design decisions made, and technical specifications for future reference.
- PC12.** Plan and execute the deployment of the final application, ensuring that it is tested and optimized for target devices and platforms. This includes preparing for any launch-related activities and user training sessions.
- PC13.** Continue to monitor usage and collect user feedback, being prepared to iterate and enhance the application based on real-world user interactions and experiences.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding of AR/VR Technologies
- KU2.** User Interface (UI) and User Experience (UX) Design
- KU3.** Prototyping and Wireframing
- KU4.** Programming and Development Skills
- KU5.** Asset Creation and Integration
- KU6.** Usability and Testing
- KU7.** Performance Optimization
- KU8.** Data Management and Storage
- KU9.** Collaboration and Communication

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** The ability to clearly convey ideas, information, and instructions to team members and stakeholders.
- GS2.** The ability to mediate disputes and facilitate discussions to achieve consensus among team members.
- GS3.** Evaluating information and identifying patterns to solve complex problems effectively.
- GS4.** The ability to prioritize tasks effectively to meet deadlines and manage competing demands.
- GS5.** The ability to empathize with users, understanding their perspectives, needs, and challenges to create solutions that truly resonate.
- GS6.** Understanding the needs and perspectives of users, ensuring that products and solutions are designed to deliver value and satisfy customer expectations.
- GS7.** The ability to remain composed and effective in the face of challenges or setbacks.

SSC/N8812: Develop software for a wide range of AR/VR experiences for varied industrial use cases

Description

This unit is about developing software solution which encompasses a variety of AR/VR experience that can be used across industries

Scope

The scope covers the following :

- Development, Testing, Bug Fixing, Best practices, Documentation

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the platforms on which the AR/VR application would run
- PC2.** Identify internal development platforms and end-user devices.
- PC3.** Gather information on interactive elements and 3D objects to be included in the product from relevant teams (Design, Architecture, etc.)
- PC4.** Interact with design and content teams and contribute to the development of 3D assets as required
- PC5.** Develop virtualization applications based on AR/VR to visualize the product.
- PC6.** Develop product-specific features based on functional requirements such as face detection, tracking, real-time networking for synchronous play, etc.
- PC7.** Develop apps to support monoscopic or stereoscopic videos as per requirement
- PC8.** Develop computer vision to implement Custom Object Detection for AR/VR applications
- PC9.** Develop high-performance graphics using appropriate modes of rendering, render pipelines, textures
- PC10.** Optimize 3D models and environment using appropriate techniques and levels of detailing to ensure smooth performance with good quality imagery
- PC11.** Ensure proper integration of 3D models, CMS systems, and other existing systems
- PC12.** Include features for adaptive streaming and transcoding in the product/solution
- PC13.** Develop audio/ speech interfaces using NLP when required.
- PC14.** Test the software code for robustness, including corner cases, usability, and general reliability
- PC15.** Carry out unit testing of software to ensure desired performance
- PC16.** Debug the code and fix coding errors
- PC17.** Apply coding practices such as reusability, continuous integration, continuous delivery, platform-specific best practices/guidelines, etc
- PC18.** Create documents, demonstrations, and relevant artefacts for the software code, product usage, and troubleshooting

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational policies, procedures, and guidelines which relate to gathering and documenting solution requirements
- KU2.** organizational policies and procedures for sharing data
- KU3.** who to involve while defining and validating solution requirements
- KU4.** the range of standard templates and tools available and how to use them
- KU5.** concepts of spatial algebra, trigonometry, matrices, vector algebra, and linear algebra
- KU6.** tools and techniques for 3D modeling
- KU7.** AR/VR development platforms
- KU8.** how to integrate backend, API, SDKs, etc.
- KU9.** concepts of machine learning and deep learning (especially computer vision and NLP)
- KU10.** interaction logic in AR/VR solutions
- KU11.** debugging and log analysis tools
- KU12.** tools and techniques for testing AR/VR solution
- KU13.** best practices for developing AR/VR solution and troubleshooting
- KU14.** ways to analyze the impact of architectural changes
- KU15.** tools and techniques for automation
- KU16.** how to create standard technical and supporting documents

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow instructions, guidelines, procedures, rules, and service level agreements
- GS2.** ask for clarification and advice from appropriate people
- GS3.** listen effectively and communicate information accurately
- GS4.** follow rule-based decision-making processes
- GS5.** plan and organize the work to achieve targets and meet deadlines
- GS6.** apply problem-solving approaches to different situations
- GS7.** analyze the business impact and disseminate relevant information to others
- GS8.** apply balanced judgments to different situations
- GS9.** work independently and collaboratively
- GS10.** contribute to the quality of teamwork

SSC/N8826: Collaborate with designers to integrate 3D models, animations, audio, and other assets into applications, ensuring they function seamlessly within AR/VR environments.

Description

Collabore with designers to integrate 3D models, animations, audio, and other assets into applications, ensuring they function seamlessly within AR/VR environments.

Scope

The scope covers the following :

- Integration of 3D Models, Animation Integration, Audio Implementation, Asset Management, Interaction design, Testing for Seamless Functionality

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Collaborate with 3D artists to optimise models for performance in AR/VR environments. This includes reducing polygon counts, simplifying textures, and ensuring that models are efficient without sacrificing quality.
- PC2.** Ensure that the 3D models are in compatible file formats that can be seamlessly imported into development environments, such as Unity or Unreal Engine. Common formats include FBX, OBJ, and glTF.
- PC3.** . Carefully position and scale 3D models within the AR/VR environment. This involves considering the user's viewpoint and interactions to create a natural and immersive experience.
- PC4.** Coordinate with designers and animators to implement animations effectively. This may involve setting up animation timelines, ensuring smooth transitions, and defining triggers for animations based on user interactions.
- PC5.** Optimize animations to run smoothly in real time within AR/VR applications. This can include techniques like baking animations or using skeletal animations to ensure fluid motion.
- PC6.** Work with sound designers to integrate audio elements that enhance the immersive environment, including background music, sound effects, and spatial audio that responds to user movements and interactions
- PC7.** Utilize audio middleware (e.g., FMOD, Wwise) to manage complex audio systems, allowing for dynamic audio playback that adapts to the user's actions and the environment's context.
- PC8.** Conduct thorough testing of audio elements in conjunction with visual assets, ensuring that soundscapes complement the visual experience and that audio cues provide effective feedback during user interactions.
- PC9.** Implement an organized asset management system that keeps all 3D models, animations, and audio files easily accessible. Use version control systems to manage asset updates and collaborate effectively
- PC10.** If using third-party assets or purchasing from asset stores, evaluate their compatibility, quality, and licensing terms before integration into the project

Qualification Pack

- PC11.** Collaborate with designers to define how users will interact with 3D models and animations. This includes setting up interactive elements, such as buttons, sliders, or objects that respond to gestures, and ensuring they are intuitive and engaging
- PC12.** Implement visual and auditory feedback mechanisms that respond to user interactions. For example, making objects change visually or produce sounds when selected or manipulated.
- PC13.** Conduct thorough testing of all integrated assets within the AR/VR environment to identify any issues with performance, usability, or visual fidelity

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational policies, procedures, and guidelines which relate to incident management
- KU2.** organizational policies and procedures for sharing data
- KU3.** organizational policies for documenting operational runbooks
- KU4.** how to collaborate with stakeholders to define create an operational runbook
- KU5.** the range of standard templates and tools available and how to use them
- KU6.** tools and techniques to create clear and concise support content
- KU7.** how to implement analytics-driven solutions
- KU8.** methods to troubleshoot issues related to AR/VR product/solution
- KU9.** how to provide remote repair services
- KU10.** how to implement best practices and standard operating procedures for administration and support

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** follow instructions, guidelines, procedures, rules, and service level agreements
- GS2.** ask for clarification and advice from appropriate people
- GS3.** listen effectively and communicate information accurately
- GS4.** follow rule-based decision-making processes
- GS5.** make decisions on suitable courses
- GS6.** refer anomalies to the supervisor
- GS7.** apply problem-solving approaches to different situations
- GS8.** analyze the business impact and disseminate relevant information to others
- GS9.** apply balanced judgments to different situations
- GS10.** check the work is complete and free from errors

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
