## Qualification Pack

### TEL/Q2400: Telecom E-Waste Handler

#### Brief Job Description

A Telecom E-Waste Handler operates as a micro-entrepreneur, establishing and managing telecom e-waste collection and aggregation centres. The individual ensures safe handling, segregation, and secure transportation of waste for further processing while promoting sustainable disposal practices. The person collaborates with stakeholders and utilizes advanced technologies to enhance operational efficiency and regulatory compliance.

#### Personal Attributes

The individual should possess excellent communication, organizational, and problem-solving skills, along with attention to detail and a commitment to safety, sustainability, and stakeholder collaboration.

#### Applicable National Occupational Standards (NOS)

##### Compulsory NOS:

1. [TEL/N2401: Undertake telecom e-waste collection, handling, and disposal operations](#)
2. [TEL/N9108: Follow sustainability practices in telecom operations](#)
3. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

## Qualification Pack

# TEL/N2401: Undertake telecom e-waste collection, handling, and disposal operations

## Description

This unit covers the coordination and execution of telecom e-waste collection, safe handling, segregation, and disposal while ensuring compliance with safety and environmental regulations.

## Scope

The scope covers the following :

- Assess the value and hazards of telecom e-waste streams
- Identify, collect, and transport telecom e-waste
- Segregate and handle telecom e-waste safely
- Establish and manage a telecom e-waste collection and handling centre

## Elements and Performance Criteria

### *Assess the value and hazards of telecom e-waste streams*

To be competent, the user/individual on the job must be able to:

- PC1.** classify telecom and non-telecom e-waste based on material composition and potential for reuse or recycling
- PC2.** identify valuable and hazardous components in different types of telecom e-waste
- PC3.** apply circular economy practices, including segregation for reuse, refurbishment, and recycling
- PC4.** communicate the benefits of responsible e-waste management to stakeholders using posters, digital platforms, and community outreach
- PC5.** follow legal requirements and safety guidelines for handling and storing telecom e-waste

### *Identify, collect, and transport telecom e-waste*

To be competent, the user/individual on the job must be able to:

- PC6.** identify key sources and generators of telecom e-waste, such as service providers, retailers, and consumers
- PC7.** select and use appropriate transport options for collecting and transporting telecom e-waste, ensuring compliance with safety regulations
- PC8.** use the necessary Personal Protective Equipment (PPE) while handling and transporting telecom e-waste to prevent exposure to hazardous materials
- PC9.** maintain documentation and records of collected e-waste, including source details, weight, and classification

### *Segregate and handle telecom e-waste safely*

To be competent, the user/individual on the job must be able to:

- PC10.** use appropriate tools and equipment to dismantle and segregate telecom e-waste
- PC11.** categorize the collected telecom e-waste based on type, condition, and value for reuse or recycling

## Qualification Pack

- PC12.** follow operational procedures for systematic segregation of reusable, recyclable, and hazardous components
- PC13.** adhere to workplace safety protocols, including proper usage of PPE and hazard containment measures
- PC14.** label and package different categories of segregated e-waste for further processing or disposal
- PC15.** store hazardous e-waste securely to prevent environmental contamination or health risks

### *Establish and manage a telecom e-waste collection and handling centre*

To be competent, the user/individual on the job must be able to:

- PC16.** identify legal and compliance requirements for establishing a telecom e-waste collection and handling centre
- PC17.** arrange necessary infrastructure, including storage, weighing, labeling equipment
- PC18.** implement workplace hygiene and sanitation measures to maintain a safe working environment
- PC19.** develop an inventory system to track telecom e-waste inflow and outflow efficiently
- PC20.** organize and optimize secure storage facilities for collected telecom e-waste
- PC21.** monitor financial performance, track operational costs, and identify revenue opportunities
- PC22.** recruit and train personnel in waste handling, safety procedures, and customer interaction

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the value chain of telecom and non-telecom electronics and electrical products from source to final disposal
- KU2.** the principles of circular economy and 3Rs (Reduce, Reuse, Recycle) in telecom e-waste management
- KU3.** the typical material composition of telecom e-waste, including valuable and hazardous components
- KU4.** the environmental and health hazards of improper disposal and handling of telecom e-waste
- KU5.** pricing and economic aspects of e-waste management, including negotiations with upstream and downstream partners
- KU6.** emergency response protocols, including firefighting and chemical spill management
- KU7.** the importance of PPE, hazard communication, and workplace safety measures
- KU8.** proper packaging, labeling, and transport protocols for safe e-waste movement
- KU9.** transport and logistics options for efficient and compliant e-waste collection
- KU10.** basic entrepreneurship and accounting principles, including financial tracking, profit margins, and operational costs
- KU11.** marketing and outreach strategies to build a network of regular e-waste generators
- KU12.** methods to identify and expand collection networks in under-served areas
- KU13.** basics of national and international regulations related to telecom e-waste management and disposal

## Qualification Pack

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret regulatory documents, safety guidelines, and operational procedures
- GS2.** communicate effectively with stakeholders, including waste generators, customers, and regulatory bodies
- GS3.** maintain organized records of waste collection, segregation, and disposal for compliance tracking
- GS4.** use digital tools for inventory management, tracking, and reporting
- GS5.** apply basic financial management skills to optimize operational costs and improve efficiency
- GS6.** train and supervise team members on handling and segregation techniques
- GS7.** identify and mitigate workplace safety hazards effectively
- GS8.** conduct public awareness campaigns to promote e-waste recycling
- GS9.** adapt to changing waste management regulations and industry best practices
- GS10.** collaborate with vendors and recyclers to enhance resource recovery and efficiency

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                             | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Assess the value and hazards of telecom e-waste streams</i>                                                                                               | <b>6</b>     | <b>10</b>       | -             | <b>5</b>   |
| <b>PC1.</b> classify telecom and non-telecom e-waste based on material composition and potential for reuse or recycling                                      | 2            | 2               | -             | 1          |
| <b>PC2.</b> identify valuable and hazardous components in different types of telecom e-waste                                                                 | 1            | 2               | -             | 1          |
| <b>PC3.</b> apply circular economy practices, including segregation for reuse, refurbishment, and recycling                                                  | 1            | 2               | -             | 1          |
| <b>PC4.</b> communicate the benefits of responsible e-waste management to stakeholders using posters, digital platforms, and community outreach              | 1            | 2               | -             | 1          |
| <b>PC5.</b> follow legal requirements and safety guidelines for handling and storing telecom e-waste                                                         | 1            | 2               | -             | 1          |
| <i>Identify, collect, and transport telecom e-waste</i>                                                                                                      | <b>6</b>     | <b>10</b>       | -             | <b>4</b>   |
| <b>PC6.</b> identify key sources and generators of telecom e-waste, such as service providers, retailers, and consumers                                      | 2            | 3               | -             | 1          |
| <b>PC7.</b> select and use appropriate transport options for collecting and transporting telecom e-waste, ensuring compliance with safety regulations        | 1            | 2               | -             | 1          |
| <b>PC8.</b> use the necessary Personal Protective Equipment (PPE) while handling and transporting telecom e-waste to prevent exposure to hazardous materials | 2            | 3               | -             | 1          |
| <b>PC9.</b> maintain documentation and records of collected e-waste, including source details, weight, and classification                                    | 1            | 2               | -             | 1          |
| <i>Segregate and handle telecom e-waste safely</i>                                                                                                           | <b>8</b>     | <b>10</b>       | -             | <b>5</b>   |
| <b>PC10.</b> use appropriate tools and equipment to dismantle and segregate telecom e-waste                                                                  | 2            | 2               | -             | 1          |

### Qualification Pack

| Assessment Criteria for Outcomes                                                                                          | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|---------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC11.</b> categorize the collected telecom e-waste based on type, condition, and value for reuse or recycling          | 2            | 2               | -             | 1          |
| <b>PC12.</b> follow operational procedures for systematic segregation of reusable, recyclable, and hazardous components   | 1            | 2               | -             | 1          |
| <b>PC13.</b> adhere to workplace safety protocols, including proper usage of PPE and hazard containment measures          | 1            | 2               | -             | 1          |

### TEL/N9108: Follow sustainability practices in telecom operations

#### Description

This unit focuses on sustainability practices in the telecom sector, detailing processes to identify components for recycling, refurbishment, or responsible disposal while ensuring compliance with environmental standards and promoting sustainable repair and maintenance practices.

#### Scope

The scope covers the following :

- Identify recyclable, reusable, and disposable components
- Adhere to environmental standards
- Follow sustainable repair practices
- Comply with sustainability protocols

#### Elements and Performance Criteria

##### *Identify recyclable, reusable, and disposable components*

To be competent, the user/individual on the job must be able to:

- PC1.** identify telecom components that can be recycled, refurbished, or reused during repair and maintenance
- PC2.** sort materials into recyclable, reusable, and hazardous waste categories
- PC3.** examine faulty components for potential refurbishment and document findings
- PC4.** label and segregate hazardous materials for specialized disposal
- PC5.** evaluate dismantled parts to determine their suitability for recycling or safe disposal

##### *Adhere to environmental standards*

To be competent, the user/individual on the job must be able to:

- PC6.** follow guidelines for safe handling, storage, and disposal of hazardous and non-hazardous materials
- PC7.** maintain compliance with environmental regulations relevant to e-waste management
- PC8.** record all e-waste disposal and recycling activities as per company policies
- PC9.** use protective equipment when handling hazardous waste to prevent environmental contamination
- PC10.** conduct regular audits of waste management processes to ensure alignment with sustainability standards

##### *Follow sustainable repair practices*

To be competent, the user/individual on the job must be able to:

- PC11.** use repair techniques that minimize waste generation and energy consumption
- PC12.** select energy-efficient and eco-friendly spare parts for repairs
- PC13.** optimize material usage by reusing functional components from discarded devices
- PC14.** minimize the use of single-use materials during maintenance and repair tasks
- PC15.** diagnose faults accurately to avoid unnecessary replacements

## Qualification Pack

### *Comply with sustainability protocols*

To be competent, the user/individual on the job must be able to:

- PC16.** follow organizational sustainability policies during repair and maintenance activities
- PC17.** coordinate with certified recyclers for responsible disposal of non-recyclable waste
- PC18.** ensure proper documentation of waste transfer to recycling or disposal agencies
- PC19.** participate in training programs on environmental conservation and sustainability
- PC20.** promote awareness of sustainable practices among team members and stakeholders

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the relevant environmental laws and regulations for the telecom sector
- KU2.** different recyclable and hazardous components in telecom equipment
- KU3.** the relevant tools and techniques that support sustainable repair practices
- KU4.** the safe handling, storage, and disposal of hazardous materials
- KU5.** e-waste recycling through certified vendors
- KU6.** the documentation related to sustainability and waste disposal
- KU7.** waste segregation and sorting guidelines
- KU8.** the industry's best practices for reducing environmental impact
- KU9.** the importance of energy efficiency and using eco-friendly parts

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** improve and modify work practices
- GS2.** communicate effectively with team members and stakeholders
- GS3.** record and report waste management and recycling activities accurately
- GS4.** solve problems related to waste segregation and disposal
- GS5.** plan and organize tasks to ensure compliance with sustainability protocols
- GS6.** make informed decisions about recyclable and reusable components
- GS7.** coordinate with external agencies for responsible waste management
- GS8.** ensure accuracy in maintaining compliance records
- GS9.** adapt to new sustainability policies and practices
- GS10.** identify and mitigate risks associated with hazardous materials
- GS11.** promote teamwork to achieve sustainability goals

## Qualification Pack

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

## Qualification Pack

**Minimum Aggregate Passing % at QP Level : 50**

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

## Assessment Weightage

Compulsory NOS

### Glossary

|                                              |                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
| <b>Sector</b>                           | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                                                                                            |
| <b>Sub-sector</b>                       | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                                                                                           |
| <b>Occupation</b>                       | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                                                                                      |
| <b>Job role</b>                         | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                                                                                      |
| <b>Occupational Standards (OS)</b>      | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.                                                                       |
| <b>Performance Criteria (PC)</b>        | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                                                                                          |

## Qualification Pack

|                                        |                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>National Occupational Standard</b>  | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                                                                                             |
| <b>Qualifications Pack (QP)</b>        | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                                                                                             |
| <b>Unit Code</b>                       | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                                                                                              |
| <b>Unit Title</b>                      | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                                                                                              |
| <b>Description</b>                     | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                                                                                         |
| <b>Scope</b>                           | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required                                                                                                                                                                   |
| <b>Knowledge and Understanding (K)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>          | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>             | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities                                                                                                                                                                                                                                                                |
| <b>Core Skills/ Generic Skills (G)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                       | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                         | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
