TEL/Q6212: Telecom Rigger - 5G and Legacy Networks

Brief Job Description

A Telecom Rigger - 5G and Legacy Networks works under supervision to assist in the installation, maintenance, upgrading, and dismantling of telecom equipment on towers and other structures. The role involves using rigging techniques and installation skills to ensure the safe and efficient handling of telecom infrastructure, including cabling and related components.

Personal Attributes

The individual should be physically fit to climb towers and work at heights for extended periods. Strong problem-solving skills, teamwork, and the ability to coordinate effectively with others are essential. Additionally, the person should possess clear verbal and written communication skills.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [TEL/N6310: Assist in the Installation of Telecom Equipment](#)
2. [TEL/N6323: Assist in the Maintenance, Upgrade and Decommissioning of Telecom Equipment and Sites](#)
3. [TEL/N6246: Follow the Occupational Health and Safety Instructions during Tower Climbing](#)

TEL/N6310: Assist in the Installation of Telecom Equipment

Description

This unit covers the installation of telecom equipment on various tower structures such as Ground-Based Towers (GBT), Roof-Top Towers (RTT), and monopoles. It includes rigging, cabling, alignment, testing, and ensuring safety compliance.

Scope

The scope covers the following :

- Determine the scope of work
- Prepare for the installation of telecom equipment
- Assist in the installation of tower equipment
- Assist in performing Line-of-Sight (LOS) check
- Assist in the shelter room installations
- Assist in completing documentation

Elements and Performance Criteria

Determine the scope of work

To be competent, the user/individual on the job must be able to:

- PC1.** determine the scope of installation work by coordinating with the supervisor and commissioning engineers
- PC2.** analyse the relevant blueprints, schematics and as-built site plan to determine the work requirements
- PC3.** assist the supervisor/field manager by providing appropriate inputs and feedback regarding site conditions and installation as required, to help achieve the scope of work

Prepare for the installation of telecom equipment

To be competent, the user/individual on the job must be able to:

- PC4.** check the availability and condition of required installation material, tools and equipment, and Personal Protection Equipment (PPE)
- PC5.** report and replace damaged or faulty tools, materials, or safety equipment through co-ordination with the supervisor to get them replaced
- PC6.** assist in preparing Radio Frequency (RF) connector and jumper and assembling the relevant telecom equipment for installation, following the supervisor's instructions

Assist in the installation of tower equipment

To be competent, the user/individual on the job must be able to:

- PC7.** assemble antennas, waveguides, and coaxial connectors as per supervisor's instructions
- PC8.** assist in erecting and securing telecom structures (e.g. towers, monopoles, masts, and cable trays) for equipment installation
- PC9.** assist in the installation of antennas, feeders, microwave dishes, mast head amplifiers, and ancillary equipment following appropriate safety measures

Qualification Pack

- PC10.** install transmission components (antenna mounts, surge arrestors, eNodeB, gNodeB, transmission lines, connectors, TMAs, CDU) as instructed
- PC11.** assist in setting the correct azimuth, elevation, angle, and alignment of transmission equipment
- PC12.** install feeder cables, coaxial cables, and high jumpers on towers, masts, rooftops, and building-mounted antennas
- PC13.** assist in installing RF antenna systems and external RF hardware (RRUs, TMAs, combiners, microwave dishes)
- PC14.** assist in the installation of microwave antennas, including parabolic (1-15 ft), VHF, and UHF antennas
- PC15.** install, connect, and test underground/above-ground grounding systems per supervisor's instructions
- PC16.** use coaxial connectors and preparatory tools as per manufacturer guidelines
- PC17.** measure antenna alignment (azimuth, tilt, roll, height) using alignment tools and adjust as per RF engineer's instructions
- PC18.** perform bird-proofing and waterproofing of connectors
- PC19.** assist in installing, terminating, earthing, labeling, and testing coaxial, Ethernet, feeder, and optical fiber cables
- PC20.** assist in the installation and testing of Outdoor Units (ODUs), splitters, and Customer Premises Equipment (CPE)
- PC21.** check the 3G/4G/5G wireless system is installed per approved design and is operational
- PC22.** use compass, GPS receiver, range finder, and other required tools as instructed
- PC23.** assist in labelling, grounding, and conducting sweep testing
- PC24.** carry out Passive Intermodulation (PIM) and sweep testing under supervision
- PC25.** assist technicians and Instrumentation & Control (I&C) engineers in rectifying installation issues

Assist in performing Line of Sight (LOS) check

To be competent, the user/individual on the job must be able to:

- PC26.** assist in conducting LOS checks to prevent signal drop or termination
- PC27.** identify potential causes of signal loss (e.g., faulty cables, incorrect network configuration, device failure)
- PC28.** follow corrective measures to restore LOS and mitigate obstructions (e.g., radio noise, mechanical interference)

Assist in shelter room installations

To be competent, the user/individual on the job must be able to:

- PC29.** assist shelter room installations as per supervisor's instructions
- PC30.** perform cabling and conduct tests to verify equipment functionality
- PC31.** assist in troubleshooting and resolving equipment malfunctions

Assist in completing documentation

To be competent, the user/individual on the job must be able to:

- PC32.** assist in collecting and document equipment details for tower installations
- PC33.** assist in preparing survey reports and documentation for client handover

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the importance of adhering to safety guidelines during rigging operations and working at heights
- KU2.** the appropriate Personal Protective Equipment (PPE) and fall protection systems for working on different telecom structures (e.g., guyed towers, lattice towers, monopoles)
- KU3.** the process of conducting Job Hazard Assessment (JHA) and following Standard Operating Procedures (SOPs) to ensure safety and efficiency
- KU4.** the relevant installation tools, materials, and equipment, and how to inspect and maintain them
- KU5.** the process of determining the scope of installation work by analyzing blueprints, schematics, and as-built site plans
- KU6.** the importance of client requirements and how to align installation work accordingly
- KU7.** the importance of client requirements and how to align installation work accordingly
- KU8.** the assembly and installation of telecom equipment such as antennas, feeders, microwave dishes, masthead amplifiers (MHAs), and Remote Radio Units (RRUs)
- KU9.** the process of erecting and securing telecom structures (steel towers, monopoles, masts, and cable trays) to support equipment installation
- KU10.** the correct methods for installing and terminating telecom cables, including coaxial, Ethernet, hybrid feeder systems, and optical fiber cables
- KU11.** the process of labelling, grounding, waterproofing, and securing telecom cables
- KU12.** the fundamentals of Radio Frequency (RF) systems, including preparing RF connectors, jumpers, and external RF hardware
- KU13.** the process of installing, aligning, and testing RF antenna systems and transmission lines
- KU14.** the methods for setting the correct azimuth, tilt, roll, and height of antennas using alignment tools
- KU15.** the installation and link planning for microwave transmission systems, including VHF and UHF antennas
- KU16.** the use of cable and antenna analyzers for testing cellular networks (3G/4G/5G, WLAN, WLL)
- KU17.** the process of conducting sweep testing, Passive Intermodulation (PIM) testing, and rectifying installation issues
- KU18.** the importance of ensuring the wireless system functions as per design and troubleshooting signal losses or network disruptions
- KU19.** the process of measuring and verifying LOS (Line of Sight) to prevent signal drops or interference
- KU20.** the installation and testing of shelter room equipment, including cabling, power systems, and network devices
- KU21.** the process of installing and testing Outdoor Units (ODUs), splitters, and CPE
- KU22.** the importance of documenting equipment details for tower installations
- KU23.** the process of preparing survey reports and documentation for client handover
- KU24.** the use of GPS, compass, range finder, and other surveying tools for installation validation

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records as instructed
- GS2.** follow basic technical instructions from supervisors and engineers
- GS3.** read and interpret simple site plans and work-related documents
- GS4.** communicate clearly with the team and escalate issues when required
- GS5.** organize tasks as per work priority and supervisor's instructions
- GS6.** work collaboratively with coworkers to complete assigned tasks efficiently
- GS7.** identify minor issues and seek guidance for resolution
- GS8.** respond promptly to safety alerts and emergencies
- GS9.** adapt to new tools, techniques, and installation practices as trained
- GS10.** follow workplace safety and compliance regulations

TEL/N6323: Assist in the Maintenance, Upgrade and Decommissioning of Telecom Equipment and Sites

Description

This unit covers the maintenance, upgradation, and decommissioning of telecom infrastructure, including telecom towers, antennas, cabling, and network equipment for 5G and legacy networks.

Scope

The scope covers the following :

- Assist in carrying out preventive maintenance
- Assist in carrying out corrective maintenance and site upgrade
- Assist in decommissioning and recovery of telecom equipment

Elements and Performance Criteria

Assist in carrying out preventive maintenance

To be competent, the user/individual on the job must be able to:

- PC1.** check telecom towers, structures, and components for corrosion, wind-induced vibrations, or mechanical damage
- PC2.** check and secure bolts, brackets, and structural fasteners to ensure equipment stability
- PC3.** verify the protective casing of telecom equipment and identify signs of wear, cracks, or damage
- PC4.** replace defective casings, connectors, or mounts as per standard operating procedures
- PC5.** identify and correct misalignment of antennas, microwave dishes, and feeder cables
- PC6.** follow the standard preventive maintenance checklist to ensure compliance with maintenance schedules

Assist in carrying out corrective maintenance and site upgrade

To be competent, the user/individual on the job must be able to:

- PC7.** assist in conducting visual and physical audits of rigging installations, antennas, and support structures
- PC8.** check the operational status of telecom transmission lines, RRUs, power units, and backup systems
- PC9.** use appropriate safety gear and tools, such as tower ladders, boom lifts, and harnesses, to access telecom structures
- PC10.** identify and report damage to fiber-optic cables, hybrid cables, and waveguides
- PC11.** assist in measuring and troubleshooting signal loss or interference using Distance-To-Fault (DTF) analyzers
- PC12.** assist in installing or replacing 3G/4G/5G network components, as per site requirements
- PC13.** carry out regular maintenance of telecom equipment and structures using the appropriate maintenance tools and equipment
- PC14.** handle and organize cables, jumpers, and accessories for structured and safe installations

Qualification Pack

- PC15.** assist in the maintenance and upgrade of telecom structures, such as steel towers, poles, masts and cable tray installations
- PC16.** assist in upgrading existing wireless telecom sites and equipment, as per the requirement
- PC17.** assist in documenting maintenance and repair activities in logs or digital systems

Assist in decommissioning and recovery of telecom equipment

To be competent, the user/individual on the job must be able to:

- PC18.** assist in dismantling antennas, panel mounts, feeder cables, and ancillary telecom components
- PC19.** recover decommissioned telecom equipment and cabling, including panel antennas, head frames, hybriflex cables, feeder cables, earthing, cable trays, Remote Radio Units (RRUs), etc.
- PC20.** assist in decommissioning and dismantling redundant telecom equipment, cabling and structures, following technical and safety guidelines
- PC21.** follow site decommissioning plans, ensuring minimal disruption to existing network operations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** industry standards and procedures for preventive and corrective maintenance of telecom towers and structures
- KU2.** common structural issues in telecom infrastructure, such as rusting, fatigue, and wind-induced vibrations
- KU3.** types of antennas, microwave dishes, feeder cables, and their alignment requirements
- KU4.** methods to secure and maintain telecom structures, including torque settings for bolts and mounts
- KU5.** safety protocols for working at heights, including PPE usage, anchor points, and fall protection systems
- KU6.** tools and techniques for testing and troubleshooting signal transmission faults, including Distance-To-Fault (DTF) and Return Loss measurements
- KU7.** procedures for handling, installing, and replacing fiber-optic and hybriflex cables
- KU8.** process of network upgrades, including adding or replacing 5G/legacy network components
- KU9.** standard processes for decommissioning telecom sites, including equipment removal and material disposal
- KU10.** documentation requirements for maintenance, fault reporting, and equipment recovery

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain accurate records of maintenance, repairs, and decommissioning activities
- GS2.** read work instructions, equipment manuals, and safety guidelines

Qualification Pack

- GS3.** communicate clearly with the supervisor and team members regarding tasks and safety measures
- GS4.** listen actively to understand work assignments and troubleshooting instructions
- GS5.** follow a systematic approach to plan and execute maintenance tasks
- GS6.** identify and report potential safety hazards or structural concerns
- GS7.** use basic arithmetic and measurement skills to ensure precision in installation and alignment
- GS8.** adapt to new tools, technologies, and processes in telecom maintenance
- GS9.** work effectively under time constraints while ensuring safety and quality
- GS10.** follow environmental and waste management guidelines for telecom equipment disposal

Qualification Pack

TEL/N6246: Follow the Occupational Health and Safety Instructions during Tower Climbing

Description

This unit is about adhering to occupational health and safety guidelines while performing tower climbing tasks to ensure personal safety and compliance with industry standards.

Scope

The scope covers the following :

- Conduct pre-climb tower inspection
- Check safety equipment and assess work site conditions
- Execute tower operations following health and safety protocols

Elements and Performance Criteria

Conduct pre-climb tower inspection

To be competent, the user/individual on the job must be able to:

- PC1.** conduct a visual assessment of the tower using binoculars to check for loose or missing hardware, rust, or structural damage, and ensure necessary repairs are completed before climbing
- PC2.** identify and mitigate climbing obstructions and hazards, such as bird nests, insect infestations, or external attachments
- PC3.** inspect turnbuckles for proper installation and ensure guy wires are tensioned within recommended limits for guyed towers
- PC4.** examine guy preforms, thimbles, and anchor points for signs of corrosion, fraying, or mechanical damage
- PC5.** verify the tower's verticality using a plumb line or inclinometer to detect structural misalignment due to environmental or load stress
- PC6.** report identified tower defects to the relevant authority and confirm corrective actions are implemented before proceeding with climbing tasks

Check safety equipment and assess work site conditions

To be competent, the user/individual on the job must be able to:

- PC7.** inspect ladders, hoisting and rigging equipment, and essential tools to confirm operational readiness and compliance with safety standards
- PC8.** check the condition and availability of Personal Protective Equipment (PPE), including a full-body harness, lanyards, climbing helmets, gloves, and anti-slip boots
- PC9.** verify that a fully stocked first aid kit is accessible at the work site
- PC10.** measure radio frequency (RF) exposure levels using an RF detector to ensure compliance with regulatory limits
- PC11.** identify potential electrical hazards, including proximity to high-voltage power lines, and coordinate necessary precautions

Qualification Pack

- PC12.** collaborate with relevant personnel to conduct a Job Hazard Analysis (JHA) and formulate an Emergency Action Plan (EAP)
- PC13.** identify and report unsafe conditions at the work site to the appropriate authority and document corrective actions taken
- PC14.** assess weather conditions using meteorological data and avoid work during thunderstorms, high winds, or adverse environmental conditions
- PC15.** measure wind velocity using an anemometer and ensure work is conducted within permissible wind speed limits
- PC16.** ensure vehicles, machinery, and equipment are positioned at a safe distance from tower structures and live power lines

Execute tower operations following health and safety protocols

To be competent, the user/individual on the job must be able to:

- PC17.** register at the work site and adhere to safety guidelines before commencing tower climbing
- PC18.** secure a full-body harness to designated anchor points and maintain 100% tie-off at all times
- PC19.** utilize a safety cable climb system or double lanyards while ascending, descending, and moving on the tower
- PC20.** use appropriate PPE as per manufacturer guidelines to ensure maximum protection
- PC21.** follow standard tower climbing procedures to prevent falls, slips, or unexpected incidents
- PC22.** maintain continuous communication with the ground crew using a two-way radio
- PC23.** report any health impairments, such as dizziness or fatigue, and cease tower work if under the influence of medication that may affect concentration
- PC24.** work at a safe distance from live power lines or coordinate with authorities to de-energize electrical lines when necessary
- PC25.** place appropriate warning signs near live electrical zones to alert coworkers and prevent accidents
- PC26.** ensure compliance with industry safety regulations and worksite protocols throughout the climbing operation
- PC27.** administer basic first aid for injuries and medical emergencies at the worksite
- PC28.** assist in preparing incident reports by providing accurate details about workplace hazards, injuries, or accidents

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** industry best practices for safe tower climbing and fall protection techniques
- KU2.** the importance of maintaining well-serviced and certified safety equipment before tower operations
- KU3.** essential PPE requirements, including harness types, lanyards, helmets, gloves, and anti-slip boots
- KU4.** procedures for checking and maintaining first aid kits at work sites
- KU5.** effective communication protocols using two-way radios during tower climbing activities
- KU6.** basic first aid techniques applicable to tower climbing incidents
- KU7.** methods for identifying, documenting, and reporting unsafe worksite conditions

Qualification Pack

- KU8.** pre-use inspections of PPE, tools, hoisting, and rigging equipment to ensure compliance with safety standards
- KU9.** steps for conducting a Job Hazard Analysis (JHA) and developing an Emergency Action Plan (EAP)
- KU10.** methods for assessing weather conditions and determining when to halt tower climbing operations
- KU11.** risks associated with impaired physical health while working at heights and the impact of medication on concentration
- KU12.** the significance of ongoing safety training and competency enhancement for tower climbers
- KU13.** electrical hazard mitigation strategies and adherence to workplace electrical safety regulations
- KU14.** recommended climbing techniques for different types of telecom towers and related steel structures
- KU15.** industry-specific safety regulations, such as OSHA and local occupational health standards
- KU16.** procedures for preparing and reviewing incident reports to mitigate future risks

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain accurate records of safety inspections, incidents, and maintenance logs
- GS2.** read and interpret safety manuals, regulatory updates, and standard operating procedures
- GS3.** communicate effectively with team members and supervisors regarding safety concerns and work progress
- GS4.** listen attentively to instructions to ensure compliance with safety guidelines
- GS5.** organize and prioritize tasks to complete tower climbing activities safely and efficiently
- GS6.** identify and implement appropriate solutions to safety-related worksite challenges
- GS7.** make quick and informed decisions during emergencies, such as extreme weather or equipment failure
- GS8.** adapt to evolving safety protocols and technology advancements in tower climbing operations
- GS9.** demonstrate situational awareness to recognize potential hazards and prevent accidents
- GS10.** collaborate with coworkers and safety personnel to maintain a risk-free work environment

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Conduct pre-climb tower inspection</i>	6	10	-	6
PC1. conduct a visual assessment of the tower using binoculars to check for loose or missing hardware, rust, or structural damage, and ensure necessary repairs are completed before climbing	1	2	-	1

PC7. inspect ladders, hoisting and rigging equipment, and essential tools to confirm operational readiness and compliance with safety standards	2	3	-	0.5
PC8. check the condition and availability of Personal Protective Equipment (PPE), including a full-body harness, lanyards, climbing helmets, gloves, and anti-slip boots	2	3	-	0.5
PC9. verify that a fully stocked first aid kit is accessible at the work site	1	3	-	0.5

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC10. measure radio frequency (RF) exposure levels using an RF detector to ensure compliance with regulatory limits	1	2	-	0.5
PC11. identify potential electrical hazards, including proximity to high-voltage power lines, and coordinate necessary precautions	1	2	-	0.5
PC12. collaborate with relevant personnel to conduct a Job Hazard Analysis (JHA) and formulate an Emergency Action Plan (EAP)	1	2	-	0.5
PC13. identify and report unsafe conditions at the work site to the appropriate authority and document corrective actions taken	1	2	-	0.5
PC14. assess weather conditions using meteorological data and avoid work during thunderstorms, high winds, or adverse environmental conditions	1	1	-	0.5
PC15. measure wind velocity using an anemometer and ensure work is conducted within permissible wind speed limits	1	1	-	0.5
PC16. ensure vehicles, machinery, and equipment are positioned at a safe distance from tower structures and live power lines	1	1	-	0.5
<i>Execute tower operations following health and safety protocols</i>	12	20	-	9
PC17. register at the work site and adhere to safety guidelines before commencing tower climbing	1	2	-	0.5
PC18. secure a full-body harness to designated anchor points and maintain 100% tie-off at all times	1	2	-	0.5
PC19. utilize a safety cable climb system or double lanyards while ascending, descending, and moving on the tower	1	3	-	0.5
PC20. use appropriate PPE as per manufacturer guidelines to ensure maximum protection	1	3	-	0.5

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC21. follow standard tower climbing procedures to prevent falls, slips, or unexpected incidents	1	3	-	0.5
PC22. maintain continuous communication with the ground crew using a two-way radio	1	1	-	0.5
PC23. report any health impairments, such as dizziness or fatigue, and cease tower work if under the influence of medication that may affect concentration	1	1	-	1
PC24. work at a safe distance from live power lines or coordinate with authorities to de-energize electrical lines when necessary	1	1	-	1
PC25. place appropriate warning signs near live electrical zones to alert coworkers and prevent accidents	1	1	-	1
PC26. ensure compliance with industry safety regulations and worksite protocols throughout the climbing operation	1	1	-	1
PC27. administer basic first aid for injuries and medical emergencies at the worksite	1	1	-	1
PC28. assist in preparing incident reports by providing accurate details about workplace hazards, injuries, or accidents	1	1	-	1

TEL/N9105: Follow sustainable practices in telecom infrastructure installation

Description

This unit covers sustainable practices in telecom infrastructure installation. It includes identifying components for recycling or refurbishment, ensuring compliance with environmental standards, and promoting sustainability during installation and repair processes.

Scope

The scope covers the following :

- Segregate recyclable and refurbishable components
- Dispose of waste
- Use Energy-Efficient Methods
- Follow environmental standards and compliance guidelines
- Guide team members

Elements and Performance Criteria

Segregate recyclable and refurbishable components

To be competent, the user/individual on the job must be able to:

- PC1.** identify telecom components suitable for recycling or refurbishment
- PC2.** sort electronic and non-electronic waste based on disposal protocols
- PC3.** label and store recyclable and refurbishable components separately

Dispose of waste

To be competent, the user/individual on the job must be able to:

- PC4.** follow approved procedures for the safe disposal of hazardous and non-hazardous waste
- PC5.** coordinate with authorized e-waste recycling units or certified disposal agencies
- PC6.** handle batteries, cables, and electronic circuits safely to prevent environmental hazards

Use Energy-Efficient Methods

To be competent, the user/individual on the job must be able to:

- PC7.** select and use energy-efficient tools and equipment during telecom installations
- PC8.** apply best practices to minimize energy consumption
- PC9.** position and install telecom infrastructure to optimize efficiency and sustainability

Follow environmental standards and compliance guidelines

To be competent, the user/individual on the job must be able to:

- PC10.** adhere to national and international environmental regulations for telecom infrastructure installation
- PC11.** maintain records of waste disposal, recycling, and sustainability measures
- PC12.** assist in periodic audits to assess compliance with green standards
- PC13.** follow workplace sustainability protocols and report non-compliance

Qualification Pack

Guide team members

To be competent, the user/individual on the job must be able to:

PC14. guide team members on sustainable telecom installation guidelines and practices

PC15. encourage environmentally responsible work habits

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. the national and international environmental laws and regulations

KU2. e-waste management and recycling policies

KU3. occupational safety and health standards related to environmental practices

KU4. the types of recyclable and refurbishable telecom components

KU5. methods for reducing electronic waste through responsible procurement and reuse

KU6. advancements in eco-friendly telecom infrastructure

KU7. techniques for optimizing energy consumption in telecom operations

KU8. use of renewable energy sources in telecom infrastructure

KU9. best practices for reducing the carbon footprint of telecom installations

KU10. identification and proper disposal methods for hazardous and non-hazardous waste

KU11. the procedures for handling, storing, and transporting waste materials safely

KU12. how to collaborate with authorized agencies for effective waste collection and disposal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. communicate effectively with team members to ensure adherence to sustainable practices

GS2. follow written instructions for waste segregation, disposal, and energy-efficient installations

GS3. use problem-solving skills to address sustainability challenges in telecom installations

GS4. apply numerical skills to track and record environmental compliance data

GS5. organize tasks efficiently to minimize resource wastage and environmental impact

GS6. adapt to new sustainable technologies in telecom infrastructure

GS7. work collaboratively with authorized agencies to ensure proper e-waste disposal

GS8. maintain safety protocols while handling hazardous materials

Qualification Pack

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(**Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
