Qualification Pack

TNSD/LSC/N0106: Compliance to health, safety and security norms of Junior Supervisor - IoT Application (Supply Chain)

Description

This unit is about ensuring compliance with health, safety and security procedures at the workplace.

Scope

The scope covers the following :

- This unit covers health, safety and security procedures.
- Ensure compliance to health, safety and security.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrates the ability to implement safety protocols and procedures when working with IoT devices and systems.
- PC2.** Ensures strict adherence to health, safety, and security regulations relevant to IoT applications.
- PC3.** Conducts comprehensive risk assessments to identify potential hazards and security vulnerabilities.
- PC4.** Demonstrates proficiency in responding to health, safety, and security emergencies related to IoT technology.
- PC5.** Provides safety training and awareness programs for IoT users and personnel.
- PC6.** Encourages the reporting of safety incidents and security breaches and ensures they are addressed promptly.
- PC7.** Implements robust data security measures to protect sensitive information within IoT applications.
- PC8.** Promotes the efficient use of resources, including energy and materials, to reduce environmental impact.
- PC9.** Conducts security audits and assessments regularly to ensure compliance and identify areas for improvement.
- PC10.** Fosters a culture of safety and security awareness within the organization and among stakeholders.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Safety Culture: Fostering a Culture of safety throughout the Organization by prioritizing the well-being of employees and stakeholders.
- KU2.** Regulatory Adherence: Ensuring That all IoT applications and equipment Comply with industry-specific health, safety, and security regulations.

Qualification Pack

- KU3.** Safety Training: Providing regular safety training and awareness programs to IoT Application Executives and Personnel involved in logistics and supply chain operations.
- KU4.**
- Incident Response Planning: Developing comprehensive incident response plans to address health, safety, and security incidents promptly and effectively.
- KU5.**
- Safety Audits and Inspections: Conducting regular safety audits and Inspections to identify and rectify potential hazards and security vulnerabilities.
- KU6.** Environmental Responsibility: Integrating environmental responsibility into health and safety practices, considering sustainability and minimizing environmental impact in logistics and supply chain operations.
- KU7.** Knowledge of safety protocols and procedures specific to IoT applications and supply chain operations.
- KU8.** Understanding and ensuring compliance with health, safety, and security regulations relevant to IoT logistics and supply chain management.
- KU9.** Proficiency in conducting risk assessments to identify potential hazards and security risks and implementing mitigation measures.
- KU10.** Developing and practicing emergency response plans to address health, safety, and security incidents effectively.
- KU11.** Implementing security measures and access controls to safeguard IoT devices, data, and supply chain assets.
- KU12.** Competence in assessing the environmental impact of IoT applications and ensuring that safety practices align with sustainability goals and environmental norms.
- KU13.** Use of computer and associated equipment
- KU14.** Basic troubleshooting regarding IoT user Devices and computers
- KU15.** Data analysis
- KU16.** Report preparation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** written instructions
- GS2.** IoT Device instructions
- GS3.** IoT Devices tags and labels
- GS4.** various report and notes
- GS5.** write damage reports and daily output reports
- GS6.** generate daily reports from Management Information System (MIS)
- GS7.** Develop presentations on operational trends
- GS8.** communicate with supervisors and co-workers
- GS9.** collect information from supervisors, associates and peers
- GS10.** conduct basic checks and verify the accuracy of the data provided
- GS11.** identify errors in data reporting in ERP and resolve the same or escalate if required

Qualification Pack

- GS12.** draw inferences and conclusions based on trend analysis Plan and organize: The user / individual on the job needs to know how to
- GS13.** Maintain punctuality
- GS14.** plan for timely collection of information from supervisors and associates
- GS15.** organise the data to streamline data entry processes
- GS16.** be a team player and achieve joint goals.
- GS17.** adhere to customer timelines
- GS18.** address urgency of customers
- GS19.** speak politely with customers and take their feedback constructively
- GS20.** identify common trends as per analysis and report the same to management
- GS21.** suggest possible solutions for the common issues in daily operations identified based on information
- GS22.** verify the accuracy of the data and apply filters before updating the data into ERP.
- GS23.** verify the authenticity of the data and apply filters to remove aberrations in the data
- GS24.** analyses trends to identify defaults for corrective action as needed
- GS25.** observe the data to identify aberrations in the same
- GS26.** Cross check data to check for data gaps and mistakes in reporting

Qualification Pack

TNSD/LSC/N0104: Basic skills and Best Security Practices for Junior Supervisor - IoT Application (Supply Chain)

Description

The unit, "Basic Skills and Best Security Practices for Junior Supervisor - IoT Application (Supply Chain)," equips professionals with fundamental knowledge and techniques for securing IoT solutions in the logistics and supply chain domain. Participants will learn essential cyber security principles and strategies to safeguard sensitive data, devices, and operations while implementing IoT technologies effectively.

Scope

The scope covers the following :

- This unit covers foundational security concepts, including encryption, authentication, and access control, tailored to the specific needs of IoT applications in logistics and supply chain management.
- Participants will gain a practical understanding of threat detection and mitigation, enabling them to proactively address security challenges and minimize risks associated with IoT deployments in the industry.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrates a strong awareness of IoT security threats and risks.
- PC2.** Adheres to security policies, protocols, and best practices in IoT applications.
- PC3.** Identifies potential security vulnerabilities and assesses associated risks.
- PC4.**
 - Implements effective access control mechanisms to protect
 - IoT devices and data.
- PC5.**
 - Ensures data transmitted and stored by IoT devices is encrypted to protect against unauthorized
 - access.
- PC6.** Implements robust user authentication methods to ensure only authorized individual scan access IoT systems.
- PC7.** Demonstrates the ability to respond effectively to security incidents and breaches.
- PC8.** Keeps IoT systems and devices up-to-date with security patches and updates.
- PC9.** Provides security training and awareness programs for IoT users and staff.
- PC10.** Ensures compliance with data privacy regulations and respects user data privacy rights.
- PC11.** Maintains audit trails and logs for monitoring and analyzing security events.
- PC12.** Evaluates and selects IoT vendors based on their security practices and track record.
- PC13.** Maintains comprehensive security documentation, including policies and procedures.
- PC14.** Conducts regular security testing and assessments of IoT systems and devices.
- PC15.** Actively seeks opportunities for security enhancement and follows a continuous improvement approach.

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Aligning security practices with industry- specific standards and regulations applicable to IoT applications.
- KU2.** Collaborating with IT, cybersecurity, and other departments to ensure a holistic approach to security.
- KU3.** Conducting risk assessments to identify vulnerabilities and threats with in the organization's IoT ecosystem.
- KU4.** Enforcing security policies and protocols consistently across all IoT applications and devices.
- KU5.** Establishing a well- defined incident response framework to address security breaches and vulnerabilities promptly.
- KU6.** Promoting culture of security awareness by providing training and resources to Junior Supervisor - IoT Application (Supply Chain) and other stakeholders within the organization.
- KU7.** Understanding the core principles of IoT security, including authentication, encryption, and access control
- KU8.** Knowledge of techniques for detecting and preventing IoT-specifics security threats and vulnerabilities.
- KU9.** Proficiency in securing IoT networks, including wireless communication protocols and data transmission.
- KU10.** Skills in managing and configuring IoT devices securely, including firmware updates and access management.
- KU11.** Familiaritywithsecuritytools, such as intrusion detection systems (IDS) and security information and event management (SIEM) solutions.
- KU12.** Knowledge of industry-specific security standards and compliance requirements relevant to IoT applications and data protection.
- KU13.**
 - Use of computer and associated equipment
 - KB8 - Basic trouble shooting regarding IoT user devices and computers
- KU14.** Data analysis
- KU15.** Reportpreparation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** written instructions
- GS2.** IoT Device instructions
- GS3.** IoT Devices tags and labels
- GS4.** various reports and notes
- GS5.** write damage reports and daily output reports
- GS6.** enerate daily reports from Management Information System (MIS)
- GS7.** Develop presentations on operational trends
- GS8.** communicate with supervisors and co-workers
- GS9.** collect information from supervisors, associates and peers
- GS10.** conduct basic checks and verify the accuracy of the data provided

Qualification Pack

- GS11.** identify errors in data reporting in ERP and resolve the same or escalate if required
- GS12.** draw inferences and conclusions based on trend analysis
- GS13.** Maintain punctuality
- GS14.** Plan for timely collection of information from supervisors and associates
- GS15.** Organize the data to streamline data entry processes
- GS16.** Be a team player and achieve joint goals.
- GS17.** Adhere to customer timelines
- GS18.** Address urgency of customers
- GS19.** Speak politely with customers and take their feedback constructively
- GS20.** identify common trends as per analysis and report the same to management
- GS21.** suggest possible solutions for the common issues in daily operations identified based on information
- GS22.** verify the accuracy of the data and apply filters before updating the data into ERP.

TNSD/LSC/N0105: Guidelines on integrity and ethics of Junior Supervisor - IoT Application (Supply Chain) in Logistics and Supply chain

Description

The unit, "Basic Skills and Best Security Practices for Junior Supervisor - IoT Application (Supply Chain)," equips professionals with fundamental knowledge and techniques for securing IoT solutions in the logistics and supply chain domain. Participants will earn essential cyber security principles and strategies to safeguard sensitive data, devices, and operations while implementing IoT technologies effectively.

Scope

The scope covers the following :

- This unit covers foundational security concepts, including encryption, authentication, and access control, tailored to the specific needs of IoT applications in logistics and supply chain management.
- Participants will gain a practical understanding of threat detection and mitigation, enabling them to proactively address security challenges and minimize risks associated with IoT deployments in the industry.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrates a strong awareness of ethical issues and dilemmas in IoT applications with in logistics and supply chain management.
- PC2.** Makes ethical decisions when faced with complex situations involving IoT technology and data.
- PC3.** Maintains transparency in IoT operations and communicates potential ethical challenges openly.
- PC4.** Takes responsibility for the ethical Implications of IoT applications with in the supply chain.
- PC5.** Ensures compliance with data privacy regulations and respects the rights of data subjects.
- PC6.** Resolves ethical conflicts and dilemmas within the organization in a fair and ethical manner.
- PC7.** Builds and maintains trust with stakeholders by upholding high ethical standards.
- PC8.** Implements measures to protect whistle blowers whose report unethical behavior or violations.
- PC9.** Adheres to industry-specific ethical guidelines and regulatory requirements.
- PC10.** Integrates sustainability principles into IoT applications to minimize environmental impact.
- PC11.** Integrates sustainability principles into IoT applications to minimize environmental impact.
- PC12.** Demonstrates ethical leadership by setting an example for team members and peers.
- PC13.** Takes into account social responsibility and community impact when deploying IoT solutions.
- PC14.** Actively seeks opportunities to enhance ethical practices within IoT applications.
- PC15.** Encourages the reporting of ethical concerns and incidents and ensures they are addressed appropriately.

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Establishing a clear ethical frame work that aligns with the organization's values and principles.
- KU2.** Promoting accountability among Junior Supervisor - IoT Application (Supply Chain) for upholding integrity and ethics in their roles.
- KU3.** Encouraging ethical decision- making processes, particularly in situations involving data privacy and sensitive information.
- KU4.** Ensuring that IoT applications and data handling adhere to legal standards and industry-specific regulations.
- KU5.** Providing ongoing training and education on ethical considerations and dilemmas specific to IoT in logistics and supply chain operations.
- KU6.** Establishing mechanisms for employees to report ethical concerns and ensuring protection for whistle blowers who report violation sin good faith.
- KU7.** Understanding data privacy laws and regulations relevant to IoT applications and ensuring the protection of sensitive information.
- KU8.** Knowledge of ethical data collection, storage, and sharing practices to maintain integrity and respect user privacy.
- KU9.** Familiarity with decision-making frame works that incorporate ethical considerations into IoT-related choices.
- KU10.** Understanding the basic ethical implications in AI and machine learning algorithms used in logistics and supply chain IoT applications.
- KU11.** Knowledge of how to maintain transparency and ethical behavior through out the supply chain, especially when IoT technology is involved.
- KU12.** Knowing how to establish and maintain mechanisms for reporting ethical concerns and violations within IoT applications and supply chain operations.
- KU13.** Use of computer and associated equipment
- KU14.** Basic trouble shooting regarding IoT user devices and computers
- KU15.** Dataanalysis
- KU16.** Report preparation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** written instructions
- GS2.** IoT Device instructions

TNSD/LSC/N0103: IoT user equipment for supply chain gadgets - documentation

Description

The unit, "Operations of IoT User Equipment for Supply Chain Gadgets - Documentation," focuses on the essential aspect of maintaining detailed records and documentation related to the deployment, maintenance, and performance of IoT devices in supply chain operations. Students will learn to create comprehensive documentation that ensures transparency, troubleshooting efficiency, and regulatory compliance in this critical field.

Scope

The scope covers the following :

- This unit emphasizes the development of structured documentation practices, including device specifications, maintenance logs, and troubleshooting guides for IoT equipment in supply chain settings.
- Students will gain the skills necessary to create comprehensive records that not only facilitate efficient device management but also support quality assurance, compliance, and process optimization within supply chain

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** The documentation is comprehensive, covering all aspects of IoT user equipment and supply chain gadget operations.
- PC2.** Instructions and procedures are Presented clearly, facilitating easy Understanding for end-users.
- PC3.** The Documentation accurately reflects the technical specifications and configurations of IoT devices
- PC4.** The documentation maintains a consistent format, style, and terminology throughout
- PC5.** Visual aids, such as diagrams and illustrations, enhance the clarity and effectiveness of the documentation
- PC6.** The documentation uses user-friendly language and avoids technical jargon whenever possible.
- PC7.** Safety guidelines and compliance information are included ensuring safe and compliant use of IoT equipment
- PC8.** Troubleshooting steps and solutions are Provided to assist users in resolving common issues
- PC9.** The documentation is version-controlled to track updates and revisions accurately
- PC10.** The documentation is accessible to all relevant stakeholders, including those with disabilities
- PC11.** Information is organized logically, making it easy for users to locate specific details.
- PC12.** Cross- referencing is used to link related sections and facilitate navigation.
- PC13.** A revision history log is maintained to track changes made to the documentation over time.
- PC14.** User feedback is considered and integrated into documentation improvements.

Qualification Pack

PC15. The documentation undergoes quality assurance checks to ensure accuracy and effectiveness.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Aligning documentation standards with organizational guidelines to maintain consistency and clarity.
- KU2.** Ensuring that documentation is easily accessible to all relevant stakeholders within the supply chain.
- KU3.** Adhering to industry-specific compliance and regulatory documentation requirements.
- KU4.** Implementing a process for regularly updating documentation to reflect changes in equipment and processes.
- KU5.** Encouraging collaboration among different departments to create comprehensive and cross functional documentation.
- KU6.** Providing documentation as a valuable resource for training new personnel and supporting ongoing skill development related to IoT equipment and supply chain gadgets
- KU7.** Ensuring that all technical details and information provided in the documentation are accurate and up-to- date.
- KU8.** Structuring the documentation in a clear and organized manner, using easy-to-understand language and visuals.
- KU9.** Implementing version control practices to track revisions and ensure users have access to the most current documentation.
- KU10.** Tailoring documentation to the needs and skilllevels of the end-users, whether they are technicians, operators, or other personnel.
- KU11.** Making documentation readily accessible to all relevant individuals and departments within the supply chain organization.
- KU12.** Includingcross-references and indexes to enable users to quickly find relevant information and navigate the documentation effectively.
- KU13.** Use of computer and associated equipment
- KU14.** Basic trouble shooting regarding IoT user devices and computers
- KU15.** Dataanalysis
- KU16.** Reportpreparation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** written instructions .
- GS2.** IoT Device instructions
- GS3.** IoT Devices tags and labels
- GS4.** various reportsand notes
- GS5.** write damage reports and daily output reports

Qualification Pack

- GS6.** generate daily reports from Management Information System (MIS)
- GS7.** Develop presentations on operational trends
- GS8.** communicate with supervisors and co-workers
- GS9.** collect information from supervisors, associates and peers
- GS10.** conduct basic checks and verify the accuracy of the data provided
- GS11.** identify errors in data reporting in ERP and resolve the same or escalate if required
- GS12.** draw inferences and conclusions based on trend analysis
- GS13.** Maintain punctuality
- GS14.** Plan for timely collection of information from supervisors and associates
- GS15.** Organize the data to streamline data entry processes
- GS16.** Be a team player and achieve joint goals.
- GS17.** Adhere to customer timelines
- GS18.** Address urgency of customers
- GS19.** Speak politely with customers and take their feedback constructively
- GS20.** identify common trends as per analysis and report the same to management
- GS21.** suggest possible solutions for the common issues in daily operations identified based on information
- GS22.** verify the accuracy of the data and apply filters before updating the data into ERP.
- GS23.** verify the authenticity of the data and apply filters to remove aberrations in the data
- GS24.** analyses trends to identify defaults for corrective action as needed
- GS25.** Observe the data to identify aberrations in the same
- GS26.** Cross check data to check for data gaps and mistakes in reporting
- GS27.** verify the accuracy of the data and apply filters before updating the data into ERP.
- GS28.** verify the accuracy of the data and apply filters before updating the data into ERP.
- GS29.** analyses trends to identify defaults for corrective action as needed
- GS30.** Observe the data to identify aberrations in the same
- GS31.** Cross check data to check for data gaps and mistakes in reporting

TNSD/LSC/N0102: Operations of IoT User Equipment with Supply chain gadgets

Description

The unit, "Operations of IoT User Equipment with Supply Chain Gadgets," explores the intricate workings of IoT user devices and their application within supply chain management. Students delve into device functionality, data collection methods, and the seamless integration of IoT gadgets to enhance supply chain efficiency and visibility.

Scope

The scope covers the following :

- This unit provides an in-depth understanding of IoT user equipment, covering device selection, configuration, and data handling specific to supply chain applications.
- Students will gain practical insights into the operational aspects of IoT gadgets, enabling them to effectively deploy and manage these devices within a supply chain environment, optimizing processes and enhancing data-driven decision-making.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrates proficiency in operating and maintaining IoT user equipment and supply chain gadgets.
- PC2.** Collects and analyzes data generated by IoT devices to monitor supply chain processes.
- PC3.** Configures IoT devices and gadgets to meet specific Supply chain requirements effectively
- PC4.** Identifies and resolves operational issues and malfunctions in IoT equipment and gadgets.
- PC5.** Ensures compliance with safety regulations and protocols while operating IoT devices.
- PC6.**
 - Implements
 - security protocols to safeguard IoT equipment and protect sensitive data.
- PC7.** Maintains accurate and up-to-date documentation for IoT user equipment and gadget operations.
- PC8.** Communicates operational status and data in sights to relevant stakeholders clearly.
- PC9.** Optimizes the performance of IoT equipment to enhance supply chain efficiency.
- PC10.** Presents IoT- generated data in a visually understand able format for decision-makers.
- PC11.** Implements predictive maintenance strategies to prevent equipment failures.
- PC12.** Monitors and reports on the environmental impact of IoT equipment operations.
- PC13.** Ensures efficient use of resources such as energy and materials in IoT operations.
- PC14.** Adheres to industry-specific regulations and compliance requirements in IoT operations.
- PC15.** Adheres to industry-specific regulations and compliance requirements in IoT operations.

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Integrating IoT user equipment in to the existing supply chain infrastructure for seamless operations.
- KU2.** Utilizing IoT-generated data to make informed decisions, optimize processes, and enhance supply chain efficiency.
- KU3.** Adhering to safety and compliance standard s while operating IoT equipment within the supply chain.
- KU4.** Maximizing resource efficiency, including energy and material usage, to reduce operational costs.
- KU5.** Monitoring and reporting on the environmental impact of IoT equipment operations to align with sustainability goals.
- KU6.** Collaborating with various departments and stakeholders to ensure IoT equipment operations align with organizational objectives and strategies.
- KU7.** Proficiency in operating and Setting up IoT user equipment and supply chain gadgets for specific operational requirements.
- KU8.** Knowledge of data collection methodologies and analytics tools used to monitor and optimize supply chain processes
- KU9.** Skills in maintaining and Trouble shoo3ting IoT equipment to ensure un interrupted operations.
- KU10.** Implementation of robust security protocols to safeguard IoT devices and data from cyber threats.
- KU11.** Ability to seamlessly integrate IoT devices and gadgets with existing supply chain management systems and software.
- KU12.** Competencein assessing and mitigating the environmental impact of IoT equipment operations, aligning with sustainability goals and regulations
- KU13.** Use of computer and associated equipment
- KU14.** Basic trouble
- KU15.** Data analysis
- KU16.** Report preparation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Written instructions
- GS2.** IoT Device instructions
- GS3.** IoT Devices tags and labels
- GS4.** various reports and notes
- GS5.** write damage reports and daily output reports
- GS6.** generate daily reports from Management Information System(MIS)
- GS7.** Develop presentations on operational trends
- GS8.** communicate with supervisors and co-workers
- GS9.** collect information from supervisors, associates and peers

Qualification Pack

- GS10.** conduct basic checks and verify the accuracy of the data provided
- GS11.** identify errors in data reporting in ERP and resolve the same or escalate if required
- GS12.** draw inferences and conclusions based on trend analysis
- GS13.** Maintain punctuality
- GS14.** Plan for timely collection of Information from supervisors and associates
- GS15.** Organize the data to streamline data entry processes
- GS16.** Be a team player and achieve joint goals
- GS17.** adhere to customer timelines
- GS18.** address urgency of customers
- GS19.** speak politely with customers and take their feedback constructively
- GS20.** Identify common trends as per analysis and report the same to management
- GS21.** suggest possible solutions for the common issues in daily operations identified based on information
- GS22.** Verify the accuracy of the data and apply filters before updating the data into ERP
- GS23.** Verify the authenticity of the data and apply filters to remove aberrations in the data
- GS24.** analyses trends to identify defaults for corrective action as needed
- GS25.** Observe the data to identify aberrations in the same
- GS26.** Cross check data to check for data gaps and mistakes in reporting

TNSD/LSC/N0101: Introduction To IoT User Devices And Junior Supervisor - IoT Application (Supply Chain)

Description

This unit "Introduction to IoT User Devices" explores the fundamentals of IoT technology and its practical applications, while " " delves into the strategic implementation of IoT solutions tailored to optimize and revolutionize the logistics and supply chain industry

Scope

The scope covers the following :

- Introduction to IoT User Devices "provides foundational knowledge about IoT principles, device types, and communication protocols.
- Junior Supervisor - IoT Application (Supply Chain)" focuses on fundamental IoT strategies specific to the logistics industry, including supply chain optimization, real-time tracking, and sustainability initiatives.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** • IoT Fundamentals Knowledge:
 - Demonstrates a strong understanding of core IoT concepts and principles.
- PC2.** Supply Chain Integration: Effectively integrates IoT technology into supply chain processes and operations.
- PC3.** Data Analysis Proficiency: Analyzes IoT-generated data to extract meaningful insights and drive data- driven decisions.
- PC4.** IoT Device Selection: Selects appropriate IoT devices and sensors for specific supply chain use cases.
- PC5.** Documentation Skills: Creates comprehensive documentation, including user manuals and equipment specifications.
- PC6.** Security Compliance: Ensures compliance with security standards and protocols when configuring and operating IoT devices.
- PC7.** Cross-functional Communication: Communicates IoT- related concepts and strategies effectively to diverse stakeholders.
- PC8.** Problem-solving Abilities: Identifies and addresses challenges related to IoT user devices and supply chain applications.
- PC9.** Strategic Alignment: Aligns IoT initiatives with the broader strategic goals and objectives of the organization.
- PC10.** Risk Assessment: Conducts risk Assessments for IoT deployments and proposes mitigation strategies.
- PC11.** Performance Metrics Evaluation: Evaluates the impact of IoT technology on supply chain performance using relevant metrics.
- PC12.** Vendor and Supplier Collaboration: Collaborates effectively with IoT solution providers, vendors, and suppliers.

Qualification Pack

- PC13.** Regulatory Compliance: Ensures adherence to industry- specific regulations and compliance requirements.
- PC14.** Continuous Improvement Initiatives: Initiates and implements improvements to enhance the efficiency and effectiveness of IoT applications in supply chain management.
- PC15.** Environmental Sustainability Consideration: Considers sustainability factors when deploying IoT solutions to minimize environmental impact.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Industry Specifics: Understanding the logistics and supply chain industry's unique challenges and requirements.
- KU2.** Technological Integration: Integrating IoT technology into existing supply chain processes and systems.
- KU3.** Data-Driven Decisions: Leveraging IoT data for informed decision-making and process optimization.
- KU4.** Safety and Security: Ensuring adherence to safety and security Protocols in IoT applications.
- KU5.** Sustainability Focus: Emphasizing sustainability goals and minimizing environmental impact.
- KU6.** Stakeholder Collaboration: Collaborating with various stakeholders, including vendors and partners, to achieve logistics and supply chain objectives.
- KU7.** Understanding the core principles and components of the Internet of Things (IoT).
- KU8.** Proficiency in configuring, monitoring, and maintaining IoT user devices
- KU9.** Knowledge of data collection, analysis, and visualization techniques for Optimizing supply chain operations.
- KU10.** Implementing robust security Protocols to protect IoT devices and data From cyber threats
- KU11.** Ability to seamlessly integrate IoT Solutions with existing logistics and Supply chain management systems.
- KU12.** Leveraging IoT technology to support sustainability initiatives and minimize environmental Impact with in the supply chain.
- KU13.** Use of computer and associated equipment
- KU14.** Basic trouble shooting regarding IoT user devices and computers
- KU15.** Data analysis
- KU16.** Report preparation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Written instructions
- GS2.** IoT Device instructions
- GS3.** IoT Device stages and tables
- GS4.** Various reports and notes
- GS5.** Write damage reports daily output reports

Qualification Pack

- GS6.** Generate daily reports from Management Information System (MIS)
- GS7.** Develop presentations on operational trends
- GS8.** Communicate with supervisors and co-workers
- GS9.** Collect information from supervisors, associates, and peers
- GS10.** Conduct basic checks and verify the accuracy of the data provided
- GS11.** Identify errors in data reporting in ERP and resolve the same or escalate if required
- GS12.** Draw inferences and conclusions based on trend analysis
- GS13.** Maintain punctuality
- GS14.** Plan for timely collection of information from supervisors and associates
- GS15.** Organize the data to streamline data entry processes
- GS16.** Be a team player and achieve joint goals

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Logo
Not
Available

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre (as per assessment criteria below)
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criterion
5. To pass the Qualification Pack, every trainee should score a minimum of 70% in each NOS
6. In case of unsuccessful completion, the trainee may seek re-assessment on the Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to

Qualification Pack

successfully clear the Qualification Pack assessment.)

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
