## Qualification Pack

### TSC/Q0306: Finished Package Checker-cum-Packer - Spinning

#### Brief Job Description

A Finished Package Checker-cum-Packer - Spinning is responsible for inspecting all the finished yarn packages after yarn winding process (cone, cheese, etc.), packing inspected yarn packages according to the package specifications and ensuring finished package is within the prescribed limit of weight variation by following the safety and security protocols in a spinning mill.

#### Personal Attributes

A Finished Package Checker-cum-Packer should have physical attributes like dexterity, coordination, motor skills, strength, stamina and handle heavy equipment. The Finished package checker-cum-packer should also have sensory attributes like hearing ability and vision (normal distance vision, colour vision, night vision, peripheral vision, depth perception and ability to change focus).

#### Applicable National Occupational Standards (NOS)

##### Compulsory NOS:

1. [TSC/N0320: Carryout shift change, cone inspection, and packing of finished cones in the packing department](#)
2. [TSC/N9015: Follow machine, safety, and organizational guidelines in textile sector](#)
3. [TSC/N9016: Follow teamwork, adaptability, and communication guidelines in textile sector](#)
4. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

##### Options(Not mandatory):

##### Option : Yarn Conditioning

A Finished Package Checker-cum-Packer - Yarn conditioning should be able to carry out manual conditioning of the finished cone packages using yarn conditioning plant by following the standard conditioning parameters in a spinning mill.

1. [TSC/N0321: Carryout batch loading, unloading and other responsibilities in yarn conditioning department](#)

## Qualification Pack

### TSC/N0320: Carryout shift change, cone inspection, and packing of finished cones in the packing department

#### Description

This unit is about performance criteria, knowledge and understanding and generic skills and abilities required to carryout shift change, cone inspection and packing of the finished cones as per the packing requirements in the packing department of a spinning mill.

#### Scope

The scope covers the following :

- Taking charge and handing over of shift in the packing department
- Checking the finished cone packages
- Preparation for cone packing
- Carryout packing of cones using carton box
- Carryout packing of cones using a hessian bag
- Carryout packing of cones using pallet
- Perform other responsibilities in the packing department

#### Elements and Performance Criteria

##### *Taking charge and handing over of shift in the packing department*

To be competent, the user/individual on the job must be able to:

- PC1.** report for the shift 10-15 minutes before the scheduled time with necessary operational tools
- PC2.** discuss with the previous shift packer and gather the shift details on production, count wise finished packages stock, colour coding, non-conforming packages, etc. as per the SOP
- PC3.** check the condition and availability of packing materials, equipment such as packing fixer, strapping machine, weigh scale, pallet wrapper, trolley, HDPE sack, twine, needle, strap, carton box, carton pads, PE covers, disk, packing slip, cone label, etc.
- PC4.** provide shift details to the incoming packer on production, availability of packing materials, running counts, availability of finished packages, etc.
- PC5.** complete the shift end jobs like writing production log report, waste collection, waste disposal, cleaning as per standard protocol
- PC6.** report the observed deviation to the incoming shift supervisor on production, maintenance, absenteeism, etc.
- PC7.** get clearance from the incoming packer and shift supervisor before leaving the shift

##### *Checking the finished cone packages*

To be competent, the user/individual on the job must be able to:

- PC8.** identify the finished cone packages to be inspected as per the given datasheet
- PC9.** transport the finished cone packages from the storage area to the inspection table using the trolley
- PC10.** inspect the finished cone packages visually for damages such as stitch, bad shape, stains, ribboning, tail end missing, cut end, etc.

## Qualification Pack

- PC11.** correct the mendable defects in packages as per the SOP
- PC12.** store the rejected cone packages in the allotted area
- PC13.** inspect the finished cone packages under the Ultra Violet (UV) light for mix-ups
- PC14.** weight and segregate the weight varied cones
- PC15.** segregate the non-conforming packages such as weight varied packages, poorly conditioned packages, etc.
- PC16.** paste verification sticker and description label to inspected packages with the details of investigator or checker code, approvals such as OK, quality OK, tested OK, count, weight, etc.
- PC17.** record finished cone inspection data in the given register

### *Preparation for cone packing*

To be competent, the user/individual on the job must be able to:

- PC18.** prepare cone packing material checklist based on the type of packing such as carton packing, hessian packing, pallet packing, etc. and their quantity
- PC19.** procure the packing materials from the store using standard procurement or requisition form
- PC20.** record the procured materials data in the allocated record
- PC21.** check the condition of packing equipment required for finished cone packing
- PC22.** clean packages using the allotted brush, if required
- PC23.** wrap the cone packages with a polythene cover and put disk inserts, if required
- PC24.** maintain defective and non-confirmed packages separately, if found at the time of random checking

### *Carryout packing of cones using carton box*

To be competent, the user/individual on the job must be able to:

- PC25.** prepare the carton box with required specifications such as the bottom, middle, top pieces, polyethylene covers, etc.
- PC26.** arrange the required number of cone packages inside the carton box in a specified manner
- PC27.** close the flaps by tape sealing as per requirement
- PC28.** carryout strapping by using the strapping machine as per the requirement
- PC29.** carryout stencil marking or sticker pasting on the surface of the carton box

### *Carryout packing of cones using a hessian bag*

To be competent, the user/individual on the job must be able to:

- PC30.** prepare the hessian bag at packing fixer as per the requirement
- PC31.** stitch the top portion of the hessian bag by providing the “handle” at the corner of the bags

### *Carryout packing of cones using pallet*

To be competent, the user/individual on the job must be able to:

- PC32.** arrange cone packages layer by layer on the pallet concerning the pallet size
- PC33.** set the pallet packing machine for wrapping activity
- PC34.** operate the pallet packing machine to wrap film sheet around pallet with required cardboard inserts and pads
- PC35.** fix the strap to the wrapped pallet using prescribed strapping hand tools

### *Perform other responsibilities in the packing department*

To be competent, the user/individual on the job must be able to:

## Qualification Pack

- PC36.** transport finished packages to yarn godown using specified material handling tools such as trolley, etc. for stacking as per guidelines
- PC37.** check the functioning of equipment such as UV light, weigh scale, packing fixer, inspection table, trolley, etc.
- PC38.** segregate the paper waster and plastic waste as per the guidelines

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basics of staple yarn spinning such as types of fibres, types of yarn, count, process flow, material flow in a typical spinning mill
- KU2.** organizational chart, name of department HODs, locations of various departments, offices in the spinning mill
- KU3.** rules and regulations followed in a spinning mill like shift timing and duration, limits of leave and holidays, etc.
- KU4.** roles and responsibilities of finished package checker-cum-packer
- KU5.** types of finished cone package defects such as stitch, bad shape, stains, ribboning, tail end missing, cut end, etc.
- KU6.** guidelines for identification of defective cone packages
- KU7.** different types of packing methods and their specifications such as packing material type, package weight, number of packages, etc.
- KU8.** different packing materials i.e., hessian bag, cartons, polyethylene wrappers, twine, strap, etc.
- KU9.** available types of packing tools and equipment such as packing fixer, needle, strapping machine, trolley, pallet packing machine, etc.
- KU10.** importance of checking packages under UV light, lens, etc.
- KU11.** SOP for cleaning defective cone packages
- KU12.** tolerance of allowable weight variation in packages and the hessian bag, carton box, and pallet
- KU13.** checklist for inspecting finished packages
- KU14.** guidelines for adjusting bag or box weight within the weight tolerance
- KU15.** the use needle and twine for stitching hessian bag
- KU16.** logbook and reporting formats to superiors
- KU17.** need for prescribed packing quality of finished cone packages

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write production details in the logbook in local or English language
- GS2.** communicate with colleagues and superiors as per standard protocol
- GS3.** comprehend written details of count identification label or board, production stocks, SOP, work method posters, etc.

## Qualification Pack

- GS4.** perform basic arithmetical calculations to calculate packing production, estimate packing material quantity, etc.

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                                                                                                           | Theory Marks | Practical Marks | Project Marks | Viva Marks |

| <b>PC10.</b> inspect the finished cone packages visually for damages such as stitch, bad shape, stains, ribboning, tail end missing, cut end, etc.                                                     | -            | -               | -             | -          |
| <b>PC11.</b> correct the mendable defects in packages as per the SOP                                                                                                                                   | -            | -               | -             | -          |
| <b>PC12.</b> store the rejected cone packages in the allotted area                                                                                                                                     | -            | -               | -             | -          |
| <b>PC13.</b> inspect the finished cone packages under the Ultra Violet (UV) light for mix-ups                                                                                                          | -            | -               | -             | -          |
| <b>PC14.</b> weight and segregate the weight varied cones                                                                                                                                              | -            | -               | -             | -          |
| <b>PC15.</b> segregate the non-conforming packages such as weight varied packages, poorly conditioned packages, etc.                                                                                   | -            | -               | -             | -          |
| <b>PC16.</b> paste verification sticker and description label to inspected packages with the details of investigator or checker code, approvals such as OK, quality OK, tested OK, count, weight, etc. | -            | -               | -             | -          |
| <b>PC17.</b> record finished cone inspection data in the given register                                                                                                                                | -            | -               | -             | -          |
| <i>Preparation for cone packing</i>                                                                                                                                                                    | <b>20</b>    | <b>41</b>       | -             | <b>12</b>  |
| <b>PC18.</b> prepare cone packing material checklist based on the type of packing such as carton packing, hessian packing, pallet packing, etc. and their quantity                                     | -            | -               | -             | -          |
| <b>PC19.</b> procure the packing materials from the store using standard procurement or requisition form                                                                                               | -            | -               | -             | -          |
| <b>PC20.</b> record the procured materials data in the allocated record                                                                                                                                | -            | -               | -             | -          |
| <b>PC21.</b> check the condition of packing equipment required for finished cone packing                                                                                                               | -            | -               | -             | -          |
| <b>PC22.</b> clean packages using the allotted brush, if required                                                                                                                                      | -            | -               | -             | -          |

## Qualification Pack

| Assessment Criteria for Outcomes                                                                                                   | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC23.</b> wrap the cone packages with a polythene cover and put disk inserts, if required                                       | -            | -               | -             | -          |
| <b>PC24.</b> maintain defective and non-confirmed packages separately, if found at the time of random checking                     | -            | -               | -             | -          |
| <i>Carryout packing of cones using carton box</i>                                                                                  | <b>37</b>    | <b>60</b>       | -             | <b>16</b>  |
| <b>PC25.</b> prepare the carton box with required specifications such as the bottom, middle, top pieces, polyethylene covers, etc. | -            | -               | -             | -          |
| <b>PC26.</b> arrange the required number of cone packages inside the carton box in a specified manner                              | -            | -               | -             | -          |
| <b>PC27.</b> close the flaps by tape sealing as per requirement                                                                    | -            | -               | -             | -          |
| <b>PC28.</b> carryout strapping by using the strapping machine as per the requirement                                              | -            | -               | -             | -          |
| <b>PC29.</b> carryout stencil marking or sticker pasting on the surface of the carton box                                          | -            | -               | -             | -          |
| <i>Carryout packing of cones using a hessian bag</i>                                                                               | <b>15</b>    | <b>25</b>       | -             | <b>6</b>   |
| <b>PC30.</b> prepare the hessian bag at packing fixer as per the requirement                                                       | -            | -               | -             | -          |
| <b>PC31.</b> stitch the top portion of the hessian bag by providing the “handle” at the corner of the bags                         | -            | -               | -             | -          |
| <i>Carryout packing of cones using pallet</i>                                                                                      | <b>21</b>    | <b>45</b>       | -             | <b>10</b>  |
| <b>PC32.</b> arrange cone packages layer by layer on the pallet concerning the pallet size                                         | -            | -               | -             | -          |
| <b>PC33.</b> set the pallet packing machine for wrapping activity                                                                  | -            | -               | -             | -          |
| <b>PC34.</b> operate the pallet packing machine to wrap film sheet around pallet with required cardboard inserts and pads          | -            | -               | -             | -          |
| <b>PC35.</b> fix the strap to the wrapped pallet using prescribed strapping hand tools                                             | -            | -               | -             | -          |

### TSC/N9015: Follow machine, safety, and organizational guidelines in textile sector

#### Description

This unit provides performance criteria, knowledge and skills required to follow machine, safety and organizational guidelines in textile sector.

#### Scope

The scope covers the following :

- Maintaining the work area, tools and machines
- Greening and energy conservation in textile sector
- Health, safety and response to emergencies at textile sector
- Organizational standards and policies

#### Elements and Performance Criteria

##### *Maintaining the work area, tools and machines*

To be competent, the user/individual on the job must be able to:

- PC1.** handle materials, machinery, equipment and tools as per standard procedure
- PC2.** use appropriate material handling equipment and tools as per standard procedure
- PC3.** keep the equipment, machine and work area clean using appropriate cleaning tools as per standard procedure
- PC4.** undertake minor routine maintenance of equipment and tools as per standard maintenance procedure
- PC5.** maintain record for defective and unsafe equipment and tools
- PC6.** verify that machine guards are in place as per standard specifications
- PC7.** follow specified ergonomics for the assigned job role in textile sector
- PC8.** collect and store worn-out spare parts at specified location
- PC9.** report the condition of worn out parts as per standard procedure

##### *Greening and energy conservation in textile sector*

To be competent, the user/individual on the job must be able to:

- PC10.** segregate wastes such as recyclable, non-recyclable, hazardous as per standard protocol
- PC11.** optimize usage of material and resources including water, electricity in various tasks
- PC12.** switch off the machines and lights when not in use

##### *Health, safety and response to emergencies at textile sector*

To be competent, the user/individual on the job must be able to:

- PC13.** use Personal Protective Equipment (PPEs) like body protector, ear plugs, nose mask, head cap, etc. as per guidelines
- PC14.** identify abnormal sounds emanating from faulty or worn out machine parts and take appropriate action
- PC15.** avoid dependency on any type of intoxicants

## Qualification Pack

- PC16.** maintain social distance as per the instruction at workplace
- PC17.** report hazardous material to superiors at workplace
- PC18.** use the various appropriate fire extinguishers on different types of fires correctly
- PC19.** follow the specified steps in case of electricity failure
- PC20.** lift heavy objects using correct lifting procedures
- PC21.** recall emergency exits, safe spots, etc. of workplace
- PC22.** practice mock drills and evacuation procedures organized by industry
- PC23.** assist others to reach to safe spots in emergency situations
- PC24.** provide basic first aid for injury to peers and report to superiors
- PC25.** interpret different signs, alarms and take action appropriately
- PC26.** follow the guidelines while working in hazards atmosphere
- PC27.** assist in designing the safety plans with peers and superiors
- PC28.** follow the approved safety plans at workplace

### *Organizational standards and policies*

To be competent, the user/individual on the job must be able to:

- PC29.** perform assigned duties as per organization's protocol within scheduled time period
- PC30.** follow organization policies, quality standards, rules and regulations for working in textile sector
- PC31.** motivate colleagues to follow operational guidelines of organization
- PC32.** wear specified uniform and follow etiquette as per standard guidelines for the textile sector
- PC33.** maintain hygienic working atmosphere as per protocol of the textile sector
- PC34.** submit lost and found articles as per standard protocol

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organizational standard procedures, quality standards, rules, codes, policies and safety standards in the textile sector
- KU2.** different type of tools and equipment used in textile sub- sector and their specifications and operating procedures
- KU3.** safe handling procedure of tools and equipment
- KU4.** the importance of displays and written instructions for the allocated machines
- KU5.** dos and donts specific to the assigned work responsibilities
- KU6.** protocol for minimizing the wastage of material, effort and time
- KU7.** organization's formats and procedures for reporting production, defects, faults, material/tool requisition and quality parameters and task completed for assigned job
- KU8.** schedule for cleaning and waste collection for the assigned job role
- KU9.** importance and standard procedure for disposal of soft, hard, non-hazardous and hazardous wastes and materials
- KU10.** available types of material handling equipment and handling methods used in the textile sector

## Qualification Pack

- KU11.** hazards of unsafe workplace conditions and procedures in the textile industry and methods to avoid hazards
- KU12.** various types of fire extinguishers
- KU13.** importance of stable mental condition in case of emergency
- KU14.** correct work posture and importance of ergonomics for the assigned job role
- KU15.** organizational quality systems like quality circle, 5S, ISO, SA, etc. followed in the textile sector
- KU16.** importance of following work wear standards, behavioral protocols and etiquette in the textile sector
- KU17.** importance of energy conservation through proper maintenance schedule in the textile sector
- KU18.** procedures and formats for reporting lost and found material
- KU19.** different types of alarms and their significance

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and comprehend policies in notice boards displayed in the workplace
- GS2.** minimize the resource consumption for the assigned task
- GS3.** solve basic arithmetic calculations related to assigned job role
- GS4.** recognize and differentiate colors of materials used in textile sector
- GS5.** lift specified materials for the allotted task using prescribed ergonomic position
- GS6.** exhibit motor skill required for the allotted task

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                       | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Maintaining the work area, tools and machines</i>                                                                   | <b>10</b>    | <b>10</b>       | -             | <b>6</b>   |
| <b>PC1.</b> handle materials, machinery, equipment and tools as per standard procedure                                 | -            | -               | -             | -          |
| <b>PC2.</b> use appropriate material handling equipment and tools as per standard procedure                            | -            | -               | -             | -          |
| <b>PC3.</b> keep the equipment, machine and work area clean using appropriate cleaning tools as per standard procedure | -            | -               | -             | -          |
| <b>PC4.</b> undertake minor routine maintenance of equipment and tools as per standard maintenance procedure           | -            | -               | -             | -          |
| <b>PC5.</b> maintain record for defective and unsafe equipment and tools                                               | -            | -               | -             | -          |
| <b>PC6.</b> verify that machine guards are in place as per standard specifications                                     | -            | -               | -             | -          |
| <b>PC7.</b> follow specified ergonomics for the assigned job role in textile sector                                    | -            | -               | -             | -          |
| <b>PC8.</b> collect and store worn-out spare parts at specified location                                               | -            | -               | -             | -          |
| <b>PC9.</b> report the condition of worn out parts as per standard procedure                                           | -            | -               | -             | -          |
| <i>Greening and energy conservation in textile sector</i>                                                              | <b>7</b>     | <b>10</b>       | -             | <b>6</b>   |
| <b>PC10.</b> segregate wastes such as recyclable, non-recyclable, hazardous as per standard protocol                   | -            | -               | -             | -          |
| <b>PC11.</b> optimize usage of material and resources including water, electricity in various tasks                    | -            | -               | -             | -          |
| <b>PC12.</b> switch off the machines and lights when not in use                                                        | -            | -               | -             | -          |
| <i>Health, safety and response to emergencies at textile sector</i>                                                    | <b>32</b>    | <b>40</b>       | -             | <b>28</b>  |

## Qualification Pack

| Assessment Criteria for Outcomes                                                                                                  | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|-----------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC13.</b> use Personal Protective Equipment (PPEs) like body protector, ear plugs, nose mask, head cap, etc. as per guidelines | -            | -               | -             | -          |
| <b>PC14.</b> identify abnormal sounds emanating from faulty or worn out machine parts and take appropriate action                 | -            | -               | -             | -          |
| <b>PC15.</b> avoid dependency on any type of intoxicants                                                                          | -            | -               | -             | -          |
| <b>PC16.</b> maintain social distance as per the instruction at workplace                                                         | -            | -               | -             | -          |
| <b>PC17.</b> report hazardous material to superiors at workplace                                                                  | -            | -               | -             | -          |
| <b>PC18.</b> use the various appropriate fire extinguishers on different types of fires correctly                                 | -            | -               | -             | -          |
| <b>PC19.</b> follow the specified steps in case of electricity failure                                                            | -            | -               | -             | -          |
| <b>PC20.</b> lift heavy objects using correct lifting procedures                                                                  | -            | -               | -             | -          |
| <b>PC21.</b> recall emergency exits, safe spots, etc. of workplace                                                                | -            | -               | -             | -          |
| <b>PC22.</b> practice mock drills and evacuation procedures organized by industry                                                 | -            | -               | -             | -          |
| <b>PC23.</b> assist others to reach to safe spots in emergency situations                                                         | -            | -               | -             | -          |
| <b>PC24.</b> provide basic first aid for injury to peers and report to superiors                                                  | -            | -               | -             | -          |
| <b>PC25.</b> interpret different signs, alarms and take action appropriately                                                      | -            | -               | -             | -          |
| <b>PC26.</b> follow the guidelines while working in hazards atmosphere                                                            | -            | -               | -             | -          |
| <b>PC27.</b> assist in designing the safety plans with peers and superiors                                                        | -            | -               | -             | -          |

## Qualification Pack

### TSC/N9016: Follow teamwork, adaptability, and communication guidelines in textile sector

#### Description

This unit provides performance criteria, knowledge and skills required to follow team work, communication and adaptability in textile sector

#### Scope

The scope covers the following :

- Teamwork and communication
- Adaptability

#### Elements and Performance Criteria

##### *Teamwork, trust and communication*

To be competent, the user/individual on the job must be able to:

- PC1.** contribute to create a positive work environment in the team
- PC2.** carry out tasks as per instructions received from superiors
- PC3.** contribute to team work as per allocated responsibility to complete the task by using appropriate tools and methods
- PC4.** build trust with team mates and superiors
- PC5.** implement the ideas after superior's approval at work place
- PC6.** communicate clearly with the team members as per standard protocol
- PC7.** use suggested hand signs, vocal sound signals to convey the information in the production area
- PC8.** listen effectively to the ideas and concerns of the peers
- PC9.** use correct and respectful terms while communicating as per industry policy
- PC10.** express views proactively and effectively
- PC11.** make efforts to resolve difference of opinion with superiors and team members
- PC12.** report to superior for problems identified in assigned duty
- PC13.** report the daily performance to superior in prescribed manner and formats

##### *Adaptability*

To be competent, the user/individual on the job must be able to:

- PC14.** adapt to flexible work environment for the assigned task
- PC15.** adapt to work with various members of different ethnicity, gender and PwD without biases
- PC16.** consider opinions of colleagues, fitters, superiors for the assigned task
- PC17.** plan the work-routine within the limits of the responsibility
- PC18.** adopt new ideas after due approval from superior for improving the productivity

#### Knowledge and Understanding (KU)

## Qualification Pack

The individual on the job needs to know and understand:

- KU1.** importance of teamwork and discipline
- KU2.** limits and responsibilities for the assigned duties in the textile sector
- KU3.** possible conflicts in the assigned job role and methods to resolve the same
- KU4.** importance of teamwork, group discussions and healthy work environment
- KU5.** importance of reporting as per the standard protocol
- KU6.** hierarchy of communication and communication etiquettes in the textile sector
- KU7.** protocol for communication with different ethnicity, gender and PwD
- KU8.** report and grievance submission formats
- KU9.** importance of hand, vocal sound signals in the textile sector

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and comprehend written instructions
- GS2.** listen effectivity for the instructions
- GS3.** coordinate with team mates for the allotted tasks
- GS4.** use and comprehend prescribed voice and hand signals in the textile production area
- GS5.** fill forms and prepare reports such as production report, material requisition forms, leave application, etc. as per standard formats

## Qualification Pack

## Qualification Pack

# TSC/N0321: Carryout batch loading, unloading and other responsibilities in yarn conditioning department

## Description

This unit is about performance criteria, knowledge and understanding and generic skills and abilities required to carry out batch loading, unloading and other responsibilities in yarn conditioning department as per the yarn conditioning requirements.

## Scope

The scope covers the following :

- Operating the Yarn Conditioning Plant (YCP)
- Carryout batch loading, unloading and other responsibilities at YCP

## Elements and Performance Criteria

### *Operating the Yarn Conditioning Plant (YCP)*

To be competent, the user/individual on the job must be able to:

- PC1.** operate YCP using control switches and buttons such as stopping and starting plant, opening and closing lid, loading and unloading of platform, etc.
- PC2.** operate display panel and feed required details for yarn conditioning such as count, quantity, temperature, duration, etc.
- PC3.** follow the different signal lamps used in yarn conditioning plant
- PC4.** identify the reasons for machine stoppages with the help of display panel and signal lamps

### *Carryout batch loading, unloading and other responsibilities at YCP*

To be competent, the user/individual on the job must be able to:

- PC5.** load packages in YCP trolley as per the standard loading method
- PC6.** monitor the plant parameters such as water quantity, temperature, steam, pressure requirements, etc.
- PC7.** place package loaded trolleys inside the plant
- PC8.** verify the conditioning parameters at display panel, proper loading, and closing of plant before start of plant
- PC9.** check the quality of yarn conditioning with respect to the standard requirements such as package weight, moisture content, etc.
- PC10.** send the conditioned package to the packing area using specified material handling tools
- PC11.** monitor the availability water source to meet the daily yarn conditioning requirements
- PC12.** register batch wise production details in the specified record book
- PC13.** support the maintenance team during conditioning plant maintenance, cleaning, and breakdown activities

## Knowledge and Understanding (KU)

## Qualification Pack

The individual on the job needs to know and understand:

- KU1.** objectives of spun yarn conditioning process
- KU2.** technical details of the yarn conditioning plant such as loading capacity, production per day, heating type, water requirement, etc.
- KU3.** different parts of yarn conditioning plant and their functions
- KU4.** basic electrical connections and motor drives used in YCP
- KU5.** conditioning parameters such as conditioning duration, temperature, RH, moisture content, steam level, pressure level, etc.
- KU6.** functions of different signal lamps, control buttons, and display panel in plant
- KU7.** measurement methods of finished package moisture content and YCP plant settings according to moisture level
- KU8.** typical malfunctions of YCP and methods to rectify them
- KU9.** cleaning, maintenance schedules of YCP
- KU10.** logbook and reporting formats to superiors

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write production details in the logbook in local or English language
- GS2.** communicate with colleagues and superiors as per standard protocol
- GS3.** comprehend written details of count identification label or board, production stocks, SOP, work method posters, etc.

## Qualification Pack

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.

The assessment for the theory part will be based on knowledge bank of questions created by the SSC.

Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).

Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

### Minimum Aggregate Passing % at QP Level : 50

## Qualification Pack

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

### Assessment Weightage

### Glossary

|                                              |                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
