TSC/Q4501: Entrepreneur - Textile Waste Management & Recycling

Brief Job Description

An Entrepreneur - Textile Waste Management & Recycling is responsible to focus on the key areas of the textile waste recycling business including business development, operations, compliance, financial management, marketing, innovation, and team leadership, ensuring that the candidate is well-prepared to lead a successful and sustainable recycling operation.

Personal Attributes

An Entrepreneur - Textile Waste Management & Recycling should have physical skills like dexterity, Ability to work long hours, strength, maintain high energy levels to oversee operations, manage teams, and handle multiple tasks. An Entrepreneur - Textile Waste Management & Recycling should also have ability to work in diverse environments, including outdoor sites, warehouses, and recycling facilities, which may have varying temperatures, noise levels, and other physical conditions

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [TSC/N4502: Gather business overview, market analysis of textile waste recycling operation](#)
2. [TSC/N4503: Planning shredding operation in textile waste recycling](#)
3. [TSC/N4504: Explore various circular applications of shredded textile waste](#)
4. [TSC/N4501: Adhere to legalities, models and strategies in textile waste recycling](#)
5. [TSC/N7802: Coordinate with team for finance and administrative activities](#)
6. [TSC/N7805: Follow organizational health, safety and security for self and others in the MSME textile sector](#)
7. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

TSC/N4502: Gather business overview, market analysis of textile waste recycling operation

Description

This NOS unit about performance criteria, knowledge and understanding and generic skills required for executing necessary techniques to gather business overview, market analysis of textile waste recycling operation.

Scope

The scope covers the following :

- Research and collate Textile recycling business-related market data

Elements and Performance Criteria

Research and collate textile recycling business-related market data

To be competent, the user/individual on the job must be able to:

- PC1.** Assess the current market size for textile recycling and projected growth rate over the next 5-10 years
- PC2.** Identify and analyze different market segments such as by material type (cotton, polyester, etc.), recycling process (mechanical, chemical), and end-use applications (apparel, home furnishings, industrial materials).
- PC3.** Study the textile recycling ecosystem, including key players, their market share, strengths, and weaknesses
- PC4.** Analyze consumer attitudes towards recycled textiles, demand for sustainable products, and purchasing behaviors
- PC5.** Analyse the various business model (e.g., B2B, B2C, circular economy) and articulate a clear value proposition
- PC6.** Identify target markets and customer segments

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** overview of the textile industry and waste generation
- KU2.** importance of recycling in the textile sector
- KU3.** types of textile waste such as pre-consumer, post-consumer
- KU4.** sources and composition of textile wastes
- KU5.** various recycling process such as mechanical (shredding, carding, spinning) and chemical recycling process (solvent-based, thermal)
- KU6.** contaminated or non-recyclable textiles
- KU7.** processes involved in recycling different textiles
- KU8.** compliance requirements for handling and disposing of textile waste

Qualification Pack

KU9. environmental and economic impacts of textile waste

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Proficiency in gathering and analyzing data from existing sources such as industry reports, market research studies, and academic journals
- GS2.** Use statistical and mathematical models to analyze market data and forecast trends
- GS3.** Evaluate information critically to make logical and sound business decisions
- GS4.** Ability to manage and analyze data sets using databases and spread sheet software
- GS5.** Ability to compile and present market analysis findings in report form
- GS6.** Effectively communicate insights and recommendations to the stakeholders

TSC/N4503: Planning shredding operation in textile waste recycling

Description

This NOS unit about performance criteria, knowledge and understanding and generic skills required for executing necessary techniques to for planning a shredding operation in textile waste recycling.

Scope

The scope covers the following :

- Textile waste shredding - Operational Planning
- Quality Control and Output Handling

Elements and Performance Criteria

Textile waste shredding - Operational Planning

To be competent, the user/individual on the job must be able to:

- PC1.** Identify suitable location for shredding operation, considering proximity to waste sources and markets
- PC2.** Plan the layout of your facility to optimize workflow, including areas for sorting, shredding, storage, and offices
- PC3.** Obtain the necessary permits and approvals for the textile waste shredding facility
- PC4.** Choose the appropriate shredding machinery and allied equipment based on the types and volumes of textile waste
- PC5.** Recruit skilled and unskilled workers for various roles in the shredding operation
- PC6.** Establish a system for collecting textile waste from various sources including transport
- PC7.** Set up sorting processes to separate different types of textiles and remove contaminants
- PC8.** Develop a shredding schedule and operating procedures to ensure efficient processing

Quality Control and Output Handling

To be competent, the user/individual on the job must be able to:

- PC9.** Implement quality control measures to ensure the textile shredded materials meet the required standards
- PC10.** Incorporate sustainable practices in the shredding operation, such as energy-efficient equipment and waste reduction strategies
- PC11.** Monitor and report the environmental impact of the shredding operation, including waste reduction and resource conservation
- PC12.** Implement inventory management systems to track incoming waste and outgoing products
- PC13.** Identify potential buyers and applications for shredded textile waste

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** different shredding machines and technologies used in textile recycling

Qualification Pack

- KU2.** operational parameters and capabilities of shredding equipment
- KU3.** maintenance procedures and troubleshooting common issues with shredders
- KU4.** details of subsequent recycling steps after shredding
- KU5.** efficient and safe handling of textile waste
- KU6.** safety regulations and best practices in the textile waste shredding department
- KU7.** efficient use of resources, including labor, equipment, and raw materials
- KU8.** knowledge of circular economy principles and their apply to textile recycling
- KU9.** market demand for shredded textile waste

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ability to quickly identify and resolve operational issues
- GS2.** innovative thinking to improve processes and address challenges
- GS3.** proficiency in collecting and analyzing data to optimize shredding operations
- GS4.** ability to streamline operations to maximize productivity
- GS5.** effective communication with team members to ensure smooth operations
- GS6.** delegating tasks and responsibilities effectively
- GS7.** effective coordination with suppliers and customers for efficient workflow

TSC/N4504: Explore various circular applications of shredded textile waste

Description

This NOS unit about performance criteria, knowledge and understanding and generic skills required for executing necessary techniques to explore various circular applications of shredded textile waste.

Scope

The scope covers the following :

- Circularity applications of textile waste

Elements and Performance Criteria

Circularity applications of textile shredding waste

To be competent, the user/individual on the job must be able to:

- PC1.** Explore various products made from textile waste such as Recycled fibre, Recycled fiber yarn, woven and knitted fabrics, Recycled non-woven fabrics, Recycled fiber application in technical textiles
- PC2.** Expertise in the production process flow of recycled materials such as fibre, yarn, fabric, non-woven materials, etc.
- PC3.** Evaluate the cost of processing shredded textile waste versus the value of the end products
- PC4.** Assess the potential revenue and profit margins from each application
- PC5.** Assess the feasibility of processing shredded materials using available technologies and equipment
- PC6.** Analyze market trends and demand for products made from recycled materials

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** various textile recycling process methodologies
- KU2.** various applications of the recycled materials such as insulation/ fillers, Composite materials, Absorbant products, etc.
- KU3.** properties of the shredded textile waste
- KU4.** various certifications such as ISO, sustainability certifications, etc.
- KU5.** sustainable production processes for natural and man made fibers
- KU6.** non conventional fibers and non textiles from renewable resources, and their applications
- KU7.** sustainable production processes of recycled fibers, fiber yarns, woven, non woven, knitted fabrics
- KU8.** properties and advantages and of recycled fibers, fiber yarn, woven, knitted and non woven fabrics

Qualification Pack

KU9. details of recycling, recovery, upcycling and down cycling processes of textile wastes

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyze data from various sources, including reports, surveys, and interviews
- GS2.** apply systematic approaches to resolve issues
- GS3.** compile detailed and clear reports on findings and recommendations
- GS4.** manage budgets for research and development activities
- GS5.** identify potential risks and developing mitigation strategies

TSC/N4501: Adhere to legalities, models and strategies in textile waste recycling

Description

This NOS unit about performance criteria, knowledge and understanding and generic skills required for executing necessary techniques to adhere to legalities, models and strategies in textile waste recycling

Scope

The scope covers the following :

- Follow legal frameworks in textile waste recycling

Elements and Performance Criteria

Follow legal frameworks in textile waste recycling

To be competent, the user/individual on the job must be able to:

- PC1.** Comply with national and local laws on waste management, including the handling, transportation, and disposal of textile waste
- PC2.** Adhere to regulations on emissions, effluents, and waste discharge to prevent environmental pollution
- PC3.** Follow regulations on the safe handling and disposal of chemicals used in textile processing and recycling
- PC4.** Obtain relevant certifications to validate the sustainability and safety of recycled materials such as OEKO-TEX Standard
- PC5.** Follow the business model according to the requirements such as collection and sorting, mechanical/ chemical recycling, Upcycle, Reuse, etc.
- PC6.** Adopt advanced recycling technologies to improve efficiency, quality, and sustainability
- PC7.** Analyze competitors to identify gaps and opportunities in the market
- PC8.** Establish reliable sources of textile waste to ensure a steady supply for recycling
- PC9.** Educate consumers about the benefits of recycling and encourage responsible disposal of textile products

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** details of national and local regulations governing the collection, transportation, and disposal of textile waste
- KU2.** details of regulations related to air, water, and soil pollution, and how recycling operations can comply with these standards
- KU3.** awareness of EPR (Extended Producer Responsibility) schemes that hold producers accountable for the end-of-life management of their products

Qualification Pack

- KU4.** workplace safety regulations to protect employees from potential hazards associated with textile recycling processes
- KU5.** safe handling, storage, and disposal protocols for chemicals used in textile recycling
- KU6.** awareness of certifications such as Global Recycled Standard (GRS) and OEKO-TEX Standard, including the requirements and benefits of obtaining them
- KU7.** strategies for sourcing textile waste from households, businesses, and industrial entities

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** develop and maintain documentation for regulatory compliance
- GS2.** develop contingency plans for potential legal issues
- GS3.** prepare and submit required reports to regulatory bodies
- GS4.** accurate and timely communication of compliance status
- GS5.** lead and motivate teams to execute strategies effectively
- GS6.** adapt to changing market conditions, regulations, and technologies

TSC/N7802: Coordinate with team for finance and administrative activities

Description

This OS unit is about developing and using the necessary skills, knowledge and attributes for managing finance and personnel in the MSME textile sector.

Scope

The scope covers the following :

- Build a team for marketing, administration and operations
- Manage financial and administrative activities

Elements and Performance Criteria

Build a team for marketing, administration and operations

To be competent, the user/individual on the job must be able to:

- PC1.** build a strategy to recruit people for the business
- PC2.** analyse different hiring and marketing strategies to short-list the most feasible and cost-effective ones such as posters, newspaper, online, consultants, references, campus placement, etc.
- PC3.** advertise for employment /contractual positions in the business as per immediate requirement using different channels short-listed
- PC4.** perform recruitment of suitable people with required levels of skill, knowledge and attitude, available within the recruitment budgets, good previous education /employment record, etc. for the required roles in the organization
- PC5.** build an effective team in the organization to handle all functions and monitor team progress by tracking key performance parameters
- PC6.** follow necessary procedures to ensure timely transfer of salaries and payments to the employees and business associates
- PC7.** calculate and issue monetary and non-monetary incentives to motivate the employees based on performance

Manage financial and administrative activities

To be competent, the user/individual on the job must be able to:

- PC8.** organize and safely store record files of members/employees, bills, office documents in appropriate places
- PC9.** maintain and update the attendance of employees /members in a designated register
- PC10.** compare the features and benefits such as interest rate, flexible repayment option, etc. of financial schemes offered by various financial agencies such as nationalized banks, SIDBI, etc. select the schemes suitable for the business interests of the organization
- PC11.** obtain all the documents required to open a bank account and submit them to the authorized bank officer

Qualification Pack

- PC12.** maintain a record book with regular entries of product sales, expenses incurred in production and marketing, general expenses, e.g., rent, utilities charge, loan payments and interests, etc.
- PC13.** calculate profit and loss by analysing the cost and revenue data from the day-to-day financial records
- PC14.** keep cash book and financial documents such as saving and loan ledger, bank ledger, groups bank passbook, individual passbooks, etc. in secured locations financial documents.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** legislation, standards, policies, and procedures followed in the production house relevant to employment and performance conditions
- KU2.** job role and responsibilities and sources for information pertaining to employment terms, compensation, job role and responsibilities relevant to the type of activity (Weaving/ Processing/ Knitting/ Handloom/ Technical Textiles)
- KU3.** relevant people and their responsibilities required for the business
- KU4.** various categories of people that one is required to communicate and coordinate within the organization
- KU5.** different networking channels for regular/contractual recruitment
- KU6.** hiring process and procedures: Issuance of employment letter, contract, facilities like PF, ESI, medical insurance, travel allowance, etc.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** take notes in local or English language of instructions received
- GS2.** read rules, regulations, schemes, and research reports in local or English language for business planning activities
- GS3.** communicate effectively with colleagues, employees, government officials and business associates

TSC/N7805: Follow organizational health, safety and security for self and others in the MSME textile sector

Description

This unit provides performance criteria, knowledge, understanding, skills and abilities to ensure organizational health, safety and security procedures in the MSME textile sector to prevent, control and minimize risk to self and others.

Scope

The scope covers the following :

- Recognize and address the hazards in the MSME textile sector
- Ensure organizational health, safety and security for self and others

Elements and Performance Criteria

Recognize and address the hazards in the MSME textile sector

To be competent, the user/individual on the job must be able to:

- PC1.** identify hazards (environmental, personal, ergonomic and chemical) at the textile workplace (Weaving/ Processing/ Knitting/ Handloom/ Technical Textiles)
- PC2.** make arrangements prevent/ curb the hazards at the workplace
- PC3.** plan safety techniques for the employees in the organization
- PC4.** implement programs for health, safety and security of the people at the workplace
- PC5.** communicate the safety plans to everyone at the workplace
- PC6.** attach disciplinary rules with the implementation at the workplace

Ensure organizational health, safety and security for self and others

To be competent, the user/individual on the job must be able to:

- PC7.** comply with regulatory health and safety guidelines applicable to the textile workplace (Weaving/ Processing/ Knitting/ Handloom/ Technical Textiles)
- PC8.** educate the use of protective equipment and safety devices in the production house
- PC9.** check organizational activities in line with approved guidelines and procedures
- PC10.** follow environment management system related procedures
- PC11.** follow the storage of materials and tools in line with manufacturers and Cooperative Society/NGO/SHG requirements
- PC12.** follow safe handling and disposal of waste and debris as per the standard protocol
- PC13.** carry out periodic check to keep work area free from hazards and obstructions
- PC14.** arrange periodic mock drills/ evacuation procedures organized at the workplace
- PC15.** organize first aid, fire-fighting and emergency training sessions for others
- PC16.** follow standard evacuation procedure in the event of emergency at the workplace

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable for the textile sector
- KU2.** potential hazards, risks and threats based on textile production and operations (Weaving/ Processing/ Knitting/ Handloom/ Technical Textiles)
- KU3.** procedures for safe handling of materials and machineries in the MSME textile sector
- KU4.** environmental management system related procedures at the workplace
- KU5.** layout of the production house and details of emergency exits, escape routes, emergency equipment and assembly points
- KU6.** documentation formats
- KU7.** details of personnel trained in first aid, fire-fighting and emergency response
- KU8.** protective equipment and method of use for self and others
- KU9.** disposal system for waste and by-products of textile production unit
- KU10.** importance of health, hygiene at production workplace

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in local or English language
- GS2.** read and comprehend written safety instructions
- GS3.** listen effectively and orally communicate information accurately
- GS4.** apply problem-solving approaches in different emergency situations
- GS5.** seek clarification on problems from others
- GS6.** analyze data and activities related to health and safety in textile sector
- GS7.** apply balanced judgment to different situations

Qualification Pack

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.

The assessment for the theory part will be based on knowledge bank of questions created by the SSC. Individual assessment agencies will create unique question papers for theory part for each candidate at

each examination/training center (as per assessment criteria below). Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to

Qualification Pack

successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
