Qualification Pack

TSC/N7901: Undertake traditional charkha spinning operations

Description

The unit deals with necessary skills, knowledge and attributes required by a traditional charkha spinning operator

Scope

The scope covers the following :

- Carry out pre-spinning activities
- Ensure proper spinning activities

Elements and Performance Criteria

Carry out pre-spinning activities

To be competent, the user/individual on the job must be able to:

1. identify and select from various types of fibers for charkha spinning, Types: Upland, long-stapled cotton, cashmere, camel down, angora etc
2. comb the kapas to aerate the fiber smoothly by hand using fish jaw brush/to separate all other fibers use suitable combing device such as metal comb.
3. undertake ginning process of the kapas manually using an iron rod
4. clean and fluff out ginned cotton using handmade bow
5. perform parallization of fibers manually
6. perform separation of the fibers using manually operated carding machine
7. carry out slivering of the fibers using a tapered wooden stick
8. roll the sliver suitably to carry out spinning
9. calculate the desired yarn count

Ensure proper spinning activities

To be competent, the user/individual on the job must be able to:

10. add leader to the spindle to start the spinning process
11. identify the different basic positions for spindle spinning Positions: Hand in front of spindle, hand above spindle, and hand at an angle
12. wind the thread on the spindle tip
13. add twist to strengthen and compress the drafted yarn into thin strand
14. spin the yarn under supervision at a comfortable rate until the fibers lock together
15. draft the cotton off the leader
16. convert the spun yarn into hank
17. wind in a criss-cross winding pattern using hand and feet to prepare the hank

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** policies and procedures followed in the handloom sector relevant to own employment and performance conditions
- KU2.** relevant health and safety requirements applicable in the work place
- KU3.** importance of following health, hygiene, safety and quality standards and the impact of non-compliance of the standards on consumers and the business
- KU4.** own job role and responsibilities and sources for information pertaining to employment terms, compensation, job role and responsibilities
- KU5.** relevant people and their responsibilities within the work area National Occupational
- KU6.** various types of fibers
- KU7.** hand combing and ginning process
- KU8.** manual carding and paralleling methods
- KU9.** spindle spinning process
- KU10.** different position of spindle spinning
- KU11.** drafting and twisting method
- KU12.** yarn count and its different method indirect and direct

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write local or English language for recording production, quality related information, numbering, and maintenance of related information and materials, etc.
- GS2.** read to differentiate the various materials used in the process
- GS3.** read and correctly interpret own notes written in local or English language
- GS4.** communicate with co-workers appropriately
- GS5.** listen carefully
- GS6.** talk effectively to convey information succinctly and unequivocally
- GS7.** plan and organize own work in a way that all activities are completed in time and as per specifications
- GS8.** interpret work requirements correctly
- GS9.** deliver quality output and maintain long term business relationship with customers
- GS10.** determine timely correction of errors to prevent redoing of work

Qualification Pack

TSC/N7902: Undertake spinning process by using new model charkha (NMC)

Description

The unit deals with necessary skills, knowledge and attributes required by a new model charkha (NMC) spinning operator

Scope

The scope covers the following :

- Carry out pre-spinning activities
- Ensure proper spinning activities

Elements and Performance Criteria

Carry out pre-spinning activities

To be competent, the user/individual on the job must be able to:

1. ensure that the drive belt in the new model charkha allows the flyer to move freely
2. adjust the break (draw-in) to rest on the bobbin
3. ensure that the size of the wheel is inversely proportional to the diameter of the whorl for faster movement of the flyer
4. identify and select from various types of fibers for charkha spinning, Types: Upland, long-stapled cotton, cashmere, camel down, angora, ultrafine merino, etc.
5. fluff out commercial cotton roving bobbin to aerate the fiber smoothly
6. perform the cleaning of roving bobbin
7. calculate the desired yarn count

Ensure proper spinning activities

To be competent, the user/individual on the job must be able to:

8. wind the thread on the spindle tip
9. adjust the cot and apron to provide uniform pressure on the fibre strand to facilitate efficient drafting
10. check aprons have better grip & control on fibres particularly floating fibres
11. use the ring to guide the circular run of the traveller
12. ensure the traveller twist the drafted strand of fibres, winds yarn onto the bobbin, maintains winding tension of the yarn by the frictional resistance between the ring and traveller
13. check the creel holds the roving bobbin over a roller beam within a convenient height to easily handle the roving
14. ensure the spindle holds the bobbin tight enough to prevent any slippage, and winds the twisted thread on the bobbin with the help of ring and traveller
15. add twist per inch if thread keeps drifting apart (breaking)
16. ensure the twist does not get into the drafting area
17. change the hooks frequently to avoid thread pile up in one spot on the bobbin

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies and procedures followed in the handloom sector relevant to own employment and performance conditions
- KU2.** relevant health and safety requirements applicable in the work place
- KU3.** importance of following health, hygiene, safety and quality standards and the impact of non-compliance of the standards on consumers and the business
- KU4.** own job role and responsibilities and sources for information pertaining to employment terms, compensation, job role and responsibilities
- KU5.** relevant people and their responsibilities within the work area
- KU6.** various categories of people that one is required to communicate and coordinate within the organization
- KU7.** various types of fiber
- KU8.** cotton roving
- KU9.** carding and sliving
- KU10.** spindle spinning process
- KU11.** drafting and twisting method
- KU12.** yarn count and its different method indirect and direct
- KU13.** factors considered for the selection of traveller, Factors: Yarn count, spindle speed, ring diameter, empty bobbin diameter, lift of bobbin, and cross section of traveller
- KU14.** specifications of traveller, Specifications: Traveller number, cross section of wire and shape, flange number, surface finish, and type of material

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write local or English language for recording production, quality related information, numbering, and maintenance of related information and materials, etc
- GS2.** read to differentiate the various materials used in the process
- GS3.** read and correctly interpret own notes written in local or English language
- GS4.** communicate with co-workers appropriately

Qualification Pack

TSC/N7904: Operation and maintenance of solar attachments

Description

The unit deals with necessary skills, knowledge and attributes required by an operator to run the machine equipped with solar power drive

Scope

The scope covers the following :

- Preparing the machine for operation
- Ensure proper maintenance of solar attachment

Elements and Performance Criteria

Preparing the machine for operation

To be competent, the user/individual on the job must be able to:

1. clear the weed/ Grass near the solar panels if any
2. clean the surface of the solar panel for dust with wet sponge/cloth
3. ensure the charge controller, batteries are working properly as instructed
4. prepare solar powered handloom/ khadi machine for operation
5. switch on the main motor and start the machine for production

Ensuring proper maintenance of solar attachment

To be competent, the user/individual on the job must be able to:

6. check periodically for the working of light indicators and display panel for voltage fluctuation
7. ensure that the battery is kept at a dry place
8. check the electrolyte level of battery and top up the electrolyte whenever required
9. check for electrolyte/ distilled water leak from batteries
10. clean the battery at prescribed intervals for fluff accumulation
11. clean the inverter, battery charger and charge controller for fiber dust
12. inspect and ensure the cleanliness of solar panel and terminal boxes
13. use PPEs while topping up of distilled water and cleaning
14. use appropriate tools such as cloth, brush for cleaning various parts of the power system

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies and procedures followed in the workplace relevant to own employment and performance conditions
- KU2.** relevant health and safety requirements applicable in the work place
- KU3.** importance of following health, hygiene, safety and quality standards and the impact of non-compliance of the standards on consumers and the business

Qualification Pack

- KU4.** own job role and responsibilities and sources for information pertaining to employment terms, compensation, job role and responsibilities
- KU5.** relevant people and their responsibilities within the work area
- KU6.** various categories of people that one is required to communicate and coordinate within the organization
- KU7.** various types of batteries with their capacity ratings
- KU8.** main components of solar power system like solar panel, charge controller, battery, inverter etc.
- KU9.** AC and DC power supply
- KU10.** maintenance schedules of solar panel and other components
- KU11.** wiring and power terminals
- KU12.** buzzers, alarms and their indications
- KU13.** Personal Protective Equipment (PPE) and their importance
- KU14.** electrolyte, distilled water and its uses
- KU15.** different ways of minimizing waste
- KU16.** common faults and the methods to rectify the solar components
- KU17.** hazards likely to be encountered when conducting routine maintenance
- KU18.** different types of cleaning substances and their use
- KU19.** safe working practices for cleaning and the methods of carrying them out

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write instructions for communication, production data entry etc.
- GS2.** read technical specifications and instructions of the solar powered machine
- GS3.** talk to others and convey the information effectively
- GS4.** plan and perform the maintenance activity of solar power system/ machine
- GS5.** Repair the minor problems within the level of responsibility

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
