TSC/Q8102: Operator - Pultrusion (Composites)

Brief Job Description

The individual at work is responsible for selecting raw materials, right tooling and processes, and ensuring the proper operation of pultrusion machines for the quality manufacturing of Fiber Reinforced Polymer (FRP) products. The key Duties include preparing and mixing resins, monitoring pot life, viscosity of the binding system, and using it within prescribed time, handling and aligning fibers, monitoring and adjusting machine settings, performing quality checks, and adhering to safety protocols to produce high-quality FRP products.

Personal Attributes

The job requires the individual to be courteous, and physically fit to work in a factory environment with good communication skills.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [TSC/N8106: Carry out Shift change responsibilities in Pultrusion Department](#)
2. [TSC/N8107: Preparation for fabrication of pultruded composite parts](#)
3. [TSC/N8108: Carry out Pultrusion Production Activity](#)
4. [TSC/N9018: Maintain 5S at work premises: Sort, Set in, Order, Shine, Standardize and Sustain](#)
5. [TSC/N9019: Follow machine, safety and organizational guidelines in pultrusion department](#)
6. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

TSC/N8106: Carry out Shift change responsibilities in Pultrusion Department

Description

This unit provides foundational understanding for Pultrusion Operators, covering the mission's overview, the composite industry's scope, and the core responsibilities of an operator.

Scope

The scope covers the following :

- Taking charge of shift from pultrusion operator
- Handing over the shift to operator

Elements and Performance Criteria

Taking charge of shift from pultrusion operator

To be competent, the user/individual on the job must be able to:

- PC1.** come at least 10-15 minutes earlier to the work place
- PC2.** get instructions from supervisor
- PC3.** verify the operational status of the pultrusion machine and ancillary equipment.
- PC4.** review the shift logbook for updates, pending tasks, and machine settings
- PC5.** check the availability of raw materials, tools, and consumables required for the shift.
- PC6.** wear personal protective equipment (PPE) and ensure all safety measures are in place
- PC7.** inspect the workspace to confirm cleanliness and compliance with 5S principles

Handing over the shift to operator

To be competent, the user/individual on the job must be able to:

- PC8.** provide a detailed handover report to the next operator, including production updates, machine settings, and any maintenance issues
- PC9.** highlight any critical incidents, deviations, or quality concerns encountered during the shift.
- PC10.** store all tools and materials in their designated locations
- PC11.** confirm that the machine and work area are left in a safe and operational state
- PC12.** update the shift logbook with accurate information for continuity
- PC13.** get clearance from the incoming counterpart before leaving the work place
- PC14.** handover the shift to the incoming shift operator as per standard protocol
- PC15.** report to his/ her shift superiors as well as that of the incoming shift operator in case his/ her counterpart doesn't report for the incoming shift

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** objectives and key benefits of the composite manufacturing sector.

Qualification Pack

- KU2.** composite materials and pultrusion process
- KU3.** standard operating procedures (SOP) and regulations
- KU4.** understanding of types of fiber and matrix materials
- KU5.** process flow of composite manufacturing process
- KU6.** guidelines for operating pultrusion machine
- KU7.** guidelines for taking charge of shift from previous operator
- KU8.** guidelines for handing over the charge of shift to the next operator
- KU9.** importance of material handling and type of material handling used
- KU10.** awareness of the roles, responsibilities, and career opportunities for a Pultrusion Operator in the composite manufacturing field.
- KU11.** understanding of industry standards and best practices relevant to composite manufacturing and pultrusion processes.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ability to communicate clearly and effectively with team members and supervisors.
- GS2.** problem-solving skills to troubleshoot equipment issues or production challenges during the pultrusion process.
- GS3.** time management skills to ensure adherence to production schedules and efficient workflow.
- GS4.** ability to interpret and follow standard operating procedures, work instructions, and safety protocols.
- GS5.** adaptability and willingness to learn new techniques or updates in pultrusion technology and processes.

TSC/N8107: Preparation for fabrication of pultruded composite parts

Description

This unit offers an in-depth understanding of the principles of composites and the pultrusion process, covering material characteristics, resin types, equipment setup, and quality checks.

Scope

The scope covers the following :

- Preparation for part manufacturing
- Selection of Raw Material and Testing

Elements and Performance Criteria

Preparation for part manufacturing

To be competent, the user/individual on the job must be able to:

- PC1.** inspect the pultrusion machine and ensure all systems are operational before starting the shift.
- PC2.** inspect and confirm the readiness of tools, fixtures, and auxiliary equipment required for manufacturing.
- PC3.** verify the availability of necessary tools, jigs, and consumables for part manufacturing.
- PC4.** review work instructions, technical drawings, and specifications
- PC5.** check alignment and tension of fiber spools or reinforcement materials before loading
- PC6.** set up and adjust the pulling system, die temperature, and resin bath according to specifications.
- PC7.** conduct a dry run of the machine to identify any potential issues.

Selection of Raw Material and Testing

To be competent, the user/individual on the job must be able to:

- PC8.** identify the type and quantity of raw materials i.e., reinforce fiber, resin, additives etc.
- PC9.** conduct a visual inspection of raw materials to check for damage, contamination, or inconsistencies.
- PC10.** perform quality tests such as resin gel time, cure rate, and fiber tensile strength.
- PC11.** record material properties and test results in compliance with documentation standards.
- PC12.** monitor the mixing of resin, hardener, and additives to ensure proper ratios and homogeneity.
- PC13.** store and handle raw materials following workplace protocols to maintain quality.
- PC14.** coordinate with the quality control team to resolve any raw material-related issues.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** types of composite materials
- KU2.** types of fibers, resin, fillers and additives and their characteristics
- KU3.** types of fibers, resin, fillers and additives and their characteristics
- KU4.** standard operating procedures (SOP) for pultrusion process
- KU5.** performance of composite during the process
- KU6.** criteria for overall process readiness as per job requirement
- KU7.** manual and mechanized process of production of FRP pultruded profiles
- KU8.** testing process for raw material and finished product
- KU9.** pros and cons of the FRP pultruded products
- KU10.** production management

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate with supervisor appropriately
- GS2.** read the cad drawings
- GS3.** read and understand the organizational documents and product specifications etc.
- GS4.** prepare and fill the information and details
- GS5.** procedure to operate the pultrusion machine
- GS6.** effective communication at workplace
- GS7.** maintain cleanliness at work place

TSC/N8108: Carry out Pultrusion Production Activity

Description

This unit covers essential operational and maintenance procedures for pultrusion machinery, including setting parameters, handling materials, and trial production with new molds.

Scope

The scope covers the following :

- Perform production activity of the pultruded composite parts
- Quality check and finish products
- Advancements in pultrusion technology

Elements and Performance Criteria

Perform production activity of the pultruded composite parts

To be competent, the user/individual on the job must be able to:

- PC1.** clean, adjust, and apply lubrication to equipment following the manufacturer's instructions
- PC2.** set the operating parameters of the machine as per SOP
- PC3.** apply proper procedure to startup and operate the machine to meet job specification
- PC4.** load and unload the mold safely from the machine
- PC5.** eject the product from the mold
- PC6.** verify that the dimensions, structural reinforcements, supports, and flanges conform to the job and design specifications.
- PC7.** check and rectify manufacturing defects associated with mold design, mold manufacturing, material properties, process parameters, and machine performance.
- PC8.** monitor complete machine to achieve standard cycle time
- PC9.** check production processes to reduce scrap and trim waste, ensuring compliance with established workplace procedures.
- PC10.** identify the shutdown type and follow the prescribed procedures based on equipment manuals and workplace protocols.
- PC11.** initiate equipment shutdown following the manufacturer's instructions and established workplace protocols.
- PC12.** perform thorough and efficient cleaning of equipment using the specified methods and materials, in strict accordance with the equipment's operational guidelines and maintenance instructions.
- PC13.** finalize shutdown documentation in accordance with workplace standards, ensuring all procedures and details are accurately recorded.
- PC14.** clear and clean the work area following shutdown, ensuring it is properly prepared for the next startup.

Quality check and finish products

To be competent, the user/individual on the job must be able to:

- PC15.** perform standard shaping, trimming or cutting operations as per job specifications

Qualification Pack

- PC16.** perform post operations like joining, drilling, painting, and printing on pultruded products to meet job specifications
- PC17.** implement inspection and testing protocols to verify that the output meets job specifications and quality standards, and apply corrective actions to manage nonconforming products.
- PC18.** verify the finished product against the original design and specifications to ensure compliance.
- PC19.** submit the product sample for quality control testing and analysis.
- PC20.** inspect the product to ensure it meets specifications and quality standards, adjusting the final process as needed to align with job requirements.
- PC21.** complete post-production documentation in accordance with established standards and procedures.
- PC22.** maintain accurate records and logbooks, documenting all relevant details as per standard procedures

Advancements in pultrusion technology

To be competent, the user/individual on the job must be able to:

- PC23.** advancement in pultrusion process
- PC24.** thermoplastic pultrusion process
- PC25.** utilize advanced pultrusion technologies and automation to enhance production efficiency and product consistency.
- PC26.** sustainable Manufacturing Principle
- PC27.** integrate recycling processes for pultrusion waste to minimize environmental impact and improve material utilization.
- PC28.** apply sustainability practices throughout the pultrusion process to reduce carbon footprint and resource consumption.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** understanding of organizational policies, processes, and guidelines governing both production and post-production phases in pultrusion.
- KU2.** standard Operating Procedures (SOP) for configuring and optimizing production machinery parameters for pultrusion.
- KU3.** ability to safely and efficiently load and unload materials for the pultrusion process, ensuring proper handling.
- KU4.** understanding the correct procedures for ejecting products from the pultrusion machine without compromising quality.
- KU5.** knowledge of standard cycle times and preventive maintenance schedules for machinery, ensuring smooth production flow.
- KU6.** the importance and methods for performing trial production runs with new materials and molds, ensuring readiness for full-scale production.
- KU7.** knowledge of the finishing techniques used to enhance the functional and aesthetic quality of pultruded products.
- KU8.** awareness of the typical quality standards at each production stage

Qualification Pack

- KU9.** documentation required for maintaining traceability, compliance, and process consistency.
- KU10.** the organization's process for escalating issues and concerns to ensure timely resolution and appropriate action.
- KU11.** latest advancements in pultrusion technology and their impact on production efficiency and product quality.
- KU12.** energy-saving measures and implementation to reduce energy consumption in pultrusion processes.
- KU13.** recycling processes for pultrusion waste
- KU14.** familiarity with sustainable practices in pultrusion

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ability to accurately fill or complete production data, machine log sheets, and other relevant documentation.
- GS2.** proficiency in reading and interpreting job-related documents to ensure proper understanding and execution of tasks.
- GS3.** effective communication skills to collaborate with colleagues, seniors, and other departments to ensure smooth workflow.
- GS4.** ability to identify issues, analyze potential solutions, and implement effective resolutions.
- GS5.** managing time efficiently to meet deadlines and prioritize tasks effectively.
- GS6.** ensuring accuracy and thoroughness in tasks to avoid errors and ensure high-quality work.
- GS7.** identify and address energy inefficiencies and waste in the pultrusion process.
- GS8.** critical thinking to analyze and assess the impact of advancements in pultrusion technology on sustainability.
- GS9.** effective communication of energy-saving strategies and sustainability practices to team members and stakeholders.
- GS10.** attention to detail to ensure accurate implementation of energy-efficient measures and life cycle assessments.
- GS11.** teamwork to collaborate in integrating advanced technologies and sustainable practices in pultrusion.

TSC/N9018: Maintain 5S at work premises: Sort, Set in, Order, Shine, Standardize and Sustain

Description

This unit focuses on applying 5S practices within the pultrusion process to ensure a clean, safe, and efficient workspace. It includes procedures for inspecting, cleaning, and organizing equipment and work areas to prevent hazards and maintain production quality.

Scope

The scope covers the following :

- Implement the 5S methodology-sorting, streamlining & organizing
- Storage and Documentation Standards
- Cleaning and Maintenance of Work Areas
- Standardization and Sustenance of 5S Practices Across Plant and Office Premises

Elements and Performance Criteria

Implement the 5S methodology-sorting, streamlining & organizing

To be competent, the user/individual on the job must be able to:

- PC1.** perform sorting by verifying that only required tools, fixtures, and jigs are organized on workstations, with all unnecessary items removed to maintain clear and uncluttered machine space/worktable.
- PC2.** implement waste segregation by accurately identifying and separating hazardous and non-hazardous waste according to established sorting work instructions.
- PC3.** adhere to waste disposal and storage techniques by placing waste in designated bins/space according to the standard operating procedures (SOP).
- PC4.** organize tools, equipment, and spare parts according to specifications and utility by placing them in designated trays, cabinets, or lockers, as outlined in the 5S guidelines and work instructions.
- PC5.** separate and store items labeled as red tag items for the process area in designated locations as per guidelines.
- PC6.** stack boxes and containers appropriately by size and utility to prevent falls, breakage, and to facilitate easy sorting when needed.
- PC7.** adhere to the floor and area markings that demarcate various sections in the plant, in accordance with prescribed instructions and standards.

Storage and Documentation Standards

To be competent, the user/individual on the job must be able to:

- PC8.** implement the correct labeling system for instruments, boxes, and containers, and maintain reference files and documents with corresponding codes and lists.
- PC9.** verify that items in designated areas are properly identified as broken or damaged and segregated for repair or disposal.

Qualification Pack

- PC10.** perform proper labeling of fluids, oils, lubricants, solvents, chemicals, etc., and verify their correct storage to prevent spillage, leakage, or fire hazards as per given instructions.
- PC11.** store all materials and tools in their designated places and arranged according to the 5S guidelines.

Cleaning and Maintenance of Work Areas

To be competent, the user/individual on the job must be able to:

- PC12.** check that the items in the respective areas have been identified as broken or damaged
- PC13.** follow the given instructions and check for labeling of fluids, oils, lubricants, solvents, chemicals etc. and proper storage of the same to avoid spillage, leakage, fire etc.
- PC14.** make sure that all material and tools are stored in the designated places and in the manner indicated in the 5S instructions
- PC15.** clean safety glasses/mask before use, as per safety protocols.
- PC16.** maintain a clean work environment by ensuring floors are swept, machinery is clean, and safety hazard displays are visible, especially during cleaning operations.
- PC17.** inspect and ensure hoses, cables, and wires are properly cleaned, well-maintained, and securely clamped to prevent accidents or mix-ups during the pultrusion process.
- PC18.** clean workbenches and surfaces to free of debris and in good working condition to avoid defects in pultrusion operations.
- PC19.** adhere to the lighting system cleaning schedule to ensure proper illumination and optimal work conditions for the pultrusion process.
- PC20.** store all cleaning materials and equipment in the designated areas after use, ensuring they are in good condition for future use.
- PC21.** maintain personal cleanliness and hygiene by wearing the prescribed uniform, gloves, helmet, and safety shoes, and following workplace hygiene standards.

Standardization and Sustenance of 5S Practices Across Plant and Office Premises

To be competent, the user/individual on the job must be able to:

- PC22.** follow the daily cleaning standards and schedules to ensure a clean and organized working environment, minimizing risks during pultrusion operations.
- PC23.** attend and actively participate in all 5S training programs, ensuring understanding of cleaning, organizing, and maintaining workstations in the pultrusion area.
- PC24.** assist the team during 5S audits by ensuring work areas are clean, organized, and compliant with 5S standards, contributing to continuous improvement.
- PC25.** actively engage in workgroups focused on 5S, encouraging fellow team members to actively participate in maintaining cleanliness and order on the shop floor.
- PC26.** adhere to 5S guidelines on dos and don'ts to foster sustainability in the work environment, ensuring safe and efficient pultrusion operations.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** principles of composite materials
- KU2.** the importance of maintaining cleanliness in work areas to ensure a safe and efficient work environment.

Qualification Pack

- KU3.** understand the various cleaning methods and materials used to clean different types of work surfaces, machinery, and equipment.
- KU4.** knowledge of standard operating procedures (SOPs) for cleaning specific areas, including creel rooms, storage areas, and machinery.
- KU5.** understand the safety measures for cleaning tasks, including handling cleaning chemicals and maintaining equipment safety.
- KU6.** understand the role of cleanliness in maintaining machinery performance and reducing downtime du
- KU7.** knowledge of different types of cleaning equipment, tools, and supplies, and their correct use and maintenance.
- KU8.** the individual should understand how to segregate waste, including hazardous and non-hazardous materials, and dispose of it in compliance with environmental regulations.
- KU9.** knowledge of documentation and record-keeping requirements related to cleaning activities, including maintenance logs and cleaning schedules.
- KU10.** understand the importance of regular inspections and audits to ensure cleanliness standards are maintained and identify areas for improvement.
- KU11.** understand the importance of regular inspections and audits to ensure cleanliness standards are maintained and identify areas for improvement.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ability to effectively communicate with team members and supervisors regarding cleaning activities, issues, and safety concerns.
- GS2.** skill to carefully inspect and maintain work areas, ensuring cleanliness standards are consistently met.
- GS3.** ability to identify cleaning-related issues and take necessary corrective actions to resolve them promptly.
- GS4.** effectively plan and manage time to complete cleaning tasks within specified schedules without compromising quality.
- GS5.** ability to collaborate with colleagues, especially during team cleaning efforts, and contribute to a clean and safe working environment.
- GS6.** flexibility to adapt to different cleaning tasks and procedures depending on the type of area or equipment being cleaned.
- GS7.** capability to manage and organize cleaning materials, tools, and equipment efficiently, ensuring their availability when needed.
- GS8.** recognize and follow safety practices to prevent accidents, particularly when handling cleaning chemicals or maintaining equipment.
- GS9.** ability to accurately document cleaning tasks, incidents, and maintenance work in compliance with company standards.
- GS10.** willingness to participate in audits, feedback sessions, and training to improve cleaning practices and maintain high standards.

PC3. adhere to waste disposal and storage techniques by placing waste in designated bins/space according to the standard operating procedures (SOP).	2	4	-	-
PC4. organize tools, equipment, and spare parts according to specifications and utility by placing them in designated trays, cabinets, or lockers, as outlined in the 5S guidelines and work instructions.	2	4	-	-
PC5. separate and store items labeled as red tag items for the process area in designated locations as per guidelines.	2	4	-	-
PC6. stack boxes and containers appropriately by size and utility to prevent falls, breakage, and to facilitate easy sorting when needed.	2	4	-	-
PC7. adhere to the floor and area markings that demarcate various sections in the plant, in accordance with prescribed instructions and standards.	2	4	-	-
<i>Storage and Documentation Standards</i>	8	13	-	-
PC8. implement the correct labeling system for instruments, boxes, and containers, and maintain reference files and documents with corresponding codes and lists.	2	4	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC9. verify that items in designated areas are properly identified as broken or damaged and segregated for repair or disposal.	2	3	-	-
PC10. perform proper labeling of fluids, oils, lubricants, solvents, chemicals, etc., and verify their correct storage to prevent spillage, leakage, or fire hazards as per given instructions.	2	3	-	-
PC11. store all materials and tools in their designated places and arranged according to the 5S guidelines.	2	3	-	-
<i>Cleaning and Maintenance of Work Areas</i>	18	35	-	-
PC12. check that the items in the respective areas have been identified as broken or damaged	2	4	-	-
PC13. follow the given instructions and check for labeling of fluids, oils, lubricants, solvents, chemicals etc. and proper storage of the same to avoid spillage, leakage, fire etc.	2	3	-	-
PC14. make sure that all material and tools are stored in the designated places and in the manner indicated in the 5S instructions	2	3	-	-
PC15. clean safety glasses/mask before use, as per safety protocols.	2	3	-	-
PC16. maintain a clean work environment by ensuring floors are swept, machinery is clean, and safety hazard displays are visible, especially during cleaning operations.	2	5	-	-
PC17. inspect and ensure hoses, cables, and wires are properly cleaned, well-maintained, and securely clamped to prevent accidents or mix-ups during the pultrusion process.	2	5	-	-
PC18. clean workbenches and surfaces to free of debris and in good working condition to avoid defects in pultrusion operations.	2	3	-	-
PC19. adhere to the lighting system cleaning schedule to ensure proper illumination and optimal work conditions for the pultrusion process.	1	3	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC20. store all cleaning materials and equipment in the designated areas after use, ensuring they are in good condition for future use.	2	3	-	-
PC21. maintain personal cleanliness and hygiene by wearing the prescribed uniform, gloves, helmet, and safety shoes, and following workplace hygiene standards.	1	3	-	-
<i>Standardization and Sustenance of 5S Practices Across Plant and Office Premises</i>	10	22	-	-
PC22. follow the daily cleaning standards and schedules to ensure a clean and organized working environment, minimizing risks during pultrusion operations.	2	5	-	-
PC23. attend and actively participate in all 5S training programs, ensuring understanding of cleaning, organizing, and maintaining workstations in the pultrusion area.	2	5	-	-
PC24. assist the team during 5S audits by ensuring work areas are clean, organized, and compliant with 5S standards, contributing to continuous improvement.	2	4	-	-
PC25. actively engage in workgroups focused on 5S, encouraging fellow team members to actively participate in maintaining cleanliness and order on the shop floor.	2	4	-	-
PC26. adhere to 5S guidelines on dos and don'ts to foster sustainability in the work environment, ensuring safe and efficient pultrusion operations.	2	4	-	-

TSC/N9019: Follow machine, safety and organizational guidelines in pultrusion department

Description

This unit focuses on workplace health and safety, covering PPE usage, fire safety, and first aid, equipping participants to manage emergencies and maintain a safe work environment.

Scope

The scope covers the following :

- Maintain a Safe and Efficient Workplace
- Follow Emergency Procedures
- Adhere to Standard Safety Protocols
- Engage in Safety Awareness Activities

Elements and Performance Criteria

Maintain a Safe and Efficient Workplace

To be competent, the user/individual on the job must be able to:

- PC1.** conduct essential safety inspections before operating all pultrusion machinery and equipment.
- PC2.** notify the supervisor promptly of any hazards identified during safety inspections.
- PC3.** wear appropriate Personal protective equipment as per workplace policy to perform related tasks safely.
- PC4.** evaluate potential risks before performing tasks that involve manual handling.
- PC5.** perform tasks following safe pultrusion work practices with minimal environmental impact.
- PC6.** return equipment and materials to designated storage areas after each use.
- PC7.** safely dispose of waste according to procedures in designated disposal areas.
- PC8.** implement safety actions to minimize risk to bystanders.
- PC9.** monitor and adhere to procedures and instructions to control potential risks in pultrusion department.

Follow Emergency Procedures

To be competent, the user/individual on the job must be able to:

- PC10.** report accidents, incidents, or issues immediately to the appropriate authority.
- PC11.** take immediate action to mitigate damage following an incident.
- PC12.** adhere to company standards and procedures for handling accidents, fires, and emergencies.
- PC13.** use emergency equipment following manufacturer instructions and workplace protocols.
- PC14.** administer first aid treatment according to approved techniques for specific injuries.
- PC15.** inspect, clean, test, and store first aid equipment as needed.
- PC16.** document first aid actions in line with workplace reporting procedures.

Adhere to Standard Safety Protocols

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC17.** follow standard safety procedures when handling hazardous materials, chemicals, machines, or sharp tools to prevent accidents.
- PC18.** perform preventive measures to guard against leaks, water logging, pests, fire, and pollution.
- PC19.** maintain a goal of zero accidents, damages, or violations of company safety protocols.
- PC20.** keep the work area organized, clean, and free of hazards.

Engage in Safety Awareness Activities

To be competent, the user/individual on the job must be able to:

- PC21.** participate actively in workplace fire drills and safety workshops.
- PC22.** promote awareness of first aid, evacuation procedures, and emergency protocols.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** knowledge of appropriate personal protective equipment (PPE) and clothing, and how to maintain them properly.
- KU2.** understanding methods to minimize environmental impact during work processes.
- KU3.** awareness of standard operating procedures for proper operate the pultrusion machine.
- KU4.** knowledge of safe handling and usage of materials and equipment at the workplace.
- KU5.** understanding potential health and safety risks and the measures to mitigate them.
- KU6.** procedures for contacting local emergency services in case of an incident.
- KU7.** knowledge of reporting protocols for accidents, incidents, and other workplace issues.
- KU8.** awareness of emergency evacuation procedures and first aid actions to follow.
- KU9.** workplace protocols for handling injuries or illnesses that occur at work.
- KU10.** knowledge of safe disposal methods for waste and hazardous materials.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** effectively communicate safety protocols and hazard information with team members and supervisors.
- GS2.** read and interpret safety guidelines, hazard labels, and equipment manuals.
- GS3.** identify potential safety risks and take preventive action as per standard procedures.
- GS4.** proficiency in reading work orders, machine instructions, and safety guidelines.
- GS5.** skill in monitoring equipment and product quality, ensuring specification adherence.
- GS6.** ability to troubleshoot minor issues and escalate as needed.
- GS7.** effective time management to meet production schedules and reduce downtime.
- GS8.** understanding and following workplace safety requirements, including PPE use.
- GS9.** accurately document safety checks, incidents, and compliance records as required.

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.

The assessment for the theory part will be based on knowledge bank of questions created by the SSC. Individual assessment agencies will create unique question papers for theory part for each candidate at

each examination/training center (as per assessment criteria below). Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

Qualification Pack

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
