## Qualification Pack

### WBSC/FFS/Q0201: Wooden Furniture Maker

#### Brief Job Description

Wooden Furniture Maker is responsible for producing, designing, crafting, and testing wooden furniture products such as cabinets, table, chair, door, windows, and other furniture using specialized tools.

#### Personal Attributes

A Wooden Furniture Maker should possess strong attention to detail, creativity and a deep appreciation for craftsmanship to produce high-quality furniture. Patience, precision, physical stamina and manual dexterity are essential personal attributes. A good furniture maker is also problem-solving oriented, able to interpret designs, adapt to challenges and make adjustments during production.

#### Applicable National Occupational Standards (NOS)

##### Compulsory NOS:

1. [WBSC/FFS/N0201: Apply Safe Working Practices \(Wooden Furniture Maker\).](#)
2. [WBSC/FFS/N0202: Identify timber/ wood & apply measuring, marking and testing instrument and holding & supporting hand tools.](#)
3. [WBSC/FFS/N0203: Identify and apply various saws and portable power saw machines for ripping, cross cutting, oblique sawing and curve cutting etc.](#)
4. [WBSC/FFS/N0204: Analyze the surface finish with exact sizing by planning operation, identify and apply various shaving tools, pairing tools or portable power planning machine.](#)
5. [WBSC/FFS/N0205: Identify and classify various types of joints, analyze and prepare correct joint at correct position, related with strength and appearance.](#)
6. [WBSC/FFS/N0206: Demonstrate ripping, cross cutting, curve cutting etc. on jig or scroll saw and circular saw machine.](#)
7. [WBSC/FFS/N0207: Demonstrate working on pedestal/potable drilling machine, wood turning lathe in correct location on woodwork.](#)
8. [WBSC/FFS/N0208: Prepare various type of wooden floor, partition wall, roof truss, door and windows frame and shutters, assembling & fixing \(wooden/ aluminium or PVC\).](#)
9. [WBSC/FFS/N0209: Create a wooden piece following a provided drawing and using specified timber /plywood /sunmica/block board etc.](#)
10. [WBSC/FFS/N0210: Work in real job situation with special emphasis on basic safety and hazards in this domain \(Wooden Furniture Maker\).](#)

## Qualification Pack

### WBSC/FFS/N0201: Apply Safe Working Practices (Wooden Furniture Maker).

#### Description

Apply Safe Working Practices

#### Scope

The scope covers the following :

- Procedures to achieve a safe working environment.
- Unsafe situations according to site policy.
- Necessary precautions on fire and safety hazards.
- Personal Productive Equipment (PPE).
- Basic first aid & CPR and their usage.
- Different fire extinguishers and their usage.

#### Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Maintain procedures to achieve a safe working environment in line with occupational health and safety regulations and requirements according to site policy.
- PC2.** Recognize any unsafe situations according to site policy, and assess his report accordingly.
- PC3.** Identify and take necessary precautions on fire and safety hazards and report according to site policy and procedures.
- PC4.** Demonstrate Personal Productive Equipment (PPE) like: safety helmet, safety glove, safety shoe and use the same as per related work.
- PC5.** Demonstrate basic first aid & CPR and use them under different circumstances.
- PC6.** Identify different fire extinguishers and use the same as per requirement in a mock drill.

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Procedures to achieve a safe working environment in line with occupational health and safety regulations and requirements according to site policy.
- KU2.** Unsafe situations according to site policy, and assess his report accordingly.
- KU3.** Necessary precautions on fire and safety hazards and report according to site policy and procedures.

#### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Recognize any unsafe situations according to site policy, and assess his report accordingly.

## Qualification Pack

- GS2.** Demonstrate Personal Protective Equipment (PPE) like: safety helmet, safety glove, and safety shoe, use the same as per related working environment.
- GS3.** Demonstrate basic first aid & CPR and use them under different circumstances.
- GS4.** Identify different fire extinguishers and use the same as per requirement in a mock drill.

## Qualification Pack

### WBSC/FFS/N0202: Identify timber/ wood & apply measuring, marking and testing instrument and holding & supporting hand tools.

#### Description

Identify timber/ wood & apply measuring, marking and testing instrument and holding & supporting hand tools.

#### Scope

The scope covers the following :

- Different types of wood/ timber.
- The measuring, marking, work holding and testing instruments.
- Marking as per drawing and measuring dimensions for checking.
- Usage of testing instrument and other usable hand tools.
- Identification of wooden sample piece.

#### Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

**PC1.** Identify different types of wood/ timber.

**PC2.** Identify the measuring, marking, work holding and testing instrument.

**PC3.** Mark as per drawing and measure dimensions for checking.

**PC4.** Demonstrate use of testing instrument and other usable hand tools.

**PC5.** Identify wooden sample piece (Annual ring, knots, shakes & chicks etc.).

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

**KU1.** Introduction of the trade.

**KU2.** General discipline, workshop discipline & Housekeeping.

**KU3.** Safety precaution in the workshop and industrial safety.

**KU4.** Introduction of timber, growth of timber trees, cross-section of exogenous tree trunk, types of tree, different part of a tree, Soft & hard wood, their differences.

**KU5.** Identification and use of different types of the measuring, marking and testing tools & their applications.

**KU6.** Identification and use of different types of work holding devices.

#### Generic Skills (GS)

User/individual on the job needs to know how to:

## Qualification Pack

- GS1.** Identify different wooden sample piece i.e. - soft wood & hard wood, wooden grains etc. & their applications.
- GS2.** Identify wooden sample piece (Annual ring, knots, shakes & chicks etc.).
- GS3.** Demonstrate use of hand operated tools and showing different audio-visual clips.

## Qualification Pack

### WBSC/FFS/N0203: Identify and apply various saws and portable power saw machines for ripping, cross cutting, oblique sawing and curve cutting etc.

#### Description

Identify and apply various saws and portable power saw machines for ripping, cross cutting, oblique sawing and curve cutting etc.

#### Scope

The scope covers the following :

- Selection of material and visual inspection for defects.
- Marking of the job as per drawing and check measurements before sawing.
- Marking of an angle with the aid of bevel square and miter square for oblique sawing.
- The required tools for desired operations and making of the job.
- Ripping/cross, cutting/curve, sawing/ cutting operations.
- Checking for dimensional accuracy.
- Usage and practice of Portable power circular saw.
- Different types of saw blade.

#### Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

**PC1.** Select material and inspect visually for defects.

**PC2.** Mark the job as per drawing and check measurements before sawing.

**PC3.** Mark an angle with the aid of bevel square and miter square for oblique sawing.

**PC4.** Identify and arrange the required tools for desired operations and make the job.

**PC5.** Perform Ripping/cross, cutting/curve, sawing/ cutting operations according to the marking following safety norms.

**PC6.** Check for dimensional accuracy.

**PC7.** Use and practice Portable power circular saw.

**PC8.** Sharpen and set different type saw blade.

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

**KU1.** Type of bench vice and their uses.

**KU2.** Introduction of different saw and their uses.

**KU3.** Introduction of power circular saw and its use.

**KU4.** Type of special saw and its uses i.e. - compass saw, coping saw, bow saw, fret saw.

**KU5.** Saw sharpening and sharpening tools.

## Qualification Pack

- KU6.** Description of boring tools - Types, Parts, functions, size and application.
- KU7.** Description of portable electrical drill machine.
- KU8.** Drill bits, types, sizes etc.
- KU9.** Hand augers description, sizes of augers, application of hand augers.

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Demonstrate the use of bench vice, bench hook, bench stop & their application.
- GS2.** Demonstrate different types of saws- ripping, cross cutting, curve cutting, oblique sawing.
- GS3.** Use and practice Portable power circular saw.
- GS4.** Sharpen and set different type saw blade.

## Qualification Pack

### **WBSC/FFS/N0204: Analyze the surface finish with exact sizing by planning operation, identify and apply various shaving tools, pairing tools or portable power planning machine.**

#### **Description**

Analyze the surface finish with exact sizing by planning operation, identify and apply various shaving tools, pairing tools or portable power planning machine.

#### **Scope**

The scope covers the following :

- Selection of material and appropriate planner for required surface finish and size.
- Setting of planner and performing required planning operation to obtain required size and finish.
- Plane across the grain and end grain.
- Checking the size, flatness, squareness and finish of the job as per drawing.
- Removal, sharpening and fitting of planner blade.
- Arranging of woods with vertical/ horizontal grains and required type of chisel for performing operation (chiseling across the grain) as per drawing.
- Marking of the work as per dimension of the drawing.
- Performing of chiseling as per drawing and ensure better finish.
- The usage of different types of chisel, chiseling, chiseling along& across the grain.
- Checking of the finished job as per drawing.

#### **Elements and Performance Criteria**

To be competent, the user/individual on the job must be able to:

- PC1.** Select material and appropriate planner for required surface finish and size.
- PC2.** Set planner with sharpened cutting iron and perform required planning operation to obtain required size and finish.
- PC3.** Plane across the grain and end grain.
- PC4.** Check the size, flatness, squareness and finish of the job as per drawing.
- PC5.** Demonstrate removal, sharpening and fitting of planner blade observing standard operating procedures.
- PC6.** Arrange woods with vertical/ horizontal grains and required type of chisel for performing operation (chiseling across the grain) as per drawing.
- PC7.** Mark the work as per dimension of the drawing.
- PC8.** Perform chiseling as per drawing and ensure better finish.
- PC9.** Demonstrate the use of different types of chisel, chiseling, chiseling along& across the grain.
- PC10.** Check the finished job as per drawing.

#### **Knowledge and Understanding (KU)**

The individual on the job needs to know and understand:

## Qualification Pack

- KU1.** Type of different planes and their proper uses in woodwork - Description, function and its size, setting, knowledge of sharpening and uses etc.
- KU2.** Usage of marking gauges.
- KU3.** Important instruments necessary for checking flatness and twistiness of surface.
- KU4.** Sharpening and grinding angle of cutter.
- KU5.** Portable power planer - useful in modern woodwork and new technology design.
- KU6.** Different type chisels - Definition, identification, their uses.
- KU7.** Necessity of grinding and sharpening.
- KU8.** Striking tools- Definition, types, application.
- KU9.** Files - Types,uses.
- KU10.** Care & maintenance of files.
- KU11.** Function of work bench, bench vice, bench hook, etc.

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Plan face, face edge, side edges and back.
- GS2.** Demonstrate the use of marking gauge & mortise gauge etc.
- GS3.** Test the accuracy of flatness and twistiness of the surface by using try square.
- GS4.** Grind and Sharpen the planer blade/ cutter.
- GS5.** Demonstrate portable power planer machine and its function.
- GS6.** Demonstrate the use of different types of chisel, chiseling along & across the grain.
- GS7.** Grind/ sharpen and honing of a chisel.
- GS8.** Demonstrate use of different types of striking tool, hammer and mallets.
- GS9.** Demonstrate the use of clamps G or C, saw sharpening vice, carpentry vice etc.

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                             | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|

## Qualification Pack

### **WBSC/FFS/N0205: Identify and classify various types of joints, analyze and prepare correct joint at correct position, related with strength and appearance.**

#### **Description**

Identify and classify various types of joints, analyze and prepare correct joint at correct position, related with strength and appearance.

#### **Scope**

The scope covers the following :

- Exact type of joint to employ and arrange materials, tools and equipment to perform the operation.
- Framing joint (Sawing and chiseling).
- Housing joint .
- Dovetail joint (Sawing and chiseling).
- Broadening joint.
- Lengthening joint (Sawing and chiseling).
- Assembling of different parts and check for correctness, strength and finishing.

#### **Elements and Performance Criteria**

To be competent, the user/individual on the job must be able to:

- PC1.** Choose exact type of joint to employ and arrange materials, tools and equipment to perform the operation.
- PC2.** Perform framing joint (Sawing and chiseling) as required maintaining dimensions.
- PC3.** Perform Housing joint as required maintaining dimensions.
- PC4.** Perform Dovetail joint (Sawing and chiseling) as required maintaining dimensions.
- PC5.** Perform Broadening joint as required maintaining dimensions.
- PC6.** Perform Lengthening joint (Sawing and chiseling) as required maintaining dimensions.
- PC7.** Assemble different parts and check for correctness, strength and finishing.

#### **Knowledge and Understanding (KU)**

The individual on the job needs to know and understand:

- KU1.** Seasoning of timber - Definition, advantage and disadvantage of seasoning.
- KU2.** Moisture content in timber and its effect on timber.
- KU3.** Characteristics of wood, physical and mechanical properties of wood.
- KU4.** Quality of good timber.
- KU5.** Define the classification of wooden joint.
- KU6.** Description of different types joint.
- KU7.** Uses of joint: Framing joint angle joint and lengthening joint etc.

## Qualification Pack

**KU8.** Different type of housing joint.

**KU9.** Jig or scroll saw and portable circular saw machine -its parts & their operational techniques and safety precaution.

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Perform framing joint (Sawing and chiseling) as required maintaining dimensions.
- GS2.** Demonstrate and making framing joints.
- GS3.** Demonstrate and make Housing joints.
- GS4.** Demonstrate and make dovetail joint.
- GS5.** Demonstrate and Make broadening joints.
- GS6.** Perform Housing joint as required maintaining dimensions.
- GS7.** Perform Dovetail joint (Sawing and chiseling) as required maintaining dimensions.
- GS8.** Perform Broadening joint as required maintaining dimensions.
- GS9.** Perform Lengthening joint (Sawing and chiseling) as required maintaining dimensions.
- GS10.** Assemble different parts and check for correctness, strength and finishing.

## Qualification Pack

## Qualification Pack

### WBSC/FFS/N0206: Demonstrate ripping, cross cutting, curve cutting etc. on jig or scroll saw and circular saw machine.

#### Description

Demonstrate ripping, cross cutting, curve cutting etc. on jig or scroll saw and circular saw machine.

#### Scope

The scope covers the following :

- Planning and selection of the job and setting up machine accessories at position to perform desired operation.
- Demonstration of band saw machine with different parts & their functions.
- Demonstration of the safety precaution with operational techniques.
- Ripping & cross cutting operation on band saw machine with hard wood.
- Curve cutting operation on hard board or soft wood or ply board by band saw machine.
- Circular saw machine, its parts and their operational techniques with safety precaution.
- Ripping & cross cutting operation on hard wood/ soft wood/ ply wood.

#### Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Plan and select the job and set up machine accessories at position to perform desired operation.
- PC2.** Demonstrate band saw machine with different parts & their functions.
- PC3.** Demonstrate the safety precaution with operational techniques.
- PC4.** Demonstrate Ripping & cross cutting operation on band saw machine with hard wood.
- PC5.** Demonstrate Curve cutting operation on hard board or soft wood or ply board by band saw machine.
- PC6.** Demonstrate circular saw machine, its parts and their operational techniques with safety precaution.
- PC7.** Demonstrate Ripping & cross cutting operation on hard wood/ soft wood/ ply wood (not less than 12 mm) by circular saw machine.

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Type of special saw and its uses i.e. -compass saw, coping saw, bow saw, fret saw.
- KU2.** Saw sharpening and sharpening tools.
- KU3.** Description of boring tools - Types, Parts, functions, size and application.
- KU4.** Description of portable electrical drill machine.
- KU5.** Drill bits, types, sizes etc.

## Qualification Pack

- KU6.** Type of different planes and their proper uses in woodwork - Description, function and its size, setting, knowledge of sharpening and uses etc.
- KU7.** Knowledge of using marking gauges.
- KU8.** Important instruments necessary for checking flatness and twistiness of surface.
- KU9.** Sharpening and grinding angle of cutter.
- KU10.** Portable power planer - useful in modern woodwork and new technology design.

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Demonstrate different types of saws- ripping, cross cutting, curve cutting, oblique sawing.
- GS2.** Use and practice Portable power circular saw.
- GS3.** Demonstrate Sharp Ripping & cross cutting operation on band saw machine with hard wood.
- GS4.** Demonstrate Curve cutting operation on hard board or soft wood or ply board by band saw machine.
- GS5.** Demonstrate circular saw machine, its parts and their operational techniques with safety precaution.
- GS6.** Demonstrate Ripping & cross cutting operation on hard wood/ soft wood/ ply wood (not less than 12 mm) by circular saw machines and set different type saw blade.

## Qualification Pack

## Qualification Pack

### WBSC/FFS/N0207: Demonstrate working on pedestal/portable drilling machine, wood turning lathe in correct location on woodwork.

#### Description

Demonstrate working on pedestal/portable drilling machine, wood turning lathe in correct location on woodwork.

#### Scope

The scope covers the following :

- Planning and selection of material and machine for drill holes to make observing safety points.
- Marking of the job as per drawing.
- Setting the job and cutting tool properly.
- Operation to make drill holes as per drawing.
- Checking dimensions for correctness.
- Planning and setting the machine for desired turning operation.
- Holding the job between centers or in other work holding devices.
- Holding the tool and adjust tool rest
- Required turning operation observing standard operating procedure.
- Checking dimensions and finishing as per drawing.

#### Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Plan and select material and machine for drill holes to make observing safety points.
- PC2.** Mark the job as per drawing.
- PC3.** Set the job and cutting tool properly.
- PC4.** Perform operation to make drill holes as per drawing.
- PC5.** Check dimensions for correctness.
- PC6.** Plan and set the machine for desired turning operation.
- PC7.** Hold the job between centers or in other work holding devices.
- PC8.** Hold the tool and adjust tool rest.
- PC9.** Perform required turning operation observing standard operating procedure.
- PC10.** Check dimensions and finish as per drawing.

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Pedestal /portable drilling machine - Description, Types, Sizes, Parts, Function, Operation of pedestal drilling machine.
- KU2.** Safety precaution and P.P.E for the pedestal drilling machine.

## Qualification Pack

- KU3.** Wood turning lathe- Description, Types, Sizes, Parts, Function, Types, Operation of wood turning lathe.
- KU4.** Safety precaution and P.P.E for wood turning lathe.

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Demonstrate Pedestal / portable drilling machine -its parts & their operational techniques and safety precaution.
- GS2.** Demonstrate the use of country drill, hand drill, ratchet brace, Breast drill and hand augers & bits.
- GS3.** Demonstrate the use of portable electrical drill machine.
- GS4.** Demonstrate the Auger application.
- GS5.** Make different sizes of drill hole on wooden block/ job using straight/ taper shank drill bit.
- GS6.** Demonstrate Wood turning lathe - operational technique and safety precaution.
- GS7.** Care & maintain wood turning lathe with oiling & greasing.
- GS8.** Make chisel handle, table lamp stand, etc. on wood turning lathe.

## Qualification Pack

## Qualification Pack

### **WBSC/FFS/N0208: Prepare various type of wooden floor, partition wall, roof truss, door and windows frame and shutters, assembling &fixing (wooden/ aluminium or PVC).**

#### **Description**

Prepare various type of wooden floor, partition wall, roof truss, door and windows frame and shutters, assembling &fixing (wooden/ aluminium or PVC).

#### **Scope**

The scope covers the following :

- Simple floor construction.
- Structure of wooden partition wall.
- Arrangement of required materials, tools and machineries for smooth performance of the operations.
- Marking the job and perform required operation to prepare the item as per drawing.
- Assembling the components to make a complete item.
- Checking the dimensions of the product and its functionality
- The drawing / sketch and plan for the required steps of operation to produce the item.
- Arrangement of required materials, tools and machineries for smooth Performance of the operations.
- Marking the job and performing required operation to prepare the item as per drawing.
- Assembling the components to make a complete item.
- Checking the dimensions of the product and its functionality.

#### **Elements and Performance Criteria**

To be competent, the user/individual on the job must be able to:

- PC1.** Identify simple floor construction.
- PC2.** Make structure of wooden partition wall.
- PC3.** Arrange required materials, tools and machineries for smooth performance of the operations.
- PC4.** Mark the job and perform required operation to prepare the item as per drawing.
- PC5.** Assemble the components to make a complete item.
- PC6.** Check the dimensions of the product and its functionality.
- PC7.** Study the drawing / sketch and plan for the required steps of operation to produce the item.
- PC8.** Arrange required materials, tools and machineries for smooth Performance of the operations.
- PC9.** Mark the job and perform required operation to prepare the item as per drawing.
- PC10.** Assemble the components to make a complete item.
- PC11.** Check the dimensions of the product and its functionality.

#### **Knowledge and Understanding (KU)**

The individual on the job needs to know and understand:

## Qualification Pack

- KU1.** The purpose of using floor construction with different types of joists.
- KU2.** Introduction about building construction.
- KU3.** Different type door & windows and different size, their uses.
- KU4.** Different type panel used for panel shutter, glazed shutter etc.
- KU5.** Economic factors and material estimates.
- KU6.** Basic principle of repairing work, door window.

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Identify simple floor construction.
- GS2.** Demonstrate different types of basement floor single joint wooden floor and double joint wooden floor.
- GS3.** Make structure of wooden partition wall.
- GS4.** Revise basic joint related with building work.
- GS5.** Make door shutter.
- GS6.** Make panel of door.
- GS7.** Make door glazed shutter fitting molding with glass.
- GS8.** Repair and recondition furniture, door and window, staircase hand railing etc.
- GS9.** Grind chisels, drills and check for correct cutting angle.
- GS10.** Mark and make fitting different types of nuts, bolts, washers, screws by drilling, tapping and dieing.
- GS11.** Make joint on hard wood to make small door and window frame.
- GS12.** Make a small rack with hard wood and plywood.
- GS13.** Make a small table use of lock, hinges, hasp and staple etc. making a small box with sun mica top. (Mortise and Tenon joint, T half tap dovetail joint, Secret dovetail joint)

## Qualification Pack

### WBSC/FFS/N0209: Create a wooden piece following a provided drawing and using specified timber /plywood /sunmica/block board etc.

#### Description

Create a wooden piece following a provided drawing and using specified timber /plywood /sunmica/block board etc.

#### Scope

The scope covers the following :

- Marking and making of hanging plate, corner plate, name plate, different types of clamps and angle plate.
- Grinding of chisels, drills and check for correct cutting angle.
- Arrangement required for materials, tools and machineries for smooth performance of the operations.
- Marking of the job as per drawing.
- Performing required operation to prepare the job as per drawing.
- Checking the dimensions of the product and its functionality.
- Arrangement of required material, tools etc. to make the job as per drawing.
- Performing sawing, chiseling of different parts.
- Preparation of all the parts as per marking layout and check dimension.
- Assembling of different parts to make a complete job.
- Overall finishing and checking dimensions as per drawing.

#### Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Mark and make hanging plate, corner plate, name plate, different types of clamps and angle plate by chipping, sawing filling, drilling, counter sinking etc.
- PC2.** Grind chisels, drills and check for correct cutting angle.
- PC3.** Arrange required materials, tools and machineries for smooth performance of the operations.
- PC4.** Mark the job as per drawing.
- PC5.** Perform required operation to prepare the job as per drawing.
- PC6.** Check the dimensions of the product and its functionality.
- PC7.** Arrange required material, tools etc. to make the job as per drawing.
- PC8.** Perform sawing, chiseling of different parts, prepare all the parts as per marking layout and check dimension.
- PC9.** Assemble different parts to make a complete job.
- PC10.** Overall finish and check dimensions as per drawing.

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

## Qualification Pack

- KU1.** Calculation of timber required for making a door and window frame, small rack, table etc.
- KU2.** The required hand tools and raw materials for making the above job.
- KU3.** The sequence of operation of the job.

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Mark and make hanging plate, corner plate, name plate, different types of clamps and angle plate by chipping, sawing filling, drilling, counter sinking etc.
- GS2.** Grind chisels, drills and check for correct cutting angle.
- GS3.** Arrange required materials, tools and machineries for smooth performance of the operations.
- GS4.** Mark the job as per drawing.
- GS5.** Perform required operation to prepare the job as per drawing.
- GS6.** Check the dimensions of the product and its functionality.
- GS7.** Arrange required material, tools etc. to make the job as per drawing.
- GS8.** Perform sawing, chiseling of different parts, prepare all the parts as per marking layout and check dimension.
- GS9.** Assemble different parts to make a complete job. Overall finish and check dimensions as per drawing.
- GS10.** Make joint on hard wood to make small door and window frame.
- GS11.** Make a small rack with hard wood and plywood.
- GS12.** Make a small table use of lock, hinges, hasp and staple etc. making a small box with sun mica top. (Mortise and Tenon joint, T half tap dovetail joint, Secret dovetail joint)

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

Assessment will be based on the concept of Independent Assessors empaneled with West Bengal State Council of Technical & Vocational Education & Skill Development (WBSCT&VE&SD), identified, selected, trained and certified on Assessment techniques. These Assessors would be aligned to assess as per the laid down criteria.

WBSCT&VE&SD would conduct assessment only at the training centers or designated testing centers authorized by WBSCT&VE&SD. Ideally, the assessment will be a continuous process comprising of two distinct steps:

- Continuous assessment by Trainers
- Term end /Final Assessment by WBSCT&VE&SD

Each National Occupational Standard (NOS) in the respective QPs will be assigned weightage. Each Performance Criteria in the NOS will be assigned marks for theory and/or practical based on relative importance and criticality of function. This will facilitate preparation of question bank / paper sets for each of the QPs. Each of these papers sets/question banks created by subject matter experts through WBSCT&VE&SD, especially with regard to the practical test and the defined tolerances, finish, accuracy

## Qualification Pack

etc. The following tools are proposed to be used for final assessment:

i. Written Test: This will comprise of (i) True/False Statements and/or (ii) Multiple Choice Questions and/or (iii) Matching Type Questions. Online system for this will be preferred.

ii. Practical Test: This will comprise a test job to be prepared as per project briefing following appropriate working steps, using necessary tools, equipment and instruments. Through observation it will be possible to ascertain candidate's aptitude, attention to details, quality consciousness etc.

iii. Structured Viva-voce: This tool will be used to assess the conceptual understanding and the behavioral aspects as regards the job role and the specific task at hand.

### Minimum Aggregate Passing % at QP Level : 70

**(Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

## Assessment Weightage

Compulsory NOS

| National Occupational Standards                                                                                                                                                 | Theory Marks | Practical Marks | Project Marks | Viva Marks | Total Marks | Weightage |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|-------------|-----------|
| WBSC/FFS/N0201. Apply Safe Working Practices (Wooden Furniture Maker).                                                                                                          | 20           | 60              | -             | -          | 80          | 8         |

### Glossary

|                                              |                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |
| <b>Knowledge and Understanding (KU)</b>      | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                         |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
| <b>Sector</b>                           | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                                                                                            |
| <b>Sub-sector</b>                       | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                                                                                           |
| <b>Occupation</b>                       | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                                                                                      |
| <b>Job role</b>                         | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                                                                                      |
| <b>Occupational Standards (OS)</b>      | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.                                                                       |
| <b>Performance Criteria (PC)</b>        | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                                                                                          |
| <b>National Occupational Standard</b>   | National Occupational Standard (NOS) are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                                                            |
| <b>Qualifications Pack (QP)</b>         | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                                                                                             |

## Qualification Pack

|                                    |                                                                                                                                                                                                                                                                                                                                                                        |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit Code</b>                   | Unit code is a unique identifier for an Occupational Standard, which is denoted by an N                                                                                                                                                                                                                                                                                |
| <b>Unit Title</b>                  | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                                                                                              |
| <b>Description</b>                 | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                                                                                         |
| <b>Scope</b>                       | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                                                                                                  |
| <b>Knowledge and Understanding</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>      | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>         | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                   | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                     | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
| <b>Qualification</b>               | A formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards.                                                                                                                                                                                      |
| <b>Qualification File</b>          | A Qualification File is a template designed to capture necessary information of a Qualification from the perspective of NSQF compliance. The Qualification File will be normally submitted by the awarding body for the qualification.                                                                                                                                 |
| <b>Long Term Training</b>          | Long-term skilling means any vocational training program undertaken for a year and above. <a href="https://ncvet.gov.in/sites/default/files/NCVET.pdf">https://ncvet.gov.in/sites/default/files/NCVET.pdf</a> .                                                                                                                                                        |
