WBVT/ELE/Q0101: ASSISTANT TECHNICIAN OF CREATIVE & DYNAMIC LIGHTING SYSTEM

Brief Job Description

Assistant Technician of Creative & Dynamic Lighting System is designed to equip learners with foundational knowledge and practical skills in the setup, programming, and maintenance of creative and dynamic lighting systems used in events, entertainment, architectural installations, and theatrical productions. Participants will gain hands-on experience with lighting control software and hardware, understand DMX and networked lighting protocols, and learn techniques for designing and operating synchronized lighting shows. The qualification prepares individuals for entry-level roles supporting lighting assistant technicians, and production teams in a variety of creative industries

Personal Attributes

Personal attribute required for Assistant Technician of Creative and Dynamic Lighting system are - (i) Technical Aptitude, (ii) Creative & Visual sense, (iii) Attention to detail, (iv) Safety awareness, (v) Teamwork & Coordination, (vi) Time management & Reliability, (vii) Physical Fitness, (viii) Problem solving ability, (ix) Learning attitude and (x) Professional behaviour

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [WBVT/ELE/N0101: Electrical Safety and Hazard Management Equipments](#)
2. [WBVT/ELE/N0102: Describe the Electrical Principles and Wiring System Testing](#)
3. [WBVT/ELE/N0103: Explain the Basic Electronics and Digital Electronics Troubleshooting](#)
4. [WBVT/ELE/N0104: Engineering Drawing and Lighting Design](#)
5. [WBVT/ELE/N0105: Decorative Lighting Installation and Maintenance](#)
6. [WBVT/ELE/N0106: Dynamic Lighting and Control Systems](#)
7. [WBVT/ELE/N0107: Decorative Lighting Applications](#)
8. [WBVT/ELE/N0108: Employability skill - 30Hrs. \(NOS Code - DGT/VSQ/N0101\)](#)
9. [WBVT/ELE/N0109: On-the-Job Training](#)

Qualification Pack

WBVT/ELE/N0101: Electrical Safety and Hazard Management Equipments

Description

This NOS defines the competencies required to identify electrical hazards, use safety equipment and implement preventive and control measures while working with electrical systems. It ensures safe working practices to prevent accidents, injuries and damage to equipments

Scope

The scope covers the following :

- The individual is expected to -
 - 1) Identify electrical hazards in the workplace
 - 2) Use appropriate Personal Protective Equipment (PPE)
 - 3) Handle safety devices and tools
 - 4) Follow standard safety procedures and regulations
 - 5) Respond effectively to electrical emergencies

Elements and Performance Criteria

Electrical Safety and Hazard Management

To be competent, the user/individual on the job must be able to:

PC1. Use proper personal protective equipment

PC2. Follow safety rules and procedures

PC3. Apply safe working practices

PC4. Apply basic first aid to address common accidents

PC5. Maintain a clean, organized and safe work environment

PC6. Practice safe handling and usage of tools, creative & Decorative lighting system

PC7. bbbbbb

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Describe occupational safety hazards

KU2. List the different types of occupational safety hazards in Assistant Technician of Creative & Dynamic Lighting system

KU3. Discuss general safety Rules, common hazards in the work area and procedures for dealing with the same

KU4. Explain Personal protective equipment like gloves, nose mask, shoes etc. and their application under different working conditions

KU5. Explain waste management and pollution control procedure

KU6. Identify and select right equipment such as fire extinguisher & based on type of fire

KU7. Concept of Standards and advantages of BIS/ISI

Qualification Pack

KU8. Trade tools specifications

KU9. Introduction to National Electrical Code-2011

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Role play to demonstrate dealing common hazards in work area
- GS2.** Identify Personal protective equipment like gloves, nose mask, shoes etc. and their application.
- GS3.** Demonstrate the safe practices while using tools and equipment
- GS4.** Identify the chemical hazards and take proper safety measures while using the chemical
- GS5.** Set up the workspace ergonomically by adjusting the height of the table or chair Simulate first aid scenario
- GS6.** Identify trade tools and machineries
- GS7.** Practice safe methods of lifting and handling of tools & equipment
- GS8.** Select proper tools for operation and precautions in operation
- GS9.** Practice in using combination pliers, cutting pliers, screw drivers, etc
- GS10.** Care & maintenance of trade tools

Qualification Pack

WBVT/ELE/N0102: Describe the Electrical Principles and Wiring System Testing

Description

In this NOS, trainees will learn to identify different types of cables, Skinning and jointing of single/multi strand wires, crimping thimbles, Lugs. Series and Parallel Circuits, Measuring Unknown Resistance using various meters. Installation of Switches, Holder, Plugs, etc, use of wiring accessories, different types of Fuses, Wiring, Switching and Domestic electrical Circuits. Earthing, testing of different Contactors relays, Single-Phase transformer LV & HV winding, measure input and output voltage of Single-Phase transformer

Scope

The scope covers the following :

- The individual is expected to -
 - 1. Explain Ohms law, Resistors and Laws of Resistance.
 - 2. Demonstrate the Series and Parallel Circuits and measurement of unknown resistance.
 - 3. Select and install electrical material and components, for lighting arrangement.
 - 4. Identify and Use of Wiring Accessories and earthing practice

Elements and Performance Criteria

Electrical Principles and Wiring System Testing

To be competent, the user/individual on the job must be able to:

PC1. Explain Ohm's law , Resistors and Laws of Resistance

PC2. Demonstrate the Series and Parallel Circuits and measurement of unknown resistance

PC3. Select and install electrical material and components, for lighting arrangement

PC4. Identify and Use of Wiring Accessories and earthing practice

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Explanation Properties of Conductors, Semi-Conductors, Insulators, Wires/Cables

KU2. Different types of wires , cables and their specification

KU3. Introduction to the Basic Terms, Definitions, Units and Effects of Electric Current

KU4. Ohms Law - Simple Electrical Circuits and Working Principles

KU5. Resistors - Laws of Resistance - Series and Parallel Circuits

KU6. Introduction to Common Electrical Accessories used in electrical wiring, & their Specifications

KU7. Explanation of the Working Principles and specification of different types of Switches, Lamp Holders, Plugs and Sockets

KU8. Design Domestic wiring Circuits and Working Principles of Alarms & Switches, MCB, RCCB, ELCB, MCCB

Qualification Pack

- KU9.** Electrical Wirings - I.E. Rules, Types of Wirings, Specifications of Wiring - Grading of Cables and their Current Ratings. Use of PVCs conduits
- KU10.** Different types of Fuses
- KU11.** Principles of different methods of - Earthing
- KU12.** Importance of Earthing
- KU13.** Earth Leakage Relay
- KU14.** Construction & working of Relays - Thermal, Electromagnetic, Solid State Relays
- KU15.** Construction & working of contactors
- KU16.** Control Relays and Protective Relays
- KU17.** Concept of Transformers and their Classification

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Skinning the cables, and joint practice on single/multi strand wires
- GS2.** Demonstration and identification of types of cables
- GS3.** Practice on crimping thimbles, Lugs
- GS4.** Demonstration of Series and Parallel Circuits
- GS5.** Measuring Unknown Resistance. Use of various meters
- GS6.** Practice on Installation and Fixing of Switches, Holder Plugs, etc
- GS7.** Identification and Use of Wiring Accessories
- GS8.** Identification of different types of Fuses, MCB,ELCB,RCCB,MCCB
- GS9.** Demonstration of Wiring and Switching
- GS10.** Details of Domestic Circuits
- GS11.** Practice on Earthing
- GS12.** Testing of different Contactors relays
- GS13.** Testing of Single-Phase transformer LV & HV winding
- GS14.** Measure the input and output voltage of Single-Phase transformer

WBVT/ELE/N0103: Explain the Basic Electronics and Digital Electronics Troubleshooting

Description

This NOS defines the competencies required to test Diodes, transistors, LED. Utility of Heat Sink, transistors, ICs. Pin configuration of different ICs. Performance testing of logic gates, FlipFlops, use of Digital IC trainer Kit. Performance of half wave & full wave rectifiers

Scope

The scope covers the following :

- The individual is expected to -
- 1) Introduction to Basic and digital Electronics, troubleshoot electronics circuits.
- 2) Identify the Semiconductor Diodes, transistor, ICs etc.
- 3) Demonstrate rectifier circuit

Elements and Performance Criteria

Explain the Basic Electronics and Digital Electronics Troubleshooting

To be competent, the user/individual on the job must be able to:

PC1. Introduction to Basic and digital Electronics ,troubleshoot electronics circuits

PC2. Identify the Semiconductor Diodes, transistor, IC's etc.

PC3. Demonstrate rectifier circuit

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Atomic Structures and Energy Levels of Semiconductor Elements

KU2. Types of Semiconductors

KU3. P and N type of Semiconductor Materials, P-N Junction

KU4. Diode- Working Principle - Classification - Reverse Bias and Forward Bias - Utility of Heat Sink

KU5. Specification of Diode - PIV Rating

KU6. Working principle of Light Emitting Diode

KU7. Working Principles of Transistors

KU8. Biasing of Transistors, Modes of use of Transistors

KU9. Specifications and Rating of Transistors

KU10. Working of ICs

KU11. Introduction of digital electronics

KU12. Basic concept of Number system(Decimal, Binay,octal,Hexadecimal)

KU13. Concept of Logic Gates(AND, OR, NOT, NAND, NOR, XOR, XNOR)

KU14. Concept of Combinational Circuits, Flip-Flops, Counters

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Identification and testing of Diodes, transistors
- GS2.** Specification of diodes, transistors
- GS3.** Testing of LED
- GS4.** Utility of Heat Sink
- GS5.** Terminal identification of Transistors, ICs
- GS6.** Pin configuration of different ICs
- GS7.** Performance testing of logic gates ,Flip-Flops, Counters by using Digital IC trainer Kit
- GS8.** Performance of half wave & full wave rectifiers

WBVT/ELE/N0104: Engineering Drawing and Lighting Design

Description

This NOS defines the competencies required to design right lighting for each room (kitchen, bedroom, bathroom), Design shops lighting that makes look attractive and products stand out, stage lights and spotlights for performers, Control brightness to create the right mood or ambiance, design principles like balance, focus, and contrast using light. Use engineering drawings to create basic lighting layouts for real-world applications like theaters, event spaces or homes. Read the layout diagram of different electrical & electronics circuit

Scope

The scope covers the following :

- Explain Lighting fundamentals and different types of light .
- Apply lighting principles to various spaces,.
- Create different colors and lighting on mood, ambiance, and overall aesthetics.
- Read and apply engineering drawing in the field of decorative lighting

Elements and Performance Criteria

Engineering Drawing and Lighting Design

To be competent, the user/individual on the job must be able to:

PC1. Explain Lighting fundamentals and different types of light

PC2. Apply lighting principles to various spaces

PC3. Create different colors and lighting on mood, ambiance, and overall aesthetics

PC4. Read and apply engineering drawing in the field of decorative lighting

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Purpose of Lighting

- KU2.**
- Types of Lighting
 - Ambient Lighting - General lighting for a room (like tube lights or ceiling lights).
 - Task Lighting - Focused light for specific tasks (like a desk lamp).
 - Accent Lighting - Decorative lighting to highlight objects (like a spotlight on a painting)

KU3. Illumination

KU4. Light Distribution

- KU5.**
- Color of Light
 - Warm lights, cool lights

KU6. Energy Efficiency lights (LED, CFL)

KU7. Direction and Spread of lights

KU8. Types of Lights(Incandescent Light, Fluorescent Light, LED, Halogen Light, Neon Light)

Qualification Pack

- KU9.** Type of light used in residential area, commercial building, Theatres, Auditoriums, Clubs, events etc.
- KU10.** Understand and Interpret Engineering Drawings
- KU11.** Recognize different types of technical drawings used in decorative lighting projects
- KU12.** Understand the basic symbols of electrical components.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Design right lighting for each room (kitchen, bedroom, bathroom).
- GS2.** Design lighting that makes shops look attractive and products stand out.
- GS3.** Set up stage lights and spotlights for performers
- GS4.** Control brightness to create the right mood or ambiance
- GS5.** Apply basic design principles like balance, focus, and contrast using light
- GS6.** Use engineering drawings to create basic lighting layouts for real-world applications like theaters, event spaces, or homes.
- GS7.** Read the layout diagram of different electrical & electronics circuit

WBVT/ELE/N0105: Decorative Lighting Installation and Maintenance

Description

This NOS defines the competencies required to install different Lighting Fixtures and Systems, install basic lighting systems for stage, events, or studio setups under supervision, handle cabling, rigging, and electrical safety procedures, identify Common Lighting Problems, diagnose faulty components by using Tools and Testing Devices, Replace or repair faulty lighting parts and follow correct wiring and safety methods

Scope

The scope covers the following :

- Installation of different types of advanced lights used in decorative lighting system.
- Install various lighting fixtures ,wiring, and grounding, as per safety protocols.
- Demonstrate the process of finding and repairing common lighting system issues.

Elements and Performance Criteria

Decorative Lighting Installation and Maintenance

To be competent, the user/individual on the job must be able to:

- PC1.** Describe different types of advanced lights used in decorative lighting system
- PC2.** Install various lighting fixtures, wiring, and grounding, as per safety protocols
- PC3.** Demonstrate the process of finding and repairing common lighting system issues

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Concept about LED Strip Lights, Smart LED Bulbs, Fairy/String Lights, LED Neon Flex Light, Fiber Optic Lights, Laser Lights, Projection Lights, DMX Controlled Stage Lights, Chandeliers with LED Technology
- KU2.** How to plan, connect, and install different lighting systems
- KU3.** Understand basic wiring rules, wire colors, and connections
- KU4.** Learn the importance of grounding and safety while working with electricity

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Identify the different light fixture (LED Strip Lights, Smart LED Bulbs, Fairy/String Lights, LED Neon Flex Light, Fiber Optic Lights, Laser Lights, Projection Lights, DMX Controlled Stage Lights, Chandeliers with LED Technology)
- GS2.** Steps required to Install Lighting Fixtures and Systems
- GS3.** Install basic lighting systems for stage, events, or studio setups under supervision

Qualification Pack

- GS4.** Handle cabling, rigging, and electrical safety procedures
- GS5.** Identify Common Lighting Problems
- GS6.** Diagnose Faulty Components by using Tools and Testing Devices
- GS7.** Replace or repair faulty lighting parts
- GS8.** Follow correct wiring and safety methods

WBVT/ELE/N0106: Dynamic Lighting and Control Systems

Description

This NOS defines the competencies required to connect and set up simple lighting systems using basic hardware (like smart bulbs or DMX controllers), changing light color and brightness using software, creating patterns like blinking, fading, chasing or pulsing lights. Connection of DMX controllers to the light and different types of Lighting Control Software

Scope

The scope covers the following :

- Introduction to dynamic lighting systems, and controlled remotely.
- Apply lighting control software and hardware in the dynamic lighting systems.
- Create various lighting effects by programming for specific effects

Elements and Performance Criteria

Demonstrate Dynamic Lighting system and control systems

To be competent, the user/individual on the job must be able to:

- PC1.** Introduction to dynamic lighting systems, and controlled remotely
- PC2.** Apply lighting control software and hardware in the dynamic lighting systems
- PC3.** create various lighting effects by programming for specific effects

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** What is a Dynamic Lighting System and Understand how smart and dynamic lighting works
- KU2.** Remote-Controlled Lights, Smart Lighting (App-Controlled or Voice-Controlled), Automated Lighting, Programmable Lighting Effects
- KU3.** Components of a Dynamic Lighting System (Smart LED Bulbs, Controllers / Remotes, Sensors (motion, light).
- KU4.** Benefits of Dynamic Lighting
- KU5.** Where Dynamic Light used
- KU6.** Identify different types of lights and controllers used in smart and stage lighting

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Identify the components and features of a dynamic lighting system(LED Fixtures, Smart Bulbs, DMX Fixtures)

Qualification Pack

- GS2.** Connect and set up simple lighting systems using basic hardware (like smart bulbs or DMX controllers)
- GS3.** Changing light color and brightness using software
- GS4.** Creating patterns like blinking, fading, chasing, or pulsing lights
- GS5.** Connection of DMX controllers to the light
- GS6.** Different types of Lighting Control Software

WBVT/ELE/N0107: Decorative Lighting Applications

Description

This NOS defines the competencies required to assist senior lighting designers in visualizing and setting up creative lighting themes. . Create simple lighting designs for: Stage performances and shows, Building facades and interior spaces , Weddings, parties, and public events

Scope

The scope covers the following :

- Understand how lighting can change the mood and appearance of a space or event.
- Identify suitable lighting styles for concerts, stage shows, buildings, and events like weddings or festivals.

Elements and Performance Criteria

Execute the decorative Lighting Applications

To be competent, the user/individual on the job must be able to:

PC1. Apply creative lighting techniques to various applications

PC2. Design various lighting effects, such as color changes, dimming, to the different spaces

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand how lighting can change the mood and appearance of a space or event

KU2. Identify suitable lighting styles for concerts, stage shows, buildings, and events like weddings or festivals

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Assist senior lighting designers in visualizing and setting up creative lighting themes.

GS2.

- Create simple lighting designs for:
- Stage performances and shows,
- Building facades and interior spaces ,
- Weddings, parties, and public events

WBVT/ELE/N0108: Employability skill - 30Hrs. (NOS Code - DGT/VSQ/N0101)

Description

Introduces the importance of Employability Skills in meeting the job requirements

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills, Communication Skills, Diversity & Inclusion.
- Financial and Legal Literacy, Essential Digital Skills, Entrepreneurship ,Customer Service.
- Getting ready for apprenticeship and Jobs

Elements and Performance Criteria

Employability Skill-30 Hr

To be competent, the user/individual on the job must be able to:

PC1. As per NCVET guided course module

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Discuss the importance of Employability Skills in meeting the job requirements
- KU2.** Explain constitutional values, civic rights, duties, citizenship, responsibility towards society etc. That are required to be followed to become a responsible citizen
- KU3.** Show how to practice different environmentally sustainable practices
- KU4.** Discuss 21st century skills
- KU5.** Display positive attitude, self motivation, problem solving, time management skills and continuous learning mindset in different situations
- KU6.** Use appropriate basic English sentences/phrases while speaking
- KU7.** Demonstrate how to communicate in a well-mannered way with others
- KU8.** Demonstrate working with others in a team
- KU9.** Show how to conduct one self appropriately with all genders and PwD
- KU10.** Discuss the significance of reporting sexual harassment issues in time
- KU11.** Discuss the significance of using financial products and services safely and securely
- KU12.** Explain the importance of managing expenses, income, and savings
- KU13.** Explain the significance of approaching the concerned authorities in time for any exploitation as per legal rights and laws

Qualification Pack

- KU14.** Show how to operate digital devices and use the associated applications and features, safely and securely
- KU15.** Discuss the significance of using internet for browsing, accessing social media platforms, safely and securely
- KU16.** Discuss the need for identifying opportunities for potential business, sources for arranging money and potential legal and financial challenges
- KU17.** Differentiate between types of customers
- KU18.** Explain the significance of identifying customer needs and addressing them
- KU19.** Discuss the significance of maintaining hygiene and dressing appropriately
- KU20.** Create a bio data
- KU21.** Use various sources to search and apply for jobs
- KU22.** Discuss the significance of dressing up neatly and maintaining hygiene for an interview
- KU23.** Discuss how to search and register for apprenticeship opportunities

WBVT/ELE/N0109: On-the-Job Training

Description

The On the Job Training (OJT) aims to provide hands on experience in installing, operating and maintaining creative and dynamic lighting systems used in events, studios, architectural lighting and entertainment environments. Trainees will apply theoretical knowledge in real work situations under supervision.

Scope

The scope covers the following :

- By the end of OJT in creative and dynamic lighting systems the trainee will be able to -
- * Assist in installation and setup lighting system
- * Operate basic lighting controls under supervision
- * Follow safety procedures during electrical work
- * Identify and troubleshoot common lighting issues
- * Support creative lighting execution for events

Elements and Performance Criteria

On job training

To be competent, the user/individual on the job must be able to:

- PC1.** Understand about Lighting Fundamentals and different types of light
- PC2.**
 - Select and install electrical material, components, and fixing of different types of switches
 - for lighting arrangement
- PC3.**
 - How to apply lighting principles to various spaces, such as residential areas, commercial buildings, and entertainment venues, understanding the specific lighting needs of each
- PC4.**
 - Understand the impact of different colors and lighting on mood, ambiance, and overall aesthetics
- PC5.** Different types of advanced lights used in decorative lighting system
- PC6.**
 - The process of installing various lighting fixtures and systems, including wiring, grounding, and safety protocols
- PC7.**
 - Diagnosing and resolving common lighting system issues, including faulty components and wiring problems
- PC8.**
 - Proficient in working with a range of lighting fixtures, from traditional bulbs and lamps to modern LEDs and automated systems.
- PC9.**
 - Dynamic lighting systems, including those that can be controlled remotely, automated, and programmed for specific effects
- PC10.**
 - Create various lighting effects, such as color changes, dimming, and strobing, to enhance the ambiance of different spaces
- PC11.**
 - Apply creative lighting techniques to various applications, including entertainment, architecture, and special events

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** Understand about Lighting Fundamentals and different types of light
- GS2.** Select and install electrical material, components, and fixing of different types of switches for lighting arrangement
- GS3.** How to apply lighting principles to various spaces, such as residential areas, commercial buildings, and entertainment venues, understanding the specific lighting needs of each
- GS4.** Understand the impact of different colors and lighting on mood, ambiance, and overall aesthetics
- GS5.** Different types of advanced lights used in decorative lighting system
- GS6.** The process of installing various lighting fixtures and systems, including wiring, grounding, and safety protocols
- GS7.** Diagnosing and resolving common lighting system issues, including faulty components and wiring problems
- GS8.** Proficient in working with a range of lighting fixtures, from traditional bulbs and lamps to modern LEDs and automated systems
- GS9.** Dynamic lighting systems, including those that can be controlled remotely, automated, and programmed for specific effects
- GS10.** Create various lighting effects, such as color changes, dimming, and strobing, to enhance the ambiance of different spaces
- GS11.** Apply creative lighting techniques to various applications, including entertainment, architecture, and special events

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to WBSCVT for conducting the assessment online through Portal with two probable dates for Assessment
- WBSCVT deploys the ToA certified Assessor for executing the assessment
- WBSCVT monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then Assessment will spill over to consecutive days.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

3. Assessment Quality Assurance levels/Framework:

Qualification Pack

- Question bank is created by the Subject Matter Experts (SME) are verified by the other SME
- Questions are mapped to the specified assessment criteria
- Assessor must be ToA certified.

4. Types of evidence or evidence-gathering protocol:

- reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding

5. Method of verification or validation:

- Surprise visit to the assessment location

6. Method for assessment documentation, archiving, and access

- Hard copies of the documents are stored

On the Job:

1. Each module will be assessed separately.
2. The pass criteria is as per norms set by WBSCVT in respect of Qualification Files
3. Tools of Assessment that will be used for assessing whether the candidate is having desired skills, understanding needs & requirements, and perform Soft Skills effectively:
 - Videos / portfolio of Trainees during Industry Exposure/OJT
4. Assessment of each Module will ensure that the candidate is able to:
 - Effective engagement with the stakeholders
 - Understand the working of various tools and equipment
 - Deliver the job assigned to him/her in conformity with job responsibility ascribed to Qualification File

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.
Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.

Qualification Pack

Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
National Occupational Standard	NOS define the measurable performance outcomes required from an individual engaged in a particular task. They list down what an individual performing that task should know and also do
Qualification	A formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards
Qualification File	A Qualification File is a template designed to capture necessary information of a Qualification from the perspective of NSQF compliance. The Qualification File will be normally submitted by the awarding body for the qualification
Sector	A grouping of professional activities on the basis of their main economic function, product, service or technology
Long Term Training	Long-term skilling means any vocational training program undertaken for a year and above. https://ncvet.gov.in/sites/default/files/NCVET.pdf
Long Term Training	Long-term skilling means any vocational training program undertaken for a year and above. https://ncvet.gov.in/sites/default/files/NCVET.pdf
